

CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY

University Examination

Date: 03/12/2018 Day: Monday

Time: 10:00am to 10:30 am

Total Marks: 20

Student's ID No.									
Student's Name: _____									
Student's Sign : _____									
Supervisor's Name : _____									
Supervisor's Sign: _____									

Answer Sheet for Multiple Choice Questions (MCQs), True or false and Match the following
Examination : BOP- December 2018
Semester: 3 rd
Section : I
Course Code : BOP302
Course Name: Visual optics -I

Important Instructions:

- There are two sections in the paper. **SECTION – I** contains 20 Questions and **SECTION – II** contains 3 Questions.
- SECTION – I** should be answered in the question paper itself & **SECTION – II** should be answered in separate answer book.
- Marks on the right side suggest the total marks of that question.
- Maximum time allotted for **SECTION – I** is 30 minutes. Question paper for **SECTION – II** will be given once the **SECTION – I** is completed within the stipulated time and returned. However, Candidates who complete **SECTION – I** earlier than 30 minutes can collect main question paper for **SECTION – II** immediately after handing over the **SECTION-I** question paper with answers.
- SECTION – I** should be attached with the main answer book at the end of the examination and should be submitted to the supervisor.

SECTION-I

Multiple Choice Questions: (MCQs)
(Encircle the correct answer)

(10 × 1 = 10)

- What will be the nature of vergence of light rays coming from object situated at 25cm distance from reference point?
 - Positive
 - Negative
 - Plano
 - None of the above
- Barrel shape distortion can be seen in _____ lens.
 - Negative
 - Plano
 - Positive
 - None of the above

3. Reduce eye has ____ number of refracting surface.
- 4
 - 6
 - 2
 - 1
4. Javal schiotz Keratometer is _____ keratometer.
- One position
 - Two position
 - Both of the above
 - None of the above
5. In snellen's chart 6/6 letter makes _____ of angle with nodal point of the eye at 6 meter.
- 5 min
 - 1 min
 - 10 min
 - None of the above
6. Cone cells are responsible for _____.
- Photopic vision
 - Color vision
 - Both a & b
 - None of the above
7. Ishihara's test is based on _____ principle.
- Color arrangement
 - Pseudo isochromatism
 - Color matching
 - Color saturation
8. Oblique astigmatism is _____ aberration.
- On axis
 - Off axis
 - Both of the above
 - None of the above
9. Hypermetropia can be corrected by _____
- Plus lens
 - Minus lens
 - Prism
 - Mirror
10. In compound myopic astigmatism light rays from both meridian falls _____
- In front of retina
 - Behind the retina
 - At same point in front of the retina
 - None of the above

Identify the sentence as True or False:
(Please tick mark the answer)

(5 × 1 = 5)
True False

11. In most cases monocular visual acuity is good compared to Binocular.
12. Reduced snellen's chart is used to measure distance visual acuity.
13. Keratometry measures radius of curvature of anterior surface of cornea
14. Visual axis and optical axis is same.
15. Myopic patients have difficulty in seeing distance object.

☐	☐
☐	☐
☐	☐
☐	☐
☐	☐

Match the following

(5 × 1 = 5)

16.	Doubling principle	A. Nystagmoid movement
17.	Sturms of conoid	B. Color vision
18.	OKN drum	C. Astigmatism
19.	Opponent theory	D. Lea paddels
20.	Preferential looking test	E. B&L keratometer

(16 -), (17-), (18-), (19-), (20-)

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

3rd Semester of BOP Examination

December 2018

BOP 302 Visual optics -I

Date:03/12/2018

Time: 10:30am to 01:00 pm

Maximum Marks: 50

Instructions:

1. There are two Sections in the paper. **SECTION –I** contains 20 Questions and **SECTION – II** contains 3 Questions.
2. **SECTION –I** should be answered in the question paper itself& **SECTION – II** should be answered in separate answer book.
3. Marks on the right side suggest the total marks of that question.
4. Maximum time allotted for **SECTION – II** is 2 Hr 30 min.
5. Draw the figure where necessary.

SECTION-II

Q.1. Short answers (10 out of 11)

(10 × 2 = 20)

- a. Define astigmatism.
- b. Explain latent hypermetropia.
- c. What is extended keratometry?
- d. Enlist 4 test charts used to assess near visual acuity
- e. Define magnification.
- f. What is accommodation?
- g. What is Protanopia?
- h. Define visual axis.
- i. What is pseudo myopia?
- j. What is the use of pin hole?
- k. What is unaided Visual acuity?

Q.2. Short Notes (4 out of 5)

(4 × 5 = 20)

- a. Write a note on one position keratometry.
- b. Inherited(congenital) Vs Acquired color vision deficiency
- c. Draw a labeled diagram of reduced eye.
- d. Draw image formation in case of COMA and explain it
- e. Write a note on sign convention

Q.3. Essay (1 out of 2)

(1 × 10 = 10)

- a. Write a note on Visual acuity assessment in case of pediatric patient.
- b. Write a note on Myopia and its management.
