

CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY

University Examination

Date: 23/10/18

Day: Tuesday

Time: 10:00 am to 10:30 am

Total Marks: 20

Student's ID No.									
Student's Name: _____									
Student's Sign : _____									
Supervisor's Name : _____									
Supervisor's Sign: _____									

Answer Sheet for Multiple Choice Questions (MCQs), True or false and Match the following
Examination : BPT October 2018
Semester: [2]
Section : I
Course Code : PT155
Course Name: Exercise Therapy I

Important Instructions:

- There are two sections in the paper. **SECTION –I** contains 20 Questions and **SECTION – II** contains 3 Questions.
- **SECTION –I** should be answered in the question paper itself & **SECTION – II** should be answered in separate answer book.
- Marks on the right side suggest the total marks of that question.
- Maximum time allotted for **SECTION – I** is 30 minutes Question paper for **SECTION – II** will be given once the **SECTION – I** is completed within the stipulated time and returned. However, Candidates who complete **SECTION – I** earlier than 30 minutes can collect main question paper for **SECTION –II** immediately after handing over the **SECTION-I** question paper with answers.
- **SECTION – I** should be attached with the main answer book at the end of the examination and should be submitted to the supervisor.

SECTION-I

Multiple Choice Questions: (MCQs) (Encircle the correct answer)

(20 × 1 = 20)

1. Pulleys are used to _____
 - a. Make the work difficult
 - b. Maintain mechanical efficiency
 - c. Gain mechanical efficiency
 - d. Decrease mechanical efficiency
2. Nodding movement of head is the example of _____ order lever
 - a. 1st
 - b. 2nd
 - c. 3rd
 - d. 4th
3. Ankle DF/PF takes place in _____
 - a. Saggital plane and frontal axis
 - b. Frontal plane and saggital axis
 - c. Transverse plane and vertical axis
 - d. Coronal plane and horizontal axis

(P.T.O.)

4. Which one of the following positions requires the most action of the antigravity muscles to maintain the position?
 - a. Sitting
 - b. Standing
 - c. Hanging
 - d. Fallout lying
5. The range of motion of shoulder external rotation is _____
 - a. 60 degrees
 - b. 70 degrees
 - c. 80 degrees
 - d. 90 degrees
6. Relaxed passive movement is useful for _____
 - a. Muscle strengthening
 - b. Improve joint range of motion
 - c. Maintenance of range of motion
 - d. Improving co-ordination
7. Anterior pelvic tilt is produced by _____
 - a. Hip extensors and abdominals
 - b. Hip flexors and lumbar extensors
 - c. Hip adductors and trunk side flexors
 - d. Hip abductors and trunk side flexors
8. In shoulder ladder, to touch a mark is an example of _____
 - a. Passive exercise
 - b. Subjective free exercise
 - c. Objective free exercise
 - d. Assisted exercise
9. Limitation of physiological elbow extension is due to tension/contact of _____
 - a. Skin
 - b. Muscles
 - c. Ligament
 - d. Bone
10. Movement in pendular suspension takes place in _____ plane
 - a. Horizontal
 - b. Inclined plane
 - c. Sagittal
 - d. Frontal
11. Choose the correct statement
 - a. Inspiration in an active process
 - b. Forced Expiration is a passive process
 - c. Diaphragmatic breathing exercise involves deep inspiration and forceful expiration
 - d. Purse lip breathing is indicated in individual with respiratory paralysis
12. The measurement of axillary crutches is taken from _____
 - a. Anterior axillary fold to 20cm forward and lateral to little toe
 - b. Tip of axilla to 20cm forward and lateral to little toe
 - c. Anterior axillary fold to tip to medial malleolus
 - d. Anterior axillary fold to tip to lateral malleolus

(P.T.O.)

13. Mitchell technique of relaxation is based on principle of _____
- Reciprocal innervations
 - Autogenic inhibition
 - Cue controlled relaxation
 - Released only
14. Which of the following is the correct sequence of a three-point crutch gait?
- Both the crutches first followed by the affected limb and then the normal limb
 - Affected leg first, then the crutches followed by the normal limb
 - Non affected leg and the crutches together followed by the affected limb
 - Affected leg then the non-affected limb followed by the crutches
15. Which of the following is not a tapotement technique?
- Clapping
 - Beating
 - Pounding
 - Petrissage
16. Muscles of forced inspirations are except _____
- Scalene
 - Upper Trapezius
 - Internal oblique
 - External intercostal
17. Roll over from supine to side lying requires _____
- Flexion with rotation
 - Extension with rotation
 - Flexion with extension
 - Flexion
18. Trick movement for weak quadriceps is _____
- Hip extension by gluteus maximus, which extends the knee through IT band
 - Hip flexion by TFL, which extends the knee through IT band
 - Both A and B
 - None of the above
19. For goniometry _____ is done first
- Align the fixed arm with proximal segment
 - Align the movable arm with distal segment
 - Align the axis over the anatomical axis of the joint
 - Align the movable arm with proximal segment
20. _____ joint has got one degree of freedom
- Ankle
 - Hip
 - Shoulder
 - Wrist

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

2nd Semester of B.P.T. Examination

October 2018

PT155 Exercise Therapy I

Date: 23/10/18

Time: 10:30 am to 1:00 pm

Maximum Marks: 50

Instructions:

1. There are two Sections in the paper. **SECTION –I** contains 20 Questions and **SECTION – II** contains 3 Questions.
2. **SECTION –I** should be answered in the question paper itself & **SECTION – II** should be answered in separate answer book.
3. Marks on the right side suggest the total marks of that question.
4. Maximum time allotted for **SECTION – II** is 2 Hr 30 min.
5. Draw the figure where necessary.

SECTION-II

Q. 1. Short answers (5 out of 7) (Answer not exceeding 50 words) (5 × 2 = 10)

- a. Types of Goniometer.
- b. Shoulder wheel
- c. Girth measurement of the upper arm.
- d. Write any two abnormal gait patterns.
- e. Vertical point of suspension
- f. Mechanical advantage with appropriate example.
- g. Causes of restrictions of range of motion.

Q. 2. Short Notes (4 out of 5) (Answer not exceeding 150 words) (4 × 5 = 20)

- a. Write in detail about trick movements.
- b. Principles of goniometry
- c. Phases of gait cycle
- d. Axis and Planes
- e. Derived position of sitting

Q. 3. Essay (2 out of 3) (2 × 10 = 20)

- a. What are the goals of breathing exercises? Describe in detail about diaphragmatic breathing exercises.
- b. Define balance exercises. Write in detail about its principles. Explain various exercises to improve sitting balance.
- c. Classify massage manipulations. Explain in detail about stroking.
