

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

Bachelor of Physiotherapy (B.P.T)

Semester – I Examination – Dec 2011

PT103 EXERCISE THERAPY I

Date: 03.01.12, Tuesday

Time: 10.00 a.m to 10.20 a.m

Maximum Marks: 10

Instructions:

1. There are two parts in the paper. **PART –I** contains 10 Questions and **PART – II** contains 4 Questions.
2. **PART –I** should be answered in MCQ 'S question paper & **PART – II** should be answered in two separate answer books which has two sections.
3. Marks on the right side suggest the total marks of that question.
4. Maximum time allotted for **PART – I** is 20 min. Question paper for **PART – II** will be given at the table when the answer sheet for **PART – I** is returned. However, Candidates who complete **PART – I** earlier than 20 min, can collect main question paper for **PART –II** immediately after handing over the **PART-I** question paper.

PART-I

Multiple Choice Questions: (MCQs)

(10 × 1 = 10)

(Encircle the correct answer)

1. Ankle dorsiflexion / Planter flexion takes place in
 - a. Sagittal plane / Frontal axis
 - b. Transverse plane / Vertical axis
 - c. Frontal plane / Sagittal axis
 - d. Coronal plane / Horizontal axis
2. The characteristic of any starting position is
 - a. Stable
 - b. Provide space for full ROM
 - c. Comfortable
 - d. All of the above
3. Movement in Pendular suspension take place inplane.
 - a. Horizontal
 - b. Sagittal
 - c. Inclined
 - d. Frontal
4. Anterior pelvic tilt is produced by
 - a. Hip extensors / abdominals
 - b. Hip flexors / lumbar extensors
 - c. Hip adductors / trunk side flexors
 - d. None of the above
5. For group exercise maximum number of patients in a group is about.....
 - a. 3-4
 - b. 10-12
 - c. 6-8
 - d. More than 15

6. During inspiration the antero-posterior diameter of thorax is increased by.....
- Vertical excursion of diaphragm
 - Bucket handle movement
 - Pump handle movement
 - All of the above
7. Trying to catch a ball is an example ofexercise.
- Passive
 - Subjective
 - Objective
 - Assisted
8. Which of following is not a tapotement technique?
- Clapping
 - Pounding
 - Petrissage
 - Beating
9. Normal range of elbow flexion is.....
- 170°-180°
 - 140°-150°
 - 80°-90°
 - 90°-100°
10. Mitchell technique of relaxation is based on the principle of
- Autogenic inhibition
 - Cue controlled relaxation
 - Released only
 - Reciprocal relaxation

Semester – I Examination – Dec 2011

PT103 EXERCISE THERAPY I

Date: 03.01.12, Tuesday

Time: 10.20 a.m to 1.00 p.m

Maximum Marks: 60

Instructions:

1. There are two parts in the paper. **PART –I** contains 10 Questions and **PART – II** contains 4 Questions.
2. **PART –I** should be answered in MCQ 'S question paper & **PART – II** should be answered in two separate answer books which has two sections.
3. Marks on the right side suggest the total marks of that question.
4. Maximum time allotted for **PART – II** is 2 Hr 40min.
5. Draw the figure wherever necessary.

PART-II

SECTION –I

Q.1. Long Question (1 out of 2)

(1× 10= 10)

Define goniometry. Describe its principles & types of goniometer. Explain technique of measuring knee flexion range of motion.

OR

Describe classification of passive movements. Explain principles, effects and uses of relaxed passive movement.

Q.2. Write short notes on: (4 out of 5)

(4× 5 = 20)

- a. Progressive Resistance Exercise.
- b. Derived positions of Kneeling.
- c. Levers of human body.
- d. Physiological effects of exercise.
- e. Causes of restriction of joint range of motion.

SECTION –II

Q.3. Long Question (1 out of 2)

(1× 10= 10)

Define suspension. Explain it's various types, effects, indications and contra indications.

OR

Enumerate and define massage techniques and Discuss physiological effects of massage therapy.

Q.4. Write short notes on: (4 out of 5)

(4× 5 = 20)

- a. Compare and contrast individual exercises with group exercises.
- b. Write in detail about various positions of relaxation technique.
- c. Crawling exercises.
- d. Indications and contra indications of breathing exercises.
- e. Free exercises for knee joint.
