4. Maximum time allotted for **PART – I** is 20 min. Question paper for **PART – II** will be given at the table when the answer sheet for **PART – I** is returned. However, Candidates who complete **PART – I** earlier than 20 min, can collect main question paper for **PART –II** immediately after handing over the **PART-I** question paper

PART-I

Multiple Choice Questions: (MCQs) (Encircle the correct answer)

(10 × 1 = 10)

1. In our body, more number oforder levers are present.
 - a. 2nd
 - b. 3rd
 - c. 1st
 - d. 4th
2. Ankle dorsi flexion and planter flexion takes place in
 - a. Frontal plane & sagittal axis
 - b. Transverse plane & vertical axis
 - c. Saggital plane & frontal axis
 - d. Coronal plane & horizontal axis
3. In normal standing position, line of gravity passes.....the knee joint.
 - a. Lateral to
 - b. Through
 - c. Behind
 - d. In front of
4. The characteristic of any starting position is
 - a. Stable
 - b. Comfortable
 - c. Full range of motion should possible
 - d. All of the above
5. Anterior pelvic tilt is produced by.....
 - a. Hip flexors & lumbar extensors
 - b. Hip extensors & abdominals
 - c. Hip adductors & trunk side flexors
 - d. None of the above

6. The advantage of group therapy is
- Time saving for therapist
 - Builds up confidence in patients
 - Develop competition among the patients & improve the efforts
 - All of the above
7. Which of the following is not a tapotement technique?
- Petrissage
 - Beating
 - Clapping
 - Pounding
8. Normal range of motion of knee flexion is aboutdegrees.
- 0 to 170-180
 - 0 to 80-90
 - 0 to 130-145
 - 0 to 40-50
9. During inspiration, the antero-posterior diameter of thoracic cage increased by
- Bucket handle movement of lower ribs
 - Pump handle movement of upper ribs
 - Downward excursion of diaphragm
 - None of the above
10. Suspension therapy is working under the principles of
- Friction
 - Pendulum
 - Gravity eliminating movement
 - All of the above
