

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY
Chandubhai S. Patel Institute of Technology
U & P U. Patel Department of Computer Engineering

Practical List

Subject Name: Web Technologies
Subject Code: CE247

Semester: 4thCE
Academic Year: 2019-20

Part-1 (HTML 4.01) (4 Hours)

Sr. No.	Practical	Hours Required
1	Study and Learn HTML tags along with necessary attributes. (Self-learning exercise using this link: tutorialspoint.com/html/html_tags_ref.htm) Practice the tags learned from above video using Notepad ONLY.	2
2	Create Personal Home page using all above HTML tags in following template using Notepad ONLY. Header Nav Main Footer Where 1. Header can contain Name and ID No 2. Nav can contain different items like Current Sem, Attendance, Results, Skills etc. 3. Main can contain detailed contents when user clicks on items listed in point 2. 4. Footer can contain department name	2

Part-2 (HTML 5/BOOTSTRAP) (8 Hours)

Sr. No.	Practical	Hours Required
1	Repeat Practical 2 of Part 1 using HTML 5. Observe and write the differences between HTML 4 and HTML 5.	4
2	Create registration form for social networking website using HTML5 form tag and attributes. Apply necessary validation using HTML5 pattern attributes which Specifies a regular expression to check the input value against.	
3	If you could take the perfect trip, where would you go??? What animals would you see? What food would you eat? Add images to this webpage after each paragraph tag, to share your perfect trip with the world. Apply graphics using HTML CANVAS along with properties and methods.	
4	Create a program in HTML 5 using API which provides access to multimedia streams (video, audio, or both) from local devices.	2
5	Installation and configuration of BootStrap. Create theme and layout using bootstrap.	2

Part-3 (CSS 2.0) (6 Hours)

No	Practical	Hours Required
1	Study and Learn CSS 2.0 along with necessary attributes. (Self-learning exercise using this video: https://www.w3.org/TR/CSS2/)	2
2	Create a webpage to show the dinner menu for a restaurant. Use Cascading menu (using CSS2.0) to display dinner menu.	4

Part-4 (CSS 3.0) (6 Hours)

Sr No	Practical	Hours Required
1	Repeat Practical 3 of Part 2 using CSS 3.0.	6
2	Create a program that displays the short introduction about apples and bananas. Add two style rules using CSS 3.0, one that sets a color for the 'apples' class and another that sets a color for the 'bananas' class.	
3	Create a webpage that displays some famous quotes and declarations from well-known computer scientists. Add a CSS rule that makes all of the quotes have an italic font style, so they'll look more like quotes.	

Part-5 (Java Scripts & DOM) (10 Hours)

Sr No	Practical	Hours Required
1	Create JavaScript function for basic arithmetic operations (Addition, Subtraction, Multiplication and Division). Create proper design layout which asks two numbers to enter from user and display result of respective operation on clicking respective button.	2
2	Write a JavaScript which validate all controls and retrieve all possible value from controls and display from Registration form of Practical 2 of Part 2. Also manage sessions in this program using JavaScript.	6

3	Traversing the DOM: <pre> <html> <head> <title>JavaScript and the Document Object Model</title> </head> <body> <div id="page"> <div id="header"><h1 id="title">Page title</h1></div> <div id="content"> <h2>Content title</h2> <p>Some copy goes here</p> <p>More copy goes here</p> </div> </div> </body> </html> </pre> Perform following tasks using above HTML mark up: 1. Use the firstChild property to access an element. 2. Use the lastChild property to access an element. 3. Use the nextSibling property to access an element. 4. Use the previousSibling property to access an element. 5. Use the parentNode property to access an element. 6. Use the childNodes property to access a group of child elements.	2
----------	--	----------

Part-6 (BASIC JQUERY, AngularJS and NodeJS) (10 Hours)

Sr. No.	Practical	Hours Required
1	Implement following tasks using jQuery: • Sliding page elements • Hiding and Showing elements • Fading elements • Toggling elements • Stopping effects	2
2	Create a simple and interactive Login form using JQuery.	2
3	Write a JQuery code to send login information (achieved through above Practical) to the web server using AJAX and process the response.	2
4	Create a webpage to show the dinner menu for a restaurant using AngularJS.	2
5	Create Hello World program using Node.js.	2

Part-7 (BASIC PHP) (16 Hours)

Sr. No.	New Practical	Hours Required
1	Installation and configuration of WAMP/XAMPP	2
2	Study and demonstrate php syntax, data type, variable, function, array, superglobal variable and form (Self-learning exercise using this link: https://www.w3schools.com/php/).	2
3	Study and demonstrate mysqli connection and CRUD operations with php.	4
4	Create a simple registration and login system using the PHP and MySQL. This program is comprised of two parts: in the first part, create a user registration form, and in the second part we'll create a login form, as well as a welcome page and a logout script.	4
5	Install, Configure, And Troubleshoot Linux Web Server (Apache).	4
