

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

Bachelor of Physiotherapy (B.P.T)

Semester – IV Examination – DEC 2011

PT207 EXERCISE THERAPY II

Date: 05.12.11, Monday

Time: 10.00 a.m to 10.20 a.m

Maximum Marks: 10

Instructions:

1. There are two parts in the paper. **PART –I** contains 10 Questions and **PART – II** contains 4 Questions.
2. **PART –I** should be answered in MCQ 'S question paper & **PART – II** should be answered in two separate answer books which has two sections.
3. Marks on the right side suggest the total marks of that question.
4. Maximum time allotted for **PART – I** is 20 min. Question paper for **PART – II** will be given at the table when the answer sheet for **PART – I** is returned. However, Candidates who complete **PART – I** earlier than 20 min, can collect main question paper for **PART –II** immediately after handing over the **PART-I** question paper.

PART-I

Multiple Choice Questions: (MCQs)

(1 × 10 = 10)

(Encircle the correct answer)

1. Progression of Frenkel's exercise is made by alteration of
 - a. Speed – Quick to slow.
 - b. Range – wider to smaller.
 - c. Complexity of exercise.
 - d. All of the above.
2. In PNF, knee flexion is a component of
 - a. Flexion - Abduction – External Rotation.
 - b. Flexion – Adduction – External Rotation.
 - c. Extension – Adduction – Internal Rotation.
 - d. Extension – Abduction – External Rotation.
3. Person with unilateral Hip problem leans to the affected side & advised to use a walking stick. On which side he should use the stick?
 - a. Affected Side.
 - b. Sound Side.
 - c. Either Side.
 - d. Single stick is not useful.
4. Sternocleidomastoid tightness is characterized by deformity.
 - a. Neck sideflexion towards the affected side with rotation to opposite side.
 - b. Neck sideflexion towards the sound side with rotation to affected side.
 - c. Neck sideflexion & rotation towards the affected side.
 - d. Neck sideflexion & rotation towards the sound side.
5. Hip Abduction for grade 3 is tested in side lying on sound side. For Gluteus minimus hip abduction is done in position.
 - a. Neutral.
 - b. Flexion.
 - c. Extension.
 - d. External Rotation.

6. What should be the progression of exercise protocol following musculoskeletal injury?
- Isometric – Concentric – Concentric & Eccentric.
 - Concentric – Eccentric – Concentric & Eccentric.
 - Isometric – Eccentric – Concentric.
 - Isometric – Concentric – Eccentric.
7. Cadence is the no. of steps per minute. Which is equal to in normal human locomotion.
- 70 – 90.
 - 90 – 110.
 - 90 – 130.
 - 70 – 130.
8. Stiff knee gait is characterized by gait.
- Lurching.
 - Hip hikes.
 - Hand to knee.
 - Steppage.
9. Traction for upper cervical spine problem should be given with the neck in position.
- Neutral.
 - Side flexion.
 - Slight extension.
 - Slight flexion.
10. When concave surface moves over the convex
- Gliding & rolling occurs in direction of movement.
 - Gliding occurs in direction of movement & Rolling in opposite direction.
 - Rolling occurs in direction of movement & Gliding in opposite direction.
 - Gliding & rolling occurs in opposite direction of movement.

Bachelor of Physiotherapy (B.P.T)

Semester – IV Examination – DEC 2011

PT207 EXERCISE THERAPY II

Date: 05.12.11, Monday

Time: 10.20 a.m to 1.00 p.m

Maximum Marks: 60

Instructions:

1. There are two parts in the paper. **PART –I** contains 10 Questions and **PART – II** contains 4 Questions.
2. **PART –I** should be answered in MCQ 'S question paper & **PART – II** should be answered in two separate answer books which has two sections.
3. Marks on the right side suggest the total marks of that question.
4. Maximum time allotted for **PART – II** is 2 Hr 40min.
5. Draw the figure wherever necessary.

PART-II

SECTION –I

Q.1. Long Question (1 out of 2)

(1× 10= 10)

Explain different grades of Maitland mobilization with its effects & uses. Discuss management for shoulder pain with the same.

OR

Explain interpretation of stress-strain curve & its clinical applications.

Q.2. Write short notes on: (4 out of 5)

(4× 5 = 20)

1. Types of Contracture.
2. Closed Kinematic Vs Open Kinematic chain exercise.
3. Delorme's Progressive resistance exercise.
4. Stretching of Rectus femoris & Hamstring.
5. Effects of Spinal Traction.

SECTION –II

Q.3. Long Question (1 out of 2)

(1× 10= 10)

Explain fundamental principles of Manual Muscle Testing. Describe MMT for Triceps.

OR

Explain in detail about basic principles of PNF (Proprioceptive Neuromuscular Facilitation).

Q.4. Write short notes on: (4 out of 5)

(4× 5 = 20)

1. Frenkel's Exercise.
2. Physiological response to aerobic exercise.
3. Rhythmic stabilization technique of PNF.
4. Different types of Crutches.
5. Techniques of postural Re-education.
