

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

IV Semester of Bachelor in Medical Imaging Technology May 2018

BMRIT402 Clinical Radiography Positioning Part 2

Date: 23/05/2018 Day: Wednesday Time: 10.00 am to 10.30 am Maximum Marks: 20

MCQ

Student's ID No.	Answer Sheet for Multiple Choice Questions (MCQs), True or false and Match the following Examination : BMIT/BOTAT/BOP Semester: IV Section : Course Code : _____ Course Name: _____										
<table border="1"><tr><td></td><td></td><td></td><td></td><td></td><td></td><td></td><td></td><td></td><td></td></tr></table>											
Student's Name:											
Student's Sign :											
Supervisor's Name :											
Supervisor's Sign:											

Important Instructions:

- Tick the correct answer and it should be written in question paper itself.
- Use of non-programmable calculator is allowed.

Q – I	Choose the correct answer for the following questions.		10
(A)			
1.	The plane that passes through the opposing biting surfaces of the teeth call		
	a. Mesial plane	b. Distal plane	
	c. Occlusal plane	d. Lingual plane	
2.	A hollow abdominal viscus releases free gas into the peritoneal cavity known as		
	a. Perforation	b. Emboli	
	c. Abscess	d. Effusion	
3.	Breast compression should be applied only to a level that a women can tolerate and not above		
	a. 150 Newtons	b. 200Newtons	
	c. 250 Newtons	d. 300 Newtons	
4.	Structures lying immediately beneath the sella turcica and posterior to the ethmoid sinuses are		
	a. Frontal sinus	b. Maxillary Sinuses	
	c. Sphenoid sinuses	d. Ethmoid sinuses	

5.	The highest point of the skull in the median sagittal plane is		
	a. Glabella	b. Nasion	
	c. Inion	d. Vertex	
6.	Thoracic vertebrae are		
	a. 12	b. 15	
	c. 17	d. 19	
7.	The Radiographic technique used to get the enlarged images of small structures		
	a. Macro radiography	b. Tomography	
	c. Tomo synthesis	d. Micro radiography	
8.	A Medical Imaging Modality which gives more radiation to the patient		
	a. X ray	b. Ultrasound	
	c. Computed Tomography	d. Magnetic Resonance Imaging	
9.	The central passes along coronal plane at right-angles to the median sagittal plane for		
	a. AP projection of the skull	b. PA projection of the skull	
	c. Lateral projection of the skull	d. Oblique projection of the skull	
10.	The projection which demonstrates the greatest amount of breast tissue is		
	a. 45° MLO basic	b. Extended cranio-caudal laterally rotated	
	c. Cranio-caudal basic	d. Extended cranio-caudal Medially rotated	

Q - I (B)	Match the following column “A” with Column “B”.		5
Column A	Answer	Column B	
1. Mobile Radiography is often required in cases of acute		a. Automatic exposure control	
2. The position of an endotracheal tube can be assessed from		b. Acute abdomen or following surgery	
3. AEC		c. Axillary Tail	
4. Projection is valuable in women where lymph gland are involved with breast cancer		d. 25-35 kVp, 100mA	
5. Mammography		e. AP projection of the chest	

Q - I (C)	Select whether following statement is true or false.	5
		True/False
1.	Cranial bones are 22 in number.	
2.	Tomographic technique is used before to produce cross sectional images.	
3.	Extended cranio caudal view is generally taken when patient comes for mammography.	
4.	Fumigation process is used for OT room sterilization.	
5.	CT is first choice to demonstrate soft tissues.	

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

IV Semester of Bachelor in Medical Imaging Technology May 2018

BMRIT402 Clinical Radiography Positioning Part 2

Date: 23/05/2018 Day: Wednesday Time: 10.30 am to 01.00 pm Maximum Marks: 50

Instructions:

- 1. Section I and II must be attempted in SINGLE ANSWER SHEET.**
2. Make suitable assumptions and draw neat figures wherever required.
3. Use of non-programmable calculator is allowed.
4. Show necessary calculations.

SECTION –I		
Q - II Answer the following questions as directed. (Any ten)		20
1.	Application of Gallows Traction.	
2.	Define Kvp and mAs.	
3.	Enlist the views for forensic Radiography.	
4.	Name the views taken to demonstrate Para nasal sinuses.	
5.	Write down the names of facial bones.	
6.	Applications of High and Low kVp techniques.	
7.	Indications for Dexa Scan.	
8.	Mention two advantages and disadvantages of stereoscopy.	
9.	Two Basic differences between KUB and Abdomen X ray.	
10.	Draw a flow chart of Xeroradiography Technique.	
11.	Names of Dental Radiographic Techniques.	
SECTION - II		
Q-III Answer the following questions as directed		20
1.	Explain immobilizing devices used during pediatric radiography.	
2.	Elaborate the role of Technologist in Ward radiography.	
3.	Write a note on landmarks of skull.	
4.	Explain principle of Macro radiography.	
5.	Describe any one radiographic view for abdomen.	
Q-IV Answer the following questions as directed		10
1.	Mention the types of foreign bodies. Explain in detail the radiographic taken to demonstrate foreign bodies.
