

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

Bachelor of Physiotherapy (B.P.T)

Semester – III Examination – Nov 2011

PT201 KINESIOLOGY

Date: 24.11.11, Thursday

Time: 10.00 a.m to 10.20 a.m

Maximum Marks: 10

Instructions:

1. There are two parts in the paper. **PART – I** contains 10 Questions and **PART – II** contains 4 Questions.
2. **PART – I** should be answered in MCQ 'S question paper & **PART – II** should be answered in two separate answer books which has two sections.
3. Marks on the right side suggest the total marks of that question.
4. Maximum time allotted for **PART – I** is 20 min. Question paper for **PART – II** will be given at the table when the answer sheet for **PART – I** is returned. However, Candidates who complete **PART – I** earlier than 20 min, can collect main question paper for **PART – II** immediately after handing over the **PART-I** question paper.

PART-I

Multiple Choice Questions: (MCQs)
(Encircle the correct answer)

(1 × 10 = 10)

1. Abduction at the gleno-humeral joint is accomplished by the following movements of the head of the humerus.
 - a. Superior rolling & Superior sliding
 - b. Superior rolling & Inferior sliding
 - c. Inferior rolling & Superior sliding
 - d. Inferior rolling & Inferior sliding
2. In gleno-humeral joint, with regard to the shaft of the humerus and humeral condyles, the head of the humerus faces.....
 - a. Laterally, Superiorly & Anteriorly
 - b. Laterally, Superiorly & Posteriorly
 - c. Medially, Superiorly & Anteriorly
 - d. Medially, Superiorly & Posteriorly
3. The following carpals are part of the distal carpal row except
 - a. Trapezium
 - b. Triquetrum
 - c. Trapezoid
 - d. Hamate
4. In a load – deformation curve of a material or structure, the 'yield point', signifies the end of the.....
 - a. Toe region
 - b. Elastic region
 - c. Plastic region
 - d. None of the above
5. Which of the following are two-joint muscle(s)?
 - a. Rectus femoris
 - b. Sartorius
 - c. Pectineus
 - d. Both a and b

6. Runner's knee is associated with which of the following structures?
 - a. Lateral meniscus
 - b. ACL
 - c. Iliotibial band
 - d. Medial meniscus
7. Which of the following characterizes a "bow-legged" condition?
 - a. Femoral varus and tibial valgus
 - b. Femoral valgus and tibial varus
 - c. Both a and b
 - d. None of the above
8. Which of the following muscles serves to "unlock" the knee from full extension?
 - a. Plantaris
 - b. Gracilis
 - c. Popliteus
 - d. Sartorius
9. During walking, which of the following actions is combined to cause supination?
 - a. Dorsiflexion, eversion, and abduction
 - b. Dorsiflexion, inversion, and abduction
 - c. Plantar flexion, inversion, and abduction
 - d. Plantar flexion, inversion, and adduction
10. The following are temporal variables of gait except.....
 - a. Single-limb support time
 - b. Stride time
 - c. Degree of toe-out
 - d. Cadence

Bachelor of Physiotherapy (B.P.T)

Semester – III Examination – Nov 2011

PT201 KINESIOLOGY

Date: 24.11.11, Thursday

Time: 10.20 a.m to 1.00 p.m

Maximum Marks: 60

Instructions:

1. There are two parts in the paper. **PART –I** contains 10 Questions and **PART – II** contains 4 Questions.
2. **PART –I** should be answered in MCQ 'S question paper & **PART – II** should be answered in two separate answer books which has two sections.
3. Marks on the right side suggest the total marks of that question.
4. Maximum time allotted for **PART – II** is 2 Hr 40min.
5. Draw the figure wherever necessary.

PART-II SECTION –I

Q.1. Long Question (1 out of 2)

(1× 10= 10)

Describe why using a cane on the side opposite hip joint pain or weakness is more effective than using a cane on same side.

OR

Describe the Menisci of the Knee Joint, including their function, shape and their attachments.

Q.2. Write short notes on: (4 out of 5)

(4× 5 = 20)

1. Lumbopelvic rhythm.
2. Coxa Valga and Coxa Vara.
3. Locking Mechanism of Knee joint.
4. Articular surfaces of subtalar joint.
5. Plantar Arches and its functions.

SECTION –II

Q.3. Long Question (1 out of 2)

(1× 10= 10)

Describe normal human gait. Discuss the muscle work at hip joint during walking.

OR

Discuss the static and dynamic stabilization of the gleno-humeral joint.

Q.4. Write short notes on: (4 out of 5)

(4× 5 = 20)

1. Discuss the movements of elbow joint.
2. Prehension activities of hand.
3. Ballistic Movements.
4. Abnormal gaits with quadriceps paralysis.
5. Scapulo-humeral rhythm.
