

CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY

University Examination

Date: 15/11/2019

Day: Friday

Time: 10.00 a.m. to 10.30 a.m.

Total Marks: 20

Student's ID No.									
Student's Name: _____									
Student's Sign : _____									
Supervisor's Name : _____									
Supervisor's Sign: _____									

Answer Sheet for Multiple Choice Questions (MCQs)									
Examination : BPT - November 2019									
Semester: 6th									
Section : I									
Course Code : PT 358									
Course Name: Physical & Functional Diagnosis									

Important Instructions:

- There are two sections in the paper. **SECTION –I** contains 20 Questions and **SECTION – II** contains 3 Questions.
- **SECTION –I** should be answered in the question paper itself & **SECTION – II** should be answered in separate answer book.
- Marks on the right side suggest the total marks of that question.
- Maximum time allotted for **SECTION – I** is 30 minutes Question paper for **SECTION – II** will be given once the **SECTION – I** is completed within the stipulated time and returned. However, Candidates who complete **SECTION – I** earlier than 30 minutes can collect main question paper for **SECTION –II** immediately after handing over the **SECTION-I** question paper with answers.
- **SECTION – I** should be attached with the main answer book at the end of the examination and should be submitted to the supervisor.

SECTION-I

Multiple Choice Questions: (MCQs) (Encircle the correct answer)

(20 × 1 = 20)

1. In SOAP protocol “P” stands for_____.
 - a. Practice
 - b. Patient
 - c. Plan
 - d. Practical
2. In Adhesive Capsulitis, end feel experienced while checking abduction will be
 - a. Soft
 - b. Capsular
 - c. Hard
 - d. Empty
3. Positive Tinnel’s sign suggest
 - a. Nerve Entrapment
 - b. Muscle spasm
 - c. Impingement Syndrome
 - d. Stroke

(P.T.O.)

4. Ashworth Scale is a measure of_____.
 - a. Muscle power
 - b. Voluntary control
 - c. Spasticity
 - d. Range of motion
5. Presence of Fibrillation Potentials suggest
 - a. Demyelination
 - b. Axonal injury
 - c. Normal finding
 - d. Abnormal finding
6. The unit of Sweep in an EMG/NCV equipment is_____.
 - a. Millivolt
 - b. Millisecond
 - c. Meter/second
 - d. Microsecond
7. In a Strength Duration Curve, one will see_____ in a non- recovering nerve on 21st Day.
 - a. CRD
 - b. PRD
 - c. ARD
 - d. Normal shape
8. Hand to Knee Gait is seen in_____.
 - a. Gluteal Muscle Paralysis
 - b. Weakness of Hamstring
 - c. Weakness of quadriceps femoris
 - d. Peroneal Nerve Palsy
9. The ROM of abduction at thumb (CMC) is
 - a. 50*
 - b. 90*
 - c. 70*
 - d. 15*
10. A patient sustained a knife wound which severed the distal lateral cord of the brachial plexus EMG testing reveals no damage to the median nerve. The injury will likely result in impairment of:
 - a. Elbow flexion and forearm supination
 - b. Elbow extension and forearm pronation
 - c. Shoulder flexion and Abduction
 - d. Shoulder lateral rotation
11. A physiotherapist positions a patient's hip in the resting position. This position for hip is_____.
 - a. 15* flexion, 30* abduction and 15* lateral rotation
 - b. 60* flexion, 30* abduction and 15* lateral rotation
 - c. 15* flexion, 15* abduction and 5* lateral rotation
 - d. 30* flexion, 30* abduction and 5* lateral rotation
12. Most reliable method for detecting bony metastasis is _____.
 - a. MRI
 - b. CT scan
 - c. Radiography
 - d. SPECT

(P.T.O.)

13. The “Card test” assess the function of:
- Median nerve
 - Axillary nerve
 - Ulnar nerve
 - Radial nerve
14. One year after nerve injury, the regenerating axon may have_____ % reduction in conduction velocity.
- 15
 - 25
 - 35
 - 45
15. In mild head injury Glasgow coma scale score is_____.
- 9-12
 - 13-15
 - 10-14
 - 10-15
16. A therapist attempts to assess the integrity of the L4 spinal level. Which deep tendon reflex would provide the therapist with the most useful information
- Lateral hamstrings
 - Medial hamstrings
 - Patellar reflex
 - Achilles reflex
17. Which of the following domain is not included in health related quality of life assessment?
- Physical
 - Psychological
 - Economic
 - Social
18. A 35 year old female has underwent an oral surgery following which she reported severe burning sensation over one side of the face, which of the following nerve might be involved?
- Trigeminal
 - Accessory
 - Facial
 - Glossopharyngeal
19. A 65 year old patient with chronic neck pain report dizziness during cervical extension, so which test is useful to rule out vascular insufficiency?
- Adson cervical insufficiency test
 - Upper limb tension test
 - Lateral shear test
 - Cervical quadrant test
20. Hyper resonant percussion note heard during chest percussion examination indicates
- Normal lung tissue
 - Hemothorax
 - Pneumothorax
 - TB

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

Sixth Semester of B.P.T. Examination

November 2019

PT 358 Physical & Functional Diagnosis

Date: 15/11/2019

Time: 10.30a.m. to 1.00p.m.

Maximum Marks: 50

Instructions:

1. There are two Sections in the paper. **SECTION –I** contains 20 Questions and **SECTION – II** contains 3 Questions.
2. **SECTION –I** should be answered in the question paper itself & **SECTION – II** should be answered in separate answer book.
3. Marks on the right side suggest the total marks of that question.
4. Maximum time allotted for **SECTION – II** is 2 Hr 30 min.
5. Draw the figure where necessary.

SECTION-II

Q. 1. Short answers (5 out of 7) (Answer not exceeding 50 words) (5 × 2 = 10)

- a. Discuss the value of screening tests in physiotherapy.
- b. Discuss any two strengths and limitations of CT scan and MRI.
- c. Describe Electrode Placement and Stimulation sites for Motor Conduction of Median nerve.
- d. Describe the procedure and interpretation of Tandem Romberg's test.
- e. Describe in brief Borg's Scale.
- f. What is FITT Principle?
- g. Patient is diagnosed with Colle's fracture due to which 50% of range of motion is restricted in arm components and 20% of grip strength is affected in hand component. Calculate the level of disability for this patient.

Q. 2. Short Notes (4 out of 5) (Answer not exceeding 150 words) (4 × 5 = 20)

- a. Describe the procedure for observational gait analysis (OGA) and identify any three advantages and limitations of OGA.
- b. Draw ICF model of disability for stroke and explain each component.
- c. List various steps involved in EMG recording and describe commonly seen EMG abnormalities in Myopathy.
- d. Explain special tests to diagnose Muscle or Tendon pathology of Shoulder joint.
- e. Tools to measure Health-related components of fitness.

(P.T.O.)

Q. 3. Essay (2 out of 3)**(2 × 10 = 20)**

- a. A 34 year old woman comes to you complaining of back pain from 3 months due to heavy weight lifting. The pain has been gradually increasing in severity and is worst in the morning on arising from bed with stiffness in lower back. The pain is centered in her low back and radiates into her buttocks and posterior left thigh. Describe your assessment plan for this patient with differential diagnosis.
- b. A 50 year old man presents to you with moderate pain and swelling of 6 months duration in his left knee. The pain and swelling have become worse during the past 1.5 months. Describe your assessment plan for this patient with differential diagnosis.
- c. A 37 year old male diagnosed with D6 vertebral fracture following a road traffic accident since one month. Currently, the patient report loss of sensation and motor function in the lower trunk and both lower limbs. The patient is referred for physiotherapy evaluation with the goal of identifying the level of neurological lesion.
 - (i) What are the types of sensation you will examine for this patient?
 - (ii) Describe the procedure for examining touch sensation
 - (iii) Describe the procedure for examining proprioception and kinesthesia
