

CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY

University Examination

Date: 13/04/2018 Day: Friday

Time: 10:00am to 10.30am

Total Marks: 20

Student's ID No.									
Student's Name: _____									
Student's Sign : _____									
Supervisor's Name : _____									
Supervisor's Sign: _____									

Answer Sheet for Multiple Choice Questions (MCQs), True or false and Match the following
Examination : BPT April 2018
Semester: 3rd
Section : I
Course Code : PT251
Course Name : Kinesiology

Important Instructions:

- There are two sections in the paper. **SECTION – I** contains 20 Questions and **SECTION – II** contains 3 Questions.
- **SECTION – I** should be answered in the question paper itself & **SECTION – II** should be answered in separate answer book.
- Marks on the right side suggest the total marks of that question.
- Maximum time allotted for **SECTION – I** is 30 minutes. Question paper for **SECTION – II** will be given once the **SECTION – I** is completed within the stipulated time and returned. However, Candidates who complete **SECTION – I** earlier than 30 minutes can collect main question paper for **SECTION – II** immediately after handing over the **SECTION – I** question paper with answers.
- **SECTION – I** should be attached with the main answer book at the end of the examination and should be submitted to the supervisor.

SECTION-I

Multiple Choice Questions: (MCQs) (Encircle the correct answer)

(10 × 1 = 10)

1. Tide mark is defined as.....
 - a. Junction of muscle tendon
 - b. Junction of tendon and bone
 - c. Interface between calcified and un-calcified cartilage
 - d. Interface between bone and cartilage
2. Flexion/extension for the 1st carpometacarpal joint occurs in _____.
 - a. Frontal plane
 - b. Sagittal plane
 - c. Transverse plane
 - d. Oblique plane
3. Sit up, knee bends & squats are eccentric contractions of _____.
 - a. Rectus femoris & biceps femoris
 - b. Quadriceps femoris & rectus femoris
 - c. Gluteus maximus
 - d. Iliopsoas

4. Aging causes _____.
 - a. Increased muscle strength
 - b. Increased inspiratory pressure
 - c. Increased lumbar lordosis
 - d. Increased kyphosis
5. Dorsiflexors movement is seen in _____.
 - a. Initial contact
 - b. Midstance
 - c. Heel off
 - d. Toe off
6. While climbing up stairs, gait cycle consists of _____.
 - a. 64% of stance & 36% of swing phase
 - b. 50% of stance & 50% of swing phase
 - c. 36% of stance & 64% of swing phase
 - d. 20% of stance & 80% of swing phase
7. The muscles responsible to support main muscle for movement are known as _____.
 - a. Agonist
 - b. Antagonist
 - c. Fixators
 - d. synergists
8. When the moving articular surface is convex, according to concavo-convex rule
 - a. Movement of the bone and joints occur in same direction.
 - b. Movement of the bone and joints occur in opposite direction.
 - c. Movement occur at the bone but not possible at the joint
 - d. Movement occur at the joint but not possible at the bone
9. Which order of lever is standing on toes?
 - a. First
 - b. Second
 - c. Third
 - d. Forth
10. _____ muscles do not get paralyzed in “intrinsic minus deformity”
 - a. Superficial flexors of wrist joint
 - b. Deep flexors of wrist joint
 - c. Lumbricals
 - d. common extensors of wrist joint

Identify the sentence as True or False:

(Please tick mark the answer)

(5 × 1 = 5)

True False

- | | | |
|--|--------------------------|--------------------------|
| 11. If the concave joint is moving on the stationary convex surface, the
Glide and roll occur in the same direction | ☐ | ☐ |
| 12. In a second class lever, the mechanical advantage of the lever will
Always be greater than | ☐ | ☐ |
| 13. Negative work is done during concentric contraction | ☐ | ☐ |
| 14. Dorsiflexion and Plantar flexion are the motion that occur
In the coronal plane | ☐ | ☐ |
| 15. In open chain exercises of knee joint, Femur moves on tibia | ☐ | ☐ |

(P.T.O.)

Match the following

(5 × 1 = 5)

16.	Femoral anteversion	A. 165-175° towards the body.
17.	J sign	B. minimum 10°
18.	Carrying angle	C. patella deviates laterally at full extension
19.	Coxa vara	D. less than 120°
20.	Cobb angle	E. patella deviates laterally in flexion
		F. knees and feet to turn inward
		G. 165-175° away from the body

(16 -), (17-), (18-), (19-), (20-)

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

3rd Semester of B.P.T. Examination

April 2018

PT251 Kinesiology

Date: 13/04/2018

Time: 10.30am to 1.00pm

Maximum Marks: 50

Instructions:

1. There are two Sections in the paper. **SECTION –I** contains 20 Questions and **SECTION – II** contains 3 Questions.
2. **SECTION –I** should be answered in the question paper itself **SECTION – II** should be answered in separate answer book.
3. Marks on the right side suggest the total marks of that question.
4. Maximum time allotted for **SECTION – II** is 2 Hr 30 min.
5. Draw the figure where necessary.

SECTION-II

Q.1. Short answers (5 out of 7) (Answer not exceeding 50 words)

(5 × 2 = 10)

- a. Carrying angle.
- b. List down the four characteristics of synovial joint.
- c. Passive insufficiency.
- d. Define lever with example of 3rd order lever.
- e. Diaphragm.
- f. Functions of meniscus.
- g. Write down the functional position of the wrist and hand.

Q.2. Short Notes (4 out of 5) (Answer not exceeding 150 words)

(4 × 5 = 20)

- a. Explain the injuries around the elbow joint.
- b. Locking mechanism of knee joint.
- c. Explain the Newton's law with example.
- d. Explain the load deformation curve. Draw the diagram.
- e. Explain the Scapulo -humeral rhythm.

Q.3. Essay (2 out of 3)

(2 × 10 = 20)

- a. Explain the dynamic stabilization of the glenohumeral joint.
- b. Describe the prehension.
- c. Define gait. Explain the gait cycle and abnormal gait.
