

CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY

University Examination

Date: 12-11-2019 Day: TUESDAY

Time: 10:00 AM to 10:30 AM

Total Marks: 20

Student's ID No.									
Student's Name: _____									
Student's Sign : _____									
Supervisor's Name : _____									
Supervisor's Sign: _____									

Answer Sheet for Multiple Choice Questions (MCQs).	
Examination : BPT- November 2019	
Semester: [3 rd]	
Section : I	
Course Code : PT252	
Course Name: EXERCISE THERAPY II	

Important Instructions:

- There are two sections in the paper. **SECTION –I** contains 20 Questions and **SECTION – II** contains 3 Questions.
- **SECTION –I** should be answered in the question paper itself & **SECTION – II** should be answered in separate answer book.
- Marks on the right side suggest the total marks of that question.
- Maximum time allotted for **SECTION – I** is 30 minutes Question paper for **SECTION – II** will be given once the **SECTION – I** is completed within the stipulated time and returned. However, Candidates who complete **SECTION – I** earlier than 30 minutes can collect main question paper for **SECTION –II** immediately after handing over the **SECTION-I** question paper with answers.
- **SECTION – I** should be attached with the main answer book at the end of the examination and should be submitted to the supervisor.

SECTION-I

Multiple Choice Questions: (MCQs)
(Encircle the correct answer)

(20 × 1 = 20)

1. Traction for the upper cervical spine problem should be given with neck in _____ position.
 - a. Neutral
 - b. Slight Extension
 - c. Slight flexion
 - d. Rotation
2. Frenkel's exercises are devised to improve co-ordination by use of sight, sound and touch in case of ataxia due to _____.
 - a. Rigidity
 - b. Loss of kinesthetic sense
 - c. Flaccid paralysis
 - d. Spastic paralysis

3. While checking MMT for Scapular adduction, trapezius middle fibres are substituted by _____.
 - a. Anterior deltoid
 - b. Posterior deltoid
 - c. Triceps
 - d. Middle deltoid
4. Which of the following technique of PNF is based on Sherrington's principle of successive induction.
 - a. Rhythmic Stabilization
 - b. Hold relax
 - c. Rhythmic initiation
 - d. Slow reversals
5. Following are the indications for use of stretching intervention except _____.
 - a. Bony Block
 - b. Limited ROM
 - c. Shortening of opposing tissues
 - d. Functional Deformities
6. _____ is the ability to move a single joint or series of joints smoothly and easily through an unrestricted, pain free range of motion.
 - a. Flexibility
 - b. Mobility
 - c. Hypomobility
 - d. Hypermobility
7. One of the following is not a dynamic balance test.
 - a. Pull Test
 - b. Stork stand test
 - c. Functional reach test
 - d. Foam Test
8. Which of the following helps in bone mineralization?
 - a. Non weight bearing Aerobic training
 - b. Weight bearing resistance training
 - c. Weight bearing aerobic conditioning
 - d. Resistance training
9. Foot supination takes place during _____phase of gait cycle.
 - a. Heel strike to foot flat
 - b. Foot flat to mid stance
 - c. Mid stance to heel up
 - d. Heel up to toe up

10. Plyometric training is given for the young active individuals during the late phase of rehabilitation which refers to _____.
a. Stretch-shortening drill
b. Multi angle resisted training
c. Isokinetic training
d. Concentric-eccentric exercise
11. The end feel of loose body inside the joint is _____.
a. Elastic
b. Hard
c. Leathery
d. Springy rebound
12. In any exercise programme for 1 MET increase of exercise level systolic blood pressure rises by _____.
a. 5-7 mmHg
b. 12-15 mmHg
c. 10-12 mmHg
d. 7-10 mmHg
13. Which of the following properties of water helps a patient with lower extremity muscle weakness to stand inside hydrotherapy pool, which otherwise cannot stand?
a. Hydrostatic pressure
b. Temperature of water
c. Buoyancy
d. Specific gravity
14. Treatment plane of radio carpal joint during wrist flexion is _____.
a. Lunate and triquetrum
b. Scaphoid and lunate
c. Distal radius
d. Lunate
15. When there is permanent deformation with a load of low magnitude and long duration in the elastic range it is known as _____.
a. Reaching elastic limit
b. Fatigue failure
c. Ultimate strength
d. Creep
16. BRIME is
a. Best Regular Isometric Exercise
b. Brief Resisted Isometric Exercises
c. Best Resisted Isotonic Exercises
d. Brief Resisted Isotonic Exercises

17. One of the following factor which has effect on heart rate in hydrotherapy
- a. Temperature of water
 - b. Buoyancy of water
 - c. Specific gravity
 - d. Depth of pool
18. The serratus anterior never can be graded higher than the grade given to_____
- a. Shoulder abduction
 - b. Shoulder flexion
 - c. Shoulder extension
 - d. Shoulder horizontal abduction
19. _____ is the most important variable to improve muscle force generation capacity.
- a. Sets
 - b. Load
 - c. Duration
 - d. Frequency
20. SAID Principle is
- a. Specific Adaptation to Imposed Demands
 - b. Specific Adaptation to Increased Demands
 - c. Smart Adaptation to Increased Demands
 - d. Short Adaptation to Imposed Demands

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

3rd Semester of B.P.T. Examination

October 2019

PT252 Exercise Therapy II

Date: 12-11-2019

Time: 10:30 a.m. To 1:00 p.m

Maximum Marks: 50

Instructions:

1. There are two Sections in the paper. **SECTION –I** contains 20 Questions and **SECTION – II** contains 3 Questions.
2. **SECTION –I** should be answered in the question paper itself & **SECTION – II** should be answered in separate answer book.
3. Marks on the right side suggest the total marks of that question.
4. Maximum time allotted for **SECTION – II** is 2hr 30 min.
5. Draw the figure where necessary.

SECTION-II

Q. 1. Short answers (5 out of 7) (Answer not exceeding 50 words)

(5 × 2 = 10)

- a. Buoyancy and its uses.
- b. Cyclic stretching.
- c. Scapulohumeral rhythm.
- d. Open v/s closed kinematic chain exercises.
- e. Kaltenborn grading for joint distraction.
- f. Reversibility principle.
- g. Precautions during balance exercises.

Q. 2. Short Notes (4 out of 5) (Answer not exceeding 150 words)

(4 × 5 = 20)

- a. Write about Neurophysiological properties of contractile tissue.
- b. Write down the Therapeutic Effects of Aquatic Therapy.
- c. Indications, contraindications and limitation of Mechanical Traction.
- d. Explain any two scales to classify grade of Manual Muscle Testing.
- e. Explain Physiological basis for maintenance of Balance.

Q. 3. Essay (2 out of 3)

(2 × 10 = 20)

- a. Define Stretching. Explain the determinants of stretching intervention in detail.
- b. Describe the McKenzie method in detail and classify its syndromes.
- c. Explain the stress strain curve in detail. What is the effect of time and load on tissue deformation?
