

CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY

University Examination

Date: 01/05/2018

Day: Tuesday

Time: 10:00am to 10:30am

Total Marks: 20

Student's ID No.									
Student's Name: _____									
Student's Sign : _____									
Supervisor's Name : _____									
Supervisor's Sign: _____									

Answer Sheet for Multiple Choice Questions (MCQs), True or false and Match the following
Examination : BPT- May 2018
Semester: 5 th
Section : I
Course Code : PT303.01
Course Name : Clinical Neurology and Neurosurgery

Important Instructions:

- There are two sections in the paper. **SECTION –I** contains 20 Questions and **SECTION – II** contains 3 Questions.
- **SECTION –I** should be answered in the question paper itself & **SECTION – II** should be answered in separate answer book.
- Marks on the right side suggest the total marks of that question.
- Maximum time allotted for **SECTION – I** is 30 minutes. Question paper for **SECTION – II** will be given once the **SECTION – I** is completed within the stipulated time and returned. However, Candidates who complete **SECTION – I** earlier than 30 minutes can collect main question paper for **SECTION –II** immediately after handing over the **SECTION-I** question paper with answers.
- **SECTION – I** should be attached with the main answer book at the end of the examination and should be submitted to the supervisor.

SECTION-I

Multiple Choice Questions: (MCQs) (Encircle the correct answer)

(10 × 1 = 10)

1. 'Sun-set' sign is a feature of
 - a. Down's syndrome
 - b. Hydrocephalus
 - c. Cerebral palsy
 - d. Bulbar palsy
2. Gower's sign is observed in
 - a. Primary lateral sclerosis
 - b. Amyotrophic lateral sclerosis
 - c. Duchenne muscular dystrophy
 - d. Progressive bulbar palsy
3. Formation of cavity in physiological route of CSF circulation is known as
 - a. Subacute combined cord degeneration
 - b. Myasthenia gravis
 - c. Transverse myelitis
 - d. Syringomyelia

4. Impairments related to UMN pathology
 - a. Hyporeflexia, hypotonicity, cramps, fasciculations
 - b. Spasticity, pathological reflexes, hyperreflexia
 - c. Dysphagia, sialorrhea, pseudobulbar effect
 - d. Glove-and-stocking sensory loss
5. Thalamotomy is a surgical procedure used to treat _____.
 - a. Parkinson's disease
 - b. Cerebellar ataxia
 - c. Stroke
 - d. Diabetes mellitus
6. Wrist drop is a characteristic of
 - a. Radial nerve palsy
 - b. Ulnar nerve palsy
 - c. Median nerve palsy
 - d. Musculocutaneous nerve palsy
7. The following cranial nerve is responsible for smell sensations
 - a. Optic
 - b. Oculomotor
 - c. Olfactory
 - d. Trigeminal
8. The ability to walk along a straight line is most often impaired with
 - a. Cerebellar dysfunction
 - b. Parietal lobe damage
 - c. Temporal lobe damage
 - d. Brainstem damage
9. Babinski sign can be defined as
 - a. Flexion of toes
 - b. Extension of toes
 - c. Dorsiflexion of ankle
 - d. Extension of great toe and fanning of other toes
10. High bilirubin levels in the body are associated with
 - a. Athetoid CP
 - b. Spastic CP
 - c. Hypotonic CP
 - d. Ataxic CP

Identify the sentence as True or False:

(Please tick mark the answer)

(5 × 1 = 5)

11. Myasthenia gravis is characterized by ptosis and easy fatigability.
12. Decerebrate rigidity is characterized by extension of both upper limbs both lower limbs.
13. Clavicle rib is common cause of Thoracic outlet syndrome.
14. Stereognosis is a deep sensation.
15. Knee jerk innervation is L2,L3.

True	False
☐	☐
☐	☐
☐	☐
☐	☐
☐	☐

(P.T.O.)

Match the following

(5 × 1 = 5)

16.	Trigeminal nerve	A. 7 th cranial nerve
17.	Oculomotor nerve	B. 1 st cranial nerve
18.	Vestibulocochlear nerve	C. 4 th cranial nerve
19.	Facial nerve	D. 5 th cranial nerve
20.	Glossopharyngeal nerve	E. 8 th cranial nerve
		F. 3 rd cranial nerve
		G. 9 th cranial nerve

(16 -), (17-), (18-), (19-), (20-)

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

Fifth Semester of B.P.T. Examination

May 2018

PT303.01 Clinical Neurology and Neurosurgery

Date: 01/05/2018

Time: 10:30am to 01:00pm

Maximum Marks: 50

Instructions:

1. There are two Sections in the paper. **SECTION –I** contains 20 Questions and **SECTION – II** contains 3 Questions.
2. **SECTION –I** should be answered in the question paper itself & **SECTION – II** should be answered in separate answer book.
3. Marks on the right side suggest the total marks of that question.
4. Maximum time allotted for **SECTION – II** is 2 Hr 30 min.
5. Draw the figure where necessary.

SECTION-II

Q. 1. Short answers (5 out of 7) (Answer not exceeding 50 words) (5 × 2 = 10)

- a. Use and interpretation of Glasgow coma scale.
- b. Define Transient Ischemic Attack.
- c. Enlist the cardinal features of Parkinson's disease.
- d. Define Lhermitte's sign and Uthoff's sign.
- e. Define cerebral palsy.
- f. Enlist types of memory.
- g. List the lobes of brain.

Q. 2. Short Notes (4 out of 5) (Answer not exceeding 150 words) (4 × 5 = 20)

- a. Clinical features of diabetic neuropathy (motor and sensory).
- b. Physical examination tests and blood test for Myasthenia Gravis.
- c. Foot care in Diabetic Neuropathy.
- d. Clinical features of Trigeminal neuralgia.
- e. Name the superficial, deep and combined cortical sensations.

Q. 3. Essay (2 out of 3) (2 × 10 = 20)

- a. A patient complaints of weakness in right upper and lower limb (upper limb > lower limb), difficulty in speaking and facial deviation. Diagnose the condition. Describe the risk factors, clinical features and medical management of the condition. (1+3+3+3)
- b. Define Guillian Barre syndrome. Explain its pathology, clinical features, investigations and medical management in detail. (1+2+3+2+2)
- c. Bell's palsy: Definition, etiology, signs and symptoms, management. (1+2+4+3)
