

CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY

University Examination

Date: 07.06.2018

Day: Thursday

Time: 10.00 am to 10.30ap.m.

Total Marks: 20

Student's ID No.									
Student's Name: _____									
Student's Sign : _____									
Supervisor's Name : _____									
Supervisor's Sign: _____									

Answer Sheet for Multiple Choice Questions (MCQs), True or false and Match the following
Examination : MPT- June 2018
Semester: 2
Section : I
Course Code : PT768
Course Name: Physical & Functional Diagnosis I for Rehabilitation

Important Instructions:

- There are two sections in the paper. **SECTION –I** contains 20 Questions and **SECTION – II** contains 3 Questions.
- **SECTION –I** should be answered in the question paper itself & **SECTION – II** should be answered in separate answer book.
- Marks on the right side suggest the total marks of that question.
- Maximum time allotted for **SECTION – I** is 30 minutes Question paper for **SECTION – II** will be given once the **SECTION – I** is completed within the stipulated time and returned. However, Candidates who complete **SECTION – I** earlier than 30 minutes can collect main question paper for **SECTION –II** immediately after handing over the **SECTION-I** question paper with answers.
- **SECTION – I** should be attached with the main answer book at the end of the examination and should be submitted to the supervisor.

SECTION-I

Multiple Choice Questions: (MCQs) (Encircle the correct answer)

(10 × 1 = 10)

1. Involvement of L2 root predominantly causes weakness of _____.
 - a. Hip flexors
 - b. Ankle dorsiflexors
 - c. Knee flexors
 - d. Ankle planterflexors
2. Loss of motion and sensation in arms and hands are seen in _____.
 - a. Brown Sequard Syndrome
 - b. Complete Cord Lesion
 - c. Posterior Cord Lesion
 - d. Central Cord Lesion

(P.T.O.)

3. The numerical scale closely correlated with several physiological variables, utilized as an adjunct to exercise testing is _____.
- Borg scale of RPE
 - McCardle scale of RPE
 - Strauss scale of RPE
 - Webber scale of RPE
4. _____ of the following is best method for diagnosing Type 2 Diabetes Mellitus.
- Fasting Blood Sugar (FBS)
 - Post Prandial Blood Sugar (PP₂BS)
 - Glycosylated Haemoglobin (HbA_{1c})
 - Random Blood Sugar (RBS)
5. Cherry red facial colour indicates the possibility of _____.
- Severe distress
 - Severe arterial O₂ desaturation
 - Carbon Monoxide poisoning
 - Severe dypnoea
6. Symmetrical tonic neck reflex is diminished by _____ years.
- 1 – 2
 - 2 – 3
 - 3 – 4
 - 7 – 8
7. According to American Thoracic Society, 45% of predicted value of FEV₁ is predicted as _____ obstruction.
- mild
 - moderate
 - severe
 - very severe

- Family history of coronary heart disease
 - Hypertension
 - Hyperlipidemia
 - Waist to hip ratio less than 0.8

Identify the sentence as True or False:
(Please tick mark the answer)

(5 × 1 = 5)
True False

- | | | |
|--|--------------------------|--------------------------|
| 11. The ICF is based on international and multidisciplinary input. | ☐ | ☐ |
| 12. Impairments are defined as a significant deviation or loss of structure and/or function. | ☐ | ☐ |
| 13. Upper abdominal obesity is high waist-hip ratio (> 1.0 women & 0.9 in men). | ☐ | ☐ |
| 14. In the assessment of obesity the focus is on both environment and individual factors. | ☐ | ☐ |
| 15. Pain at site distal to initial tumour site may suggest metastasis. | ☐ | ☐ |

Match the following

(5 × 1 = 5)

Type of Amputation	Permanent Physical Impairment
16. Shoulder Disarticulation	A. 90%
17. Elbow Disarticulation	B. 75%
18. Wrist Disarticulation	C. 60%
19. Hind Quarter Amputation	D. 100%
20. Syme's Amputation	E. 50%
	F. 70%
	G. 40%

(16 -), (17-), (18-), (19 -), (20-)

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

Second Semester of M.P.T. Examination

June 2018

PT768 Physical & Functional Diagnosis I for Rehabilitation

Date: 07.06.2018, Thursday

Time: 10.30 am to 01.00 pm

Maximum Marks: 50

Instructions:

1. There are two Sections in the paper. **SECTION –I** contains 20 Questions and **SECTION – II** contains 3 Questions.
2. **SECTION –I** should be answered in the question paper itself & **SECTION – II** should be answered in separate answer book.
3. Marks on the right side suggest the total marks of that question.
4. Maximum time allotted for **SECTION – II** is 2 Hr 30 min.
5. Draw the figure where necessary.

SECTION-II

Q. 1. Short answers (5 out of 7) (Answer not exceeding 50 words) (5 × 2 = 10)

- a. Define spinal shock.
- b. Causes of secondary Hypertension.
- c. Write clinical features of brown sequard syndrome.
- d. New York Heart Association (NYHA) Functional Classification of Cardiac diseases.
- e. Interpretation of Deep Tendon Reflex.
- f. Scissoring gait in Cerebral Palsy
- g. Method of assessment of post-mastectomy lymphoedema.

Q. 2. Short Notes (4 out of 5) (Answer not exceeding 150 words) (4 × 5 = 20)

- a. Explain Ankle Brachial Index Test.
- b. Physical Examination of Obesity.
- c. Explain ASIA impairment Scale.
- d. Exercise ECG testing.
- e. Pulmonary Function Test.

Q. 3. Essay (2 out of 3) (2 × 10 = 20)

- a. 55 year old male having diabetes mellitus since 13 years complains of weakness in right side of the body and difficulty in speaking. His upper limb is more involved than lower limb. Tone is increased in right upper and lower limb. Motor recovery stages are as follows- Upper limb- stage 4, hand stage- 3, lower limb-stage 6 according to Brunnstrom. Sensations are impaired; write down appropriate examination for same.
