| Supervisor's Sign: _____  |  |  |  |  |  |  |  |  |  |

|                                                                                          |
|------------------------------------------------------------------------------------------|
| Answer Sheet for Multiple Choice Questions (MCQs), True or false and Match the following |
| Examination : BPT- May 2018                                                              |
| Semester: 6                                                                              |
| Section : I                                                                              |
| Course Code : PT307.01                                                                   |
| Course Name: Clinical cardiorespiratory conditions                                       |

### Important Instructions:

- There are two sections in the paper. **SECTION – I** contains 20 Questions and **SECTION – II** contains 3 Questions.
- **SECTION – I** should be answered in the question paper itself & **SECTION – II** should be answered in separate answer book.
- Marks on the right side suggest the total marks of that question.
- Maximum time allotted for **SECTION – I** is 30 minutes. Question paper for **SECTION – II** will be given once the **SECTION – I** is completed within the stipulated time and returned. However, Candidates who complete **SECTION – I** earlier than 30 minutes can collect main question paper for **SECTION – II** immediately after handing over the **SECTION – I** question paper with answers.
- **SECTION – I** should be attached with the main answer book at the end of the examination and should be submitted to the supervisor.

### SECTION-I

#### Multiple Choice Questions: (MCQs) (Encircle the correct answer)

(10 × 1 = 10)

1. What is lobectomy?
  - a. Removal of Pleura
  - b. Removal of a broncho-pulmonary segment
  - c. Removal of a lung
  - d. Removal of lobe of the lung
2. Which condition results into discoloration of the fingers and/or toes after exposure to the changes in temperature or emotional events?
  - a. Lymphedema
  - b. Atherosclerosis
  - c. Raynaud's disease
  - d. DVT

(P.T.O.)

3. Which of the following is not a type of Hypoxia?
  - a. Hypoxic
  - b. Stagnant
  - c. Anemic
  - d. Histologic
4. Which of the following is not an occupational lung disease?
  - a. Silicosis
  - b. Asbestosis
  - c. Pneumonia
  - d. Pneumoconiosis
5. How many broncho-pulmonary segments are present in Right lung?
  - a. 12
  - b. 10
  - c. 13
  - d. 11
6. Which of the following arteries primarily feeds the anterior wall of heart?
  - a. Circumflex artery
  - b. Internal mammary artery
  - c. Left anterior descending artery
  - d. Right coronary artery
7. In which of the following conditions the Kerley B line appear on the chest X-ray?
  - a. Pneumothorax
  - b. Atelectasis
  - c. Congestive heart failure
  - d. Emphysema
8. Which of the following is a type of shock?
  - a. Neuromuscular
  - b. Cardiogenic
  - c. Histotoxic
  - d. a and b
9. Which of the following is not an aim for nasogastric tube insertion?
  - a. To relieve vomiting and distention
  - b. To collect gastric juice for diagnostic purposes.
  - c. To feed with fluids when oral intake is not possible
  - d. To clear the airways
10. Which of the following conditions constitute COPD?
  - a. Asthma and lung carcinoma
  - b. Emphysema and asthma
  - c. Emphysema and chronic bronchitis
  - d. Chronic bronchitis and lung carcinoma.

**Identify the sentence as True or False:**  
**(Please tick mark the answer)**

**(5 × 1 = 5)**  
**True False**

- |                                                                                               |                          |                          |
|-----------------------------------------------------------------------------------------------|--------------------------|--------------------------|
| 11. Bronchopulmonary fistula is an important complication following pulmonary surgery.        | <input type="checkbox"/> | <input type="checkbox"/> |
| 12. Tension pneumothorax is an indication for the insertion of the intercostal tube drainage. | <input type="checkbox"/> | <input type="checkbox"/> |
| 13. Intermittent claudication is a sign of venous thrombosis.                                 | <input type="checkbox"/> | <input type="checkbox"/> |

**(P.T.O.)**

14. GTN and beta blockers are the first line of treatment for bronchial asthma. ☐ ☐
15. Pressure support, IMV and SIMV are the ventilator modes commonly used for weaning the patient off the ventilator. ☐ ☐

**Match the following**

**(5 × 1 = 5)**

|     |                                  |                                       |
|-----|----------------------------------|---------------------------------------|
| 16. | Open heart surgery               | A. COPD                               |
| 17. | PTCA                             | B. Cardiopulmonary resuscitation      |
| 18. | Bronchodilators                  | C. Cardiopulmonary bypass             |
| 19. | ST segment changes               | D. Balloon angioplasty                |
| 20. | External electric defibrillation | E. Myocardial ischemia and infarction |
|     |                                  | F. Pleurisy                           |
|     |                                  | G. Pneumonia                          |

# CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

## 6<sup>th</sup> Semester of B.P.T. Examination

May 2018

### PT307.01 Clinical cardiorespiratory conditions

Date: 14.05.2018

Time: 10:30 am to 01:00 pm

Maximum Marks: 50

#### Instructions:

1. There are two Sections in the paper. **SECTION –I** contains 20 Questions and **SECTION – II** contains 3 Questions.
2. **SECTION –I** should be answered in the question paper itself & **SECTION – II** should be answered in separate answer book.
3. Marks on the right side suggest the total marks of that question.
4. Maximum time allotted for **SECTION – II** is 2 Hr 30 min.
5. Draw the figure where necessary.

#### SECTION-II

**Q. 1. Short answers (5 out of 7) (Answer not exceeding 50 words) (5 × 2 = 10)**

- a. Risk factors of IHD(any 4)
- b. Clinical features of Buerger's disease
- c. Contraindication of IPPB(any 4)
- d. Which grafts are used in CABG?
- e. SIMV
- f. Classification of Bronchiectasis
- g. Indications for tracheostomy(any 4)

**Q. 2. Short Notes (4 out of 5) (Answer not exceeding 150 words) (4 × 5 = 20)**

- a. Blue bloaters V/S Pink puffers.
- b. Types of respiratory failure and its management.
- c. Clinical manifestation and diagnostic criteria of Rheumatic fever.
- d. Signs and symptoms of Pneumothorax and its management.
- e. Enumerate different oxygen therapy devices and the factors that determine which system to use.

**Q. 3. Essay (2 out of 3) (2 × 10 = 20)**

- a. A 40 year old male patient complains of headache after which he suddenly lost his consciousness so he was brought to the emergency care. He is a known case of hyperlipidemia and diabetes mellitus. His BMI is 32 Kg/m<sup>2</sup>. On vital examination his heart rate: 98 beats/min, respiratory rate: 19 breaths/min, SpO<sub>2</sub>: 99% and blood pressure: 135/85 mmHg. His ECG, echocardiography and MRI (brain) investigation did not show any abnormality.(3+7)

**(P.T.O.)**

- i. What is the condition patient is suffering from?
  - ii. Explain the conservative management of the condition.
- b. What is a heart lung machine? Compare and contrast between mechanical and biological valve? (4+1+5)
- c. Mr. Shah, a 44 year old male patient who is a current smoker (2 pack years) complains of gradual onset of dyspnea since 3 years. He was admitted in the hospital due to worsening of his symptom during last winter. On examination it was found that the patient has a barrel chest and is a mouth breather. His PFT reports showed that  $FEV_1/FVC$  is 50% predicted, TLC is 135% predicted and RV is 130% predicted and  $D_LCO$  is 49% predicted. (3+3+4)
  - i. What is the condition patient is suffering from?
  - ii. Pathophysiology and conservative management of the condition.
