

CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY

University Examination

Date: 7.6.18

Day: Thursday

Time: 10:00 am to 10:30 am

Total Marks: 20

Student's ID No.									
Student's Name: _____									
Student's Sign : _____									
Supervisor's Name : _____									
Supervisor's Sign: _____									

Answer Sheet for Multiple Choice Questions (MCQs), True or false and Match the following
Examination : MPT- June 2018
Semester: [2]
Section : I
Course Code : PT780
Course Name: Physical and Functional Diagnosis I for Pediatrics

Important Instructions:

- There are two sections in the paper. **SECTION –I** contains 20 Questions and **SECTION – II** contains 3 Questions.
- **SECTION –I** should be answered in the question paper itself & **SECTION – II** should be answered in separate answer book.
- Marks on the right side suggest the total marks of that question.
- Maximum time allotted for **SECTION – I** is 30 minutes. Question paper for **SECTION – II** will be given once the **SECTION – I** is completed within the stipulated time and returned. However, Candidates who complete **SECTION – I** earlier than 30 minutes can collect main question paper for **SECTION –II** immediately after handing over the **SECTION-I** question paper with answers.
- **SECTION – I** should be attached with the main answer book at the end of the examination and should be submitted to the supervisor.

SECTION-I

Multiple Choice Questions: (MCQs)
(Encircle the correct answer)

(10 × 1 = 10)

1. GMFCS E & R is different from GMFCS in terms of addition of which new age band?
 - a. 6-12 Years
 - b. 12-15 years
 - c. 15-18 years
 - d. 12-18 years
2. In which year the first draft of ICF-CY was published?
 - a. 2001
 - b. 2007
 - c. 1980
 - d. 2005

3. What is the normal duration of insertional activity?
 - a. <300 msec
 - b. <300µsec
 - c. <500msec
 - d. <500µsec
4. Which one of this is not the primary neuromuscular impairment?
 - a. Spasticity
 - b. Insufficient force generation
 - c. Restricted ROM
 - d. Impaired balance reactions
5. What kind of stimulus is to be applied to elicit H reflex?
 - a. Maximal
 - b. Submaximal
 - c. Supramaximal
 - d. Near maximal
6. Number of pretest trials for 6 minute walk test is _____.
 - a. None
 - b. 1
 - c. 2
 - d. 3
7. Gold standard for body composition analysis is _____.
 - a. Dual energy x-ray absorptiometry (DEXA)
 - b. Body Impedance Analyser
 - c. Underwater weighing
 - d. MRI images
8. Questionnaires with 7 day recall usually give inconsistent information because _____.
 - a. they are lengthy
 - b. recalling the events is difficult for the child
 - c. there are multiple domains which are irrelevant
 - d. they are having shorter allotted time
9. Myelography is a form of _____ using fluoroscopy.
 - a. X- ray
 - b. MRI
 - c. NCV
 - d. Biopsy
10. For carotid angiography, _____ artery is selected to inject the dye.
 - a. Subclavian
 - b. Brachial
 - c. Femoral
 - d. Radial

Identify the sentence as True or False:

(Please tick mark the answer)

(5 × 1 = 5)

True False

11. Scoring for musculoskeletal tests in pediatrics is age-wise because of their differences in cognitive levels.
12. Lateral reach test is a test of flexibility.
13. Diurnal variations can affect the scores of the cardiovascular tests.
14. Analysis of scoring of GMFM 88 requires software GMAE.
15. Upper brachial plexus palsy affects the nerve roots C5, C6 and +/-C7.

(P.T.O.)

Match the following**(5 × 1 = 5)**

16.	Presidents Challenge	A. Fibrillation potentials
17.	Fitnessgram	B. testing program by Council of Europe
18.	Eurofit	C. health related fitness status assessment by European Union
19.	Spontaneous activity on EMG	D. for children in grades kindergarten - 12
20.	Gross Motor Function Measure	E. fitness award program for school children in USA
		F. Norm- referenced test
		G. Criterion- referenced test

(16 -), (17-), (18-), (19-), (20-)

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY
2nd Semester of M.P.T. Examination
June 2018

PT780 Physical & Functional Diagnosis I for Pediatrics

Date: 7.6.18

Time: 10:30 am – 1:00 pm

Maximum Marks: 50

Instructions:

1. There are two Sections in the paper. **SECTION –I** contains 20 Questions and **SECTION – II** contains 3 Questions.
2. **SECTION –I** should be answered in the question paper itself & **SECTION – II** should be answered in separate answer book.
3. Marks on the right side suggest the total marks of that question.
4. Maximum time allotted for **SECTION – II** is 2 Hr 30 min.
5. Draw the figure where necessary.

SECTION-II

Q.1. Short answers (5 out of 7) (Answer not exceeding 50 words) (5 × 2 = 10)

- a. What is insertional activity?
- b. What is screening?
- c. What is antidromic impulse?
- d. What do you mean by reference values?
- e. Enumerate any 2 indications of doing body composition analysis.
- f. How CSF sample collection is done in infants?
- g. Difference between physical activity and physical fitness by giving an example.

Q.2. Short Notes (4 out of 5) (Answer not exceeding 150 words) (4 × 5 = 20)

- a. Discuss any one of abnormal spontaneous activities of EMG.
- b. Equilibrium reactions.
- c. Distinguish between CT scan and MRI.
- d. Advantages and drawbacks of using questionnaires for measuring physical activity.
- e. Safety issues to be taken while performing cardiovascular endurance testing in children.

Q.3. Essay (2 out of 3) (2 × 10 = 20)

- a. Discuss procedures for NCV tests & interpretation for obstetric brachial plexus palsy.
- b. Explain in detail the various methods of evaluating the body composition in children.
- c. Elaborate any 5 musculoskeletal tests giving their detailed methodology, scoring criteria and clinical significance.
