

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

Bachelor of Physiotherapy (B.P.T)

Semester – V Examination – MAY 2012

PT301 ELECTROTHERAPY II

Date: 10/05/12, Thursday

Time: 10.00a.m to 10.20a.m

Maximum Marks: 10

Instructions:

1. There are two parts in the paper. PART –I contains 10 Questions and PART – II contains 4 Questions.
2. PART –I should be answered in MCQ 'S question paper & PART – II should be answered in two separate answer books which has two sections.
3. Marks on the right side suggest the total marks of that question.
4. Maximum time allotted for PART – I is 20 min. Question paper for PART – II will be given at the table when the answer sheet for PART – I is returned. However, Candidates who complete PART – I earlier than 20 min, can collect main question paper for PART –II immediately after handing over the PART-I question paper.

PART-I

Multiple Choice Questions: (MCQs)

(10 × 1 = 10)

(Encircle the correct answer)

1. In Iontophoresis charged ions are placed under _____
 - a. Electrodes of same charge
 - b. Electrodes of opposite charge
 - c. Both the electrodes
 - d. None of the above
2. TENS is contraindicated in the region of _____
 - a. Cardiac pacemaker
 - b. Carotid sinus
 - c. Hearing Aids
 - d. All of the above
3. The most comfortable form of current that can be used for stimulation is _____
 - a. Interferential Currents
 - b. Premodulated Currents
 - c. Russian Currents
 - d. All of the above
4. As the frequency of current used increases, the impedance offered by the skin _____
 - a. Increases
 - b. Decreases
 - c. Remains Unaltered
 - d. Initially decreases & later gets accommodated
5. _____ is the effective method used for the treatment of extremities.
 - a. Ice towels
 - b. Cold immersion
 - c. Ice packs
 - d. Ice cube massage

6. Short duration impulses are impulses with duration of _____
- Less than 1 ms
 - Less than 10 ms
 - Less than 0.1 ms
 - Less than 0.3 ms
7. Resting nerve is _____
- Negative outside and positive inside
 - Positive outside and negative inside
 - Depends on the body temperature
 - None of the above
8. Frequency of faradic type current is _____
- 30 Hz
 - 30-50 Hz
 - 50-100 Hz
 - More than 100 Hz
9. The Rheobase in denervated muscle is _____
- Unchanged
 - Increased
 - Decreased
 - First increases and then decreases
10. Which electrodes are used for more accurate EMG?
- Surface electrodes
 - Needle electrode
 - Both (a) & (b)
 - None of the above

CHAROTAR UNIVERSITY OF SCI. & TECHNOLOGY CHARUSAT CAMPUS CHANGA

Sr. Supervisor's Sign.	

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

Bachelor of Physiotherapy (B.P.T)

Semester – V Examination – MAY 2012

PT301 ELECTROTHERAPY II

Date: 10/05/12, Thursday

Time: 10.20a.m to 1.00p.m

Maximum Marks: 60

Instructions:

1. There are two parts in the paper. PART –I contains 10 Questions and PART – II contains 4 Questions.
2. PART –I should be answered in MCQ 'S question paper & PART – II should be answered in two separate answer books which has two sections.
3. Marks on the right side suggest the total marks of that question.
4. Maximum time allotted for PART – II is 2 Hr 40min.
5. Draw the figure wherever necessary.

PART-II

SECTION –I

Q.1. Long Question (1 out of 2)

(1× 10= 10)

Explain in detail about strength-duration curve with description of Apparatus required, method of obtaining and characteristics of the curve in normal, denervated and partial denervated muscles.

OR

Write in detail about Faradic type current and explain about physiological effects and indication of the same.

Q.2. Write short notes on: (4 out of 5)

(4× 5 = 20)

- a. Faradism under pressure
- b. Nerve Conduction Velocity
- c. Biofeedback
- d. Propagation of Action potential
- e. Compare EMG picture in Neuropathy and Myopathy conditions

SECTION –II

Q.3. Long Question (1 out of 2)

(1× 10= 10)

Define Interferential Current. Write in detail about its therapeutic effects. Describe techniques for treating a patient with backache radiating to left lower limb.

OR

Pain Gate Theory.

Q.4. Write short notes on: (4 out of 5)

(4× 5 = 20)

- a. Combination Therapy
- b. Iontophoresis
- c. Physiological Effects & uses of Cryotherapy
- d. Russian Current
- e. Types of TENS
