

CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY

University Examination

Date: 17/10/2018

Day: Wednesday

Time: 10:00 am to 10:30 am

Total Marks: 20

Student's ID No.									
Student's Name: _____									
Student's Sign : _____									
Supervisor's Name : _____									
Supervisor's Sign: _____									

Answer Sheet for Multiple Choice Questions (MCQs), True or false and Match the following	
Examination : BPT- October 2018	
Semester: [3]	
Section : I	
Course Code : PT252	
Course Name: Exercise Therapy II	

Important Instructions:

- There are two sections in the paper. **SECTION –I** contains 20 Questions and **SECTION – II** contains 3 Questions.
- **SECTION –I** should be answered in the question paper itself & **SECTION – II** should be answered in separate answer book.
- Marks on the right side suggest the total marks of that question.
- Maximum time allotted for **SECTION – I** is 30 minutes Question paper for **SECTION – II** will be given once the **SECTION – I** is completed within the stipulated time and returned. However, Candidates who complete **SECTION – I** earlier than 30 minutes can collect main question paper for **SECTION –II** immediately after handing over the **SECTION-I** question paper with answers.
- **SECTION – I** should be attached with the main answer book at the end of the examination and should be submitted to the supervisor.

SECTION-I

Multiple Choice Questions: (MCQs)

(20 × 1 = 20)

(Encircle the correct answer)

1. Stretching is the _____
 - a. Slow and sustained forced passive movement
 - b. Sudden but controlled forced passive movement
 - c. Relaxed passive movement
 - d. Manipulation
2. In Delorme's PRE the progression of 10RM is made once in _____
 - a. Daily
 - b. Every week
 - c. Every fortnight
 - d. Every month
3. Joint mobilization is contraindicated in _____
 - a. Soft tissue tightness
 - b. Joint stiffness
 - c. Loose body inside the joint
 - d. Capsular tightness

(P.T.O.)

4. Frenkel's exercises are devised to improve co-ordination by use of sight, sound and touch in case of ataxia due to _____
 - a. Cerebellar lesion
 - b. Loss of kinesthetic sensation
 - c. Spastic paralysis
 - d. Flaccid paralysis
5. PNF was developed by _____
 - a. Kabat and Knott
 - b. Knot and Voss
 - c. Car and Shepherd
 - d. Dardiner and Hollis
6. In Thomas test position limitation of hip adduction range indicates shortening of _____
 - a. TFL
 - b. ITB
 - c. Iliopsoas
 - d. Rectus femoris
7. Leg lowering from extended knee position, quadriceps works _____
 - a. Concentrically
 - b. Eccentrically
 - c. Isometrically
 - d. Isokinetically
8. The upward movement inside the water is assisted by _____
 - a. Gravity
 - b. Buoyancy
 - c. Hydrostatic pressure
 - d. Water current
9. Sternocleidomastoid tightness is characterized by _____
 - a. Neck side flexion towards the affected side with rotation to opposite side
 - b. Neck side flexion towards the sound side with rotation to affected side
 - c. Neck side flexion and rotation towards the affected side
 - d. Neck side flexion and rotation towards the sound side
10. DOMS can be prevented by _____
 - a. Increasing the exercise duration
 - b. By rapidly progressing of exercise programme
 - c. Stretching the exercising muscle prior to exercise programme
 - d. Application of ice prior to exercise programme
11. For most of our functional activities we use _____
 - a. Toe region of collagen fibres
 - b. Elastic portion of collagen fibres
 - c. Plastic region
 - d. None of the above
12. Which is not true in case of muscle strengthening?
 - a. Cross sectional area of the muscle increases
 - b. Number of muscle fibres increases
 - c. Mitochondrial density increases
 - d. Energy sources for muscle activity increases

(P.T.O.)

13. Hopping, Skipping, Jumping are _____ form exercises
- Eccentric
 - Plyometric
 - Concentric
 - Isokinetic
14. Ballistic stretching is most helpful for _____ patients
- Geriatric
 - Neurological
 - Athletes
 - Paediatric
15. Simple objective method of muscle evaluation can be done by _____
- Manual Muscle Testing
 - 1 RM
 - Isokinetic device
 - Dynamometer
16. Traction for upper cervical spine problem should be given with the neck in _____ position
- Neutral
 - Slight Extension
 - Slight flexion
 - Side flexion
17. In roll, the surfaces are _____
- Flat
 - Congruent
 - Curved
 - Incongruent
18. Following are types of aerobic exercise training except
- Continuous
 - Circuit
 - Circuit Interval
 - Continuous Interval
19. In postural drainage, 45 degree head down is done in _____
- Lower lobes anterior segment
 - Lower lobe superior segment
 - Upper lobe anterior segment
 - Upper lobe posterior segment
20. Mckenzie Technique was developed by _____
- Brian Mulligan
 - Robin Mckenzie
 - Albert Mckenzie
 - Williams

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

3rd Semester of B.P.T. Examination

October 2018

PT252 Exercise Therapy II

Date: 17/10/2018

Time: 10:30 am to 1:00pm

Maximum Marks: 50

Instructions:

1. There are two Sections in the paper. **SECTION –I** contains 20 Questions and **SECTION – II** contains 3 Questions.
2. **SECTION –I** should be answered in the question paper itself & **SECTION – II** should be answered in separate answer book.
3. Marks on the right side suggest the total marks of that question.
4. Maximum time allotted for **SECTION – II** is 2 Hr 30 min.
5. Draw the figure where necessary.

SECTION-II

Q. 1. Short answers (5 out of 7) (Answer not exceeding 50 words) (5 × 2 = 10)

- a. Concave-Convex rule
- b. Closed chain exercises
- c. MRC grading of muscle strength
- d. Rhythmic stabilization
- e. FITT principle
- f. Tightness and Contracture
- g. Active insufficiency

Q. 2. Short Notes (4 out of 5) (Answer not exceeding 150 words) (4 × 5 = 20)

- a. Principles governing PNF
- b. Advantages of aerobic exercises
- c. Stress – Strain Curve
- d. Frenkel's Exercises
- e. Principles of Stretching

Q. 3. Essay (2 out of 3) (2 × 10 = 20)

- a. What are progressive resisted exercises? Explain the types of progressive resisted exercises with appropriate examples.
- b. List out the causes of restriction of joint range of motion. Write about the techniques of mobilization of joints with indications and contraindications.
- c. Test for tightness of hip flexor. Describe the methods of stretching of the hip flexors in different positions.
