

CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY

University Examination

Date: 17/04/2018

Day: Tuesday

Time: 10:00 AM to 10:30 AM

Total Marks: 20 Marks

Student's ID No.									
Student's Name: _____									
Student's Sign : _____									
Supervisor's Name : _____									
Supervisor's Sign: _____									

Answer Sheet for Multiple Choice Questions (MCQs), True or false and Match the following
Examination : BPT - April 2018
Semester: [03]
Section : I
Course Code : PT 252
Course Name: EXERCISE THERAPY- II

Important Instructions:

- There are two sections in the paper. **SECTION –I** contains 20 Questions and **SECTION – II** contains 3 Questions.
- **SECTION –I** should be answered in the question paper itself & **SECTION – II** should be answered in separate answer book.
- Marks on the right side suggest the total marks of that question.
- Maximum time allotted for **SECTION – I** is 30 minutes Question paper for **SECTION – II** will be given once the **SECTION – I** is completed within the stipulated time and returned. However, Candidates who complete **SECTION – I** earlier than 30 minutes can collect main question paper for **SECTION –II** immediately after handing over the **SECTION-I** question paper with answers.
- **SECTION – I** should be attached with the main answer book at the end of the examination and should be submitted to the supervisor.

SECTION-I

Multiple Choice Questions: (MCQs)

(10 × 1 = 10)

(Encircle the correct answer)

1. What amount of body weight should be applied when giving cervical traction?
 - a. 1/4 of body weight
 - b. 1/3 of body weight
 - c. 1/2 of body weight
 - d. 1/7 of body weight
2. Which color code of theraband represents minimum resistance?
 - a. Yellow
 - b. Green
 - c. Red
 - d. Blue
3. Gleno-Humeral anterior glide can improve:
 - a. Extension range
 - b. Flexion range
 - c. Flexion range and internal rotation range
 - d. Extension and External range

4. Which is the characteristic of slow twitch muscle fiber?
 - a. Contract rapidly and forcefully
 - b. Fatigue more quickly
 - c. Rely on Aerobic system
 - d. Rely on Anaerobic system
5. What should be the temperature in the water for hydrotherapy?
 - a. 27-35 degree Celsius
 - b. 22-42 degree Celsius
 - c. 32-35 degree Celsius
 - d. 18-20 degree Celsius
6. Cooling down exercise is performed for the duration:
 - a. 5 to 8 minutes
 - b. 1 to 2 minutes
 - c. 12 to 14 minutes
 - d. 30 to 60 Seconds
7. Rhythmic stabilization is a _____ technique that can be implemented to increase joint stabilization?
 - a. Isometric
 - b. Isotonic
 - c. Isokinetic
 - d. Eccentric
8. Which of the following is contraindication for manual stretching?
 - a. Decreased range of motion because of adhesion'
 - b. Muscle Weakness
 - c. Muscle Shortening
 - d. Bony block to joint motion
9. The lateral segment of the right lower lobe is drained by the postural drainage technique with the patient:
 - a. Lying on left side with the foot end of the bed raised by 18 inches
 - b. Lying on right side with the foot end of the bed raised by 18 inches
 - c. Prone lying with the foot end of the bed raised by 24 inches
 - d. Semi prone lying with the foot end of the bed raised by 18 inches
10. In delorme and Watkins technique of progressive resisted exercise the RM is
 - a. Progressively increased
 - b. Progressively decreased
 - c. Kept Constant
 - d. Decided by the patient

Identify the sentence as True or False:

(Please tick mark the answer)

(5 × 1 = 5)

True False

- | | | |
|---|--------------------------|--------------------------|
| 11. Tissue high in collagen and low in PGs are designed to resist high tensile loads. | ☐ | ☐ |
| 12. Fast twitch fibers are recruited for activities requiring power. | ☐ | ☐ |
| 13. Aquatic exercise is contraindicated for initiating resistance training. | ☐ | ☐ |
| 14. The point beyond which the tissue will not return to its original shape and size is known as plastic limit. | ☐ | ☐ |
| 15. Muscle power is defined as the work produced by muscle per unit of time. | ☐ | ☐ |

(P.T.O.)

Match the following**(5 × 1 = 5)**

16.	Percussion can be given during	A. GH Caudal Glide
17.	Vibration can be given during	B. Expiration and Inspiration
18.	To increase shoulder abduction	C. Hypertrophy
19.	Increase in the individual size of muscle fiber	D. Only Inspiration
20.	Increase in the number of muscle fiber	E. Hyperplasia
		F. GH Posterior Glide
		G. Only Expiration

(16 -), (17-), (18-), (19-), (20-)

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

3rd Semester of B.P.T. Examination April 2018

PT 252 EXERCISE THERAPY- II

Date: 17/04/2018

Time: 10:30 AM TO 1:00 PM

Maximum Marks: 50

Instructions:

1. There are two Sections in the paper. **SECTION –I** contains 20 Questions and **SECTION – II** contains 3 Questions.
2. **SECTION –I** should be answered in the question paper itself & **SECTION – II** should be answered in separate answer book.
3. Marks on the right side suggest the total marks of that question.
4. Maximum time allotted for **SECTION – II** is 2 Hr 30 min.
5. Draw the figure where necessary.

SECTION-II

Q. 1. Short answers (5 out of 7) (Answer not exceeding 50 words) (5 × 2 = 10)

- a. Define the term strength and endurance.
- b. Enlist types of Equilibrium exercises.
- c. Explain Romberg test.
- d. Enlist types of spinal traction.
- e. Explain center of buoyancy.
- f. Enlist alternate techniques of assessing manual muscle testing.
- g. Explain in brief the principles of Frenkel Exercises.

Q. 2. Short Notes (4 out of 5) (Answer not exceeding 150 words) (4 × 5 = 20)

- a. Explain in brief physiological response of aerobic exercises.
- b. Explain indication, contraindication and grades of mobilization.
- c. Explain the stress- strain curve for connective tissue.
- d. Principles of exercises prescription.
- e. Write a note on indication, contraindication of spinal traction.

Q. 3. Essay (2 out of 3) (2 × 10 = 20)

- a. A 35 year old male regular in physical activity has been undergone for exercises testing. Determine the exercise heart rate for him. Explain indications of stress testing and determinants of aerobic exercises in detail. (2+2+6)
- b. Explain the principles of resistance training and explain isotonic exercises in detail with examples. (4+6)
- c. Explain D2 flexion diagonal pattern for upper limb with the use of basic procedures of proprioceptive neuromuscular facilitation (PNF) and explain the uses for the PNF.(4+6)
