CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY
4th Semester of B. Pharm Examination
October 2015
PH210 Organic Chemistry-II

Date: 19.10.2015, Monday   Time: 01:30 p.m. to 04:30 p.m.   Maximum Marks: 80

Instructions:
1. Figures to right indicate marks.
2. Section wise separate answer book to be used.
3. Draw neat sketches wherever necessary.

SECTION- I

Q 1		Attempt any <u>TWO</u> of the following;	20
A	I.	Differentiate Microwave vs. Conventional synthesis.	05
	II.	Explain Nitration of Benzene with suitable reaction mechanism.	05
B		What is Green Chemistry? Explain its Twelve principle with suitable examples of it.	10
C	I.	Explain Electrophilic Aromatic Substitution (S_EAr) Reaction With Suitable Mechanism.	06
	II.	Explain Friedal Craft Alkylation of Benzene with reaction mechanism.	04
Q 2		Attempt any <u>TWO</u> of the following;	20
A	I.	Write the mechanism and limitations of Friedel-Crafts acylation of Benzene.	05
	II.	Short note on Sigmatropic reaction with suitable examples.	05
B	I.	Short note on Electrocyclic reaction with suitable examples.	05
	II.	Explain Cycloaddition reaction.	05
C	I.	Short note on Neighbouring Group Effect.	05
	II.	Write a preparation and reaction of Naphthalene or Phenanthrene.	05

SECTION- II

Q 3	Attempt any TWO of the following;		20
A	I.	Explain any three preparation of Aldehyde & Ketone.	06
	II.	Explain the Aldol Condensation with suitable mechanism.	04
B	I.	Write a note on Cannizaro Reaction.	04
	II.	Explain Hoffmann Rearrangement for Amide in detail.	06
C	I.	Write a note on Malonic Ester Synthesis.	04
	II.	Explain any three preparation and reactions of Phenol	06
Q 4	Attempt any TWO of the following;		20
A	I.	Explain any three preparation of Carboxylic Acids.	03
	II.	Explain any three preparation and reactions of ester.	05
	III.	Explain any two preparation and reactions of Amide.	02
B	I.	Explain the Wolff Kishner Reduction With Suitable Mechanism.	05
	II.	Short note on Arenes.	05
C	I.	Write a note on Kolbe synthesis.	03
	II.	Write any three preparations of Amines.	03
	III.	Note on Nucleophilic Acyl Substitution reactions.	04
