

CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY

University Examination

Date: 02/05/2018

Day: Wednesday

Time: 10 AM to 10:30 AM

Total Marks: 20

Student's ID No.									
Student's Name: _____									
Student's Sign : _____									
Supervisor's Name : _____									
Supervisor's Sign: _____									

Answer Sheet for Multiple Choice Questions (MCQs), True or false and Match the following
Examination : BPT - May 2018
Semester: 5
Section : I
Course Code : PT302.01
Course Name: Clinical Orthopaedics

Important Instructions:

- There are two sections in the paper. **SECTION –I** contains 20 Questions and **SECTION – II** contains 3 Questions.
- **SECTION –I** should be answered in the question paper itself & **SECTION – II** should be answered in separate answer book.
- Marks on the right side suggest the total marks of that question.
- Maximum time allotted for **SECTION – I** is 30 minutes. Question paper for **SECTION – II** will be given once the **SECTION – I** is completed within the stipulated time and returned. However, Candidates who complete **SECTION – I** earlier than 30 minutes can collect main question paper for **SECTION –II** immediately after handing over the **SECTION-I** question paper with answers.
- **SECTION – I** should be attached with the main answer book at the end of the examination and should be submitted to the supervisor.

SECTION-I

Multiple Choice Questions: (MCQs) (Encircle the correct answer)

(10 × 1 = 10)

1. Burst fracture is seen in
 - a. Talus fracture
 - b. Vertebral fracture
 - c. Femoral head fracture
 - d. Scaphoid
2. External fixation is used for
 - a. Fracture with severe soft tissue injury involving skin and blood vessels
 - b. Unstable fracture
 - c. Pathological fracture
 - d. Multiple fracture
3. Drop arm test indicates
 - a. Weakness of deltoid
 - b. Rupture of supraspinatus
 - c. Positive painful arc
 - d. Frozen shoulder

4. Fracture shaft humerus is associated with
 - a. Axillary nerve injury
 - b. Radial nerve injury
 - c. Brachial nerve injury
 - d. Median nerve injury
5. Neurovascular deficits are common complications of fracture_____of femur.
 - a. Shaft
 - b. Supracondylar
 - c. Trochanter
 - d. Condyles
6. Usually the direction of elbow dislocation is
 - a. Backward
 - b. Backward and lateral
 - c. Backward and medial
 - d. Forward
7. Avascular necrosis of scaphoid fracture occurs at
 - a. Proximal half
 - b. Distal half
 - c. Whole bones
 - d. Articulating surface
8. Most common cause for lower limb amputations is
 - a. Congenital deformities
 - b. Infection
 - c. Trauma
 - d. Vascular disease
9. Myositis ossification is most common around the_____ joint.
 - a. Knee
 - b. Elbow
 - c. Wrist
 - d. Hip
10. Duga's test is helpful in
 - a. Dislocation of hip
 - b. Scaphoid fracture
 - c. Fracture neck of femur
 - d. Anterior dislocation of shoulder

Identify the sentence as True or False:

(Please tick mark the answer)

(5 × 1 = 5)

True False

11. The function of meniscus is shock absorber.
12. The most common cause of non-union is ischaemia.
13. Galeazzi fracture is fracture of lower end of ulna.
14. Avulsion fracture of extensor tendon of distal phalanx called as a mallet finger.
15. Commonest dislocation of hip is posterior.

☐	☐

☐	☐
☐	☐
☐	☐

(P.T.O.)

Match the following**(5 × 1 = 5)**

16.	Volkmann's contracture	A. Complication of fracture neck of femur
17.	Fat embolic syndrome	B. Amputation
18.	Nerve injury	C. Often associated with supracondylar fracture of humerus
19.	Non union	D. Common in fracture tibia
20.	Phantom pain	E. Complication of fracture of humerus
		F. Common in talus fracture
		G. Spine fracture

(16 -), (17-), (18-), (19-), (20-)

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

5th Semester of B.P.T. Examination

May 2018

PT 302.01: Clinical Orthopaedics

Date: 02/05/2018

Time: 10:30AM TO 1:00PM

Maximum Marks: 50

Instructions:

1. There are two Sections in the paper. **SECTION –I** contains 20 Questions and **SECTION – II** contains 3 Questions.
2. **SECTION –I** should be answered in the question paper itself & **SECTION – II** should be answered in separate answer book.
3. Marks on the right side suggest the total marks of that question.
4. Maximum time allotted for **SECTION – II** is 2 Hr 30 min.
5. Draw the figure where necessary.

SECTION-II

Q.1. Short answers (5 out of 7) (Answer not exceeding 50 words) (5 × 2 = 10)

- a. Define green stick fracture.
- b. Define colles fracture.
- c. Any four complication of cervical spine fracture.
- d. Define scoliosis.
- e. Define Charcot joint.
- f. Explain Barlow maneuver.
- g. Dequervain's tenosynovitis.

Q.2. Short Notes (4 out of 5) (Answer not exceeding 150 words) (4 × 5 = 20)

- a. Write down the complications of supracondylar fracture of humerus in children.
- b. Write a note on methods of measurement of scoliosis.
- c. Clinical features of congenital dislocation of hip.
- d. What is hangman's fracture? Write classification systems of Levine and Edwards for the same.
- e. Write management of dislocation of patella.

Q.3. Essay (2 out of 3) (2 × 10 = 20)

- a. 60 years old female had fall in bathroom and diagnosed as neck of femur fracture. Write classification, clinical features, findings in radiograph and management for the same.
- b. Write down the mechanism of injury, clinical feature, complications and conservative management of anterior dislocation of shoulder.
- c. Define amputation. What are the different levels of upper limb amputation? Write down complications of amputation in detail. (2+3+5)
