4. Maximum time allotted for **PART – I** is 20 min. Question paper for **PART – II** will be given at the table when the answer sheet for **PART – I** is returned. However, Candidates who complete **PART – I** earlier than 20 min, can collect main question paper for **PART – II** immediately after handing over the **PART-I** question paper.

PART-I

Multiple Choice Questions: (MCQs)

(10 × 1 = 10)

(Encircle the correct answer)

1. Mechanically the assistance / resistance are most effective when it acts at _____.
 - a. Acute angle
 - b. Obtuse angle
 - c. Right angle
 - d. Zero degree
2. Relaxed passive movement is useful for _____.
 - a. Muscle strengthening
 - b. Improving joint range of motion.
 - c. Remembrance of pattern of movement
 - d. Improving coordination
3. Rhythmic initiation technique is used for _____.
 - a. Tightness
 - b. Flaccid paralysis
 - c. Cerebellar ataxia
 - d. Parkinsonism
4. Sternocleidomastoid tightness is characterised by _____ deformity.
 - a. Neck side flexion towards the affected side with rotation to opposite side
 - b. Neck side flexion towards the sound side with rotation to affected side
 - c. Neck side flexion and rotation towards the affected side
 - d. Neck side flexion and rotation towards the sound side
5. Stretching is the _____.
 - a. Slow and sustained forced passive movement
 - b. Sudden but controlled forced passive movement
 - c. Relaxed passive movement
 - d. Manipulation

6. Ballistic stretching is helpful for _____
- Musculoskeletal patients
 - Neurological patients
 - Athletes
 - None of the above
7. Poor posture _____
- Energy Consuming, so gives rise to early fatigue
 - Looks aesthetically ugly
 - Gives rise to painful musculoskeletal problems
 - All of the above
8. The correct sequence of stair climbing with a pair of axillary crutches is _____.
- Crutches, affected leg, sound leg
 - Crutches, sound leg, affected leg
 - Sound leg, affected leg, crutches
 - Affected leg, sound leg, crutches
9. In slow stretching _____
- GTO fires
 - Muscle spindle fires
 - Monosynaptic stretch reflex initiated
 - None of the above
10. In which of the following, PRE regimens the load remains constant during the training session _____.
- De Lorme
 - Watkin
 - Zinovief
 - McQueen

Semester – IV Examination – APRIL 2012

PT207 EXERCISE THERAPY II

Date: 4.05.12, Friday

Time: 10.20a.m to 1.00 p.m

Maximum Marks: 60

Instructions:

1. There are two parts in the paper. **PART –I** contains 10 Questions and **PART – II** contains 4 Questions.
2. **PART –I** should be answered in MCQ 'S question paper & **PART – II** should be answered in two separate answer books which has two sections.
3. Marks on the right side suggest the total marks of that question.
4. Maximum time allotted for **PART – II** is 2 Hr 40min.
5. Draw the figure wherever necessary.

PART-II

SECTION –I

Q.1. Long Question (1 out of 2)

(1× 10= 10)

Define MMT. Describe fundamental principles of MMT.

OR

Define PRE. Describe fundamental principles of resistance exercises.

Q.2. Write short notes on: (4 out of 5)

(4× 5 = 20)

- a. Precautions in Stretching.
- b. Frenkel's Exercise.
- c. De Lorme's regimen.
- d. Maitland's Grades of mobilization.
- e. Effects of traction.

SECTION –II

Q.3. Long Question (1 out of 2)

(1× 10= 10)

Discuss the Basic neurophysiologic principles of PNF.

OR

Define Aerobic exercises. Explain the physiological effects of aerobic exercises.

Q.4. Write short notes on: (4 out of 5)

(4× 5 = 20)

- a. Concave Convex rule.
- b. Limb length measurement.
- c. Open and closed chain exercise.
- d. Postural mechanism.
- e. Determinants of Stretching.
