

CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY

University Examination

Date: 26/11/2018

Day: Monday

Time: 10:00 AM to 10:30 AM

Total Marks: 20

Student's ID No.									
Student's Name: _____									
Student's Sign : _____									
Supervisor's Name : _____									
Supervisor's Sign: _____									

Answer Sheet for Multiple Choice Questions (MCQs).
Examination : MPT- November 2018
Semester: 4th
Section : I
Course Code : PT907
Course Name: Physical & Functional Diagnosis II For Musculoskeletal Sciences

Important Instructions:

- There are two sections in the paper. **SECTION –I** contains 20 Questions and **SECTION – II** contains 3 Questions.
- **SECTION –I** should be answered in the question paper itself & **SECTION – II** should be answered in separate answer book.
- Marks on the right side suggest the total marks of that question.
- Maximum time allotted for **SECTION – I** is 30 minutes Question paper for **SECTION – II** will be given once the **SECTION – I** is completed within the stipulated time and returned. However, Candidates who complete **SECTION – I** earlier than 30 minutes can collect main question paper for **SECTION –II** immediately after handing over the **SECTION-I** question paper with answers.
- **SECTION – I** should be attached with the main answer book at the end of the examination and should be submitted to the supervisor.

SECTION-I

Multiple Choice Questions: (MCQs)
(Encircle the correct answer)

(20 × 1 = 20)

1. Dislocation of which carpal bones can present as median nerve palsy?
 - a. Scaphoid
 - b. Hamate
 - c. Lunate
 - d. Trapezium
2. What will be the value of percentage if Cobb's angle for scoliosis is between 0-20?
 - a. Nil
 - b. 10%
 - c. 20%
 - d. 30%
3. Which is the best investigation to identify knee cartilage injury?
 - a. Arthrography
 - b. Aspiration
 - c. Radiograph
 - d. Arthroscopy

4. Syndesmophytes are seen in case of
 - a. Rheumatoid arthritis
 - b. Osteoarthritis
 - c. Ankylosing spondylitis
 - d. Gout
5. 'Flexicurve' is used to assess one of the following condition namely_____.
 - a. Kyphosis
 - b. Scoliosis
 - c. Genu varum
 - d. Coxa vara
6. Which one of the following is a suitable method for measuring your cardiovascular endurance?
 - a. The sit and reach test
 - b. The body mass index test
 - c. The 30 minute sprint test
 - d. The Cooper 12 minute run test
7. A handicap is :
 - a. How well a teacher predicts a student will do in a given course of study
 - b. The limitation of a function, such as cognitive processing or physical or sensory abilities
 - c. A condition imposed on a person with disabilities by society, the physical environment, or the person's attitude.
 - d. A learner with exceptionalities
8. Which of the following domain is not included in Body function component of ICF?
 - a. Pain
 - b. Sensory function
 - c. Speech
 - d. Self-care
9. Rickets in infancy is characterized by the following except
 - a. Craniotabes
 - b. Wide open fontanelles
 - c. Rachitic rosary
 - d. Bow Leg
10. Nerve injury that causes pointing index is
 - a. Median nerve
 - b. Radial nerve
 - c. Facial nerve
 - d. Ulnar nerve
11. What is the current 'gold standard' for measurement of Body Composition?
 - a. Skin fold measurement
 - b. DEXA
 - c. Body density
 - d. Total body water estimates

(P.T.O.)

12. A person has a complete affection of Trochlear nerve, What will be the % of impairment?
- a. 10%
 - b. 20%
 - c. 30%
 - d. 40%
13. Which outcome measure can identify functional disability in osteoporosis patient?
- a. OPAQ
 - b. OQLQ
 - c. OFDQ
 - d. OPTQOL
14. A patient aged 25 has reported fall from height and pain in left knee. A mild swelling is seen. While walking there is no complain of pain but it causes buckling. Which structure is mostly damaged ?
- a. MCL injury
 - b. LCL injury
 - c. Meniscal injury
 - d. Cartilage damage
15. One of the following measurements cannot identify pes planus on radiograph.
- a. Calcaneal pitch angle
 - b. Navicular drop test
 - c. Talonavicular uncoverage angle
 - d. Incongruency angle
16. Modified Jones tendon transfer involves transfer of pronator teres to:
- a. ECRB
 - b. EPL
 - c. Palmaris longus
 - d. EDC
17. Southwick angle classification is to identify which one of following condition?
- a. Slipped capital femoral epiphysis
 - b. Perthes disease
 - c. Avascular necrosis
 - d. TB Hip
18. YMCA Cycle Ergometer Submaximal Test is useful in
- a. To estimate VO_2 max
 - b. To estimate speed
 - c. To Estimate agility
 - d. To estimate flexibility

(P.T.O.)

- 19.** One of the following is a feature of radial nerve injury at spiral groove.
- a.** No wrist drop
 - b.** Sensory loss over deltoid
 - c.** Thumb, finger, wrist drop
 - d.** Pointing index
- 20.** An elderly individual who has defect in inner ear will be having problems in ____.
- a.** Identification of position of body
 - b.** Velocity
 - c.** Motion
 - d.** Depth

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

Fourth Semester of M.P.T. Examination

November 2018

PT907 Physical and Functional Diagnosis II for Musculoskeletal Sciences

Date: 26/11/2018

Time: 10:30 AM to 1:00 PM

Maximum Marks: 50

Instructions:

1. There are two Sections in the paper. **SECTION –I** contains 20 Questions and **SECTION – II** contains 3 Questions.
2. **SECTION –I** should be answered in the question paper itself & **SECTION – II** should be answered in separate answer book.
3. Marks on the right side suggest the total marks of that question.
4. Maximum time allotted for **SECTION – II** is 2 Hr 30 min.
5. Draw the figure where necessary.

SECTION-II

Q.1. Short answers (5 out of 7) (Answer not exceeding 50 words) (5 × 2 = 10)

- a. Factors associated with falls in elderly.
- b. Name any four health related fitness batteries for college students.
- c. Radiographic evaluation of acquired scoliosis.
- d. How to differentially diagnose between erb's palsy and klumpke's palsy?
- e. What are the extrinsic factors responsible of ageing?
- f. Write down absolute contraindication for exercise testing.
- g. What is Wolff's law of bone remodeling?

Q.2. Short Notes (4 out of 5) (Answer not exceeding 150 words) (4 × 5 = 20)

- a. Explain the biomechanics of throwing.
- b. Goals of Physiotherapy treatment in Perthes disease.
- c. Write a note on atypical or Complex Clubfoot
- d. Assessment protocol for pain in lower back region.
- e. Describe any two tests for muscular endurance for the trunk muscles.

Q.3. Essay (2 out of 3) (2 × 10 = 20)

- a. Describe ICF? Describe the aims, underlying principles, model and components of ICF.
- b. Describe the Components of Geriatric assessment. Write a note on evaluation of Balance.
- c. Write in detail about risk factors are associated with the development of WMSDs?
