

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

IV Semester of Bachelor in Medical Imaging Technology May 2018

BMRIT403 Newer Modalities Imaging Techniques including patient

Date: 25/05/2018 Day: Friday Time: 10.00 am to 10.30 am Maximum Marks: 20

MCQ

Student's ID No. <table border="1" style="width: 100%; height: 20px; border-collapse: collapse;"><tr><td style="width: 10%;"></td><td style="width: 10%;"></td><td style="width: 10%;"></td><td style="width: 10%;"></td><td style="width: 10%;"></td><td style="width: 10%;"></td><td style="width: 10%;"></td><td style="width: 10%;"></td><td style="width: 10%;"></td><td style="width: 10%;"></td></tr></table> Student's Name: _____ Student's Sign : _____ Supervisor's Name : _____ Supervisor's Sign: _____											Answer Sheet for Multiple Choice Questions (MCQs), True or false and Match the following Examination : BMIT/BOTAT/BOP Semester: IV Section : Course Code : _____ Course Name: _____

Important Instructions:

- Tick the correct answer and it should be written in question paper itself.
- Use of non-programmable calculator is allowed.

Q – I (A)	Choose the correct answer for the following questions.		10
1.	A technique in which a static image of the contrast filled vessel allows the radiologist to see the guide wire and the catheter		
	a. Road mapping	b. Surface shaded display	
	c. Volume Rendering	d. Maximum Intensity projection	
2.	Unattached mass that travels through the bloodstream, lodges in a blood vessel and blocks it		
	a. Thrombosis	b. Stenosis	
	c. Emboli	d. Aneurysm	
3.	For placing the guide wire and catheter in place		
	a. Guide wire	b. Needle	
	c. Dilator	d. Sheath	
4.	For lower limb angiography, catheter used is		
	a. Jerkins	b. Pigtail	
	c. Sidewinder	d. Manis	

5.	When a tear occurs inside the aorta causes blood to flow between the layers of the wall of the aorta, forcing the layers apart calls		
	a. Aortic Aneurysm	b. Aortic dissection	
	c. Malena	d. Atherosclerosis	
6.	In Myloegraphy, the dose of iodine should not exceed		
	a. 150mgI/ml	b. 200mgI/ml	
	c. 250mgI/ml	d. 300mg I/ml	
7.	The contrast study of aorta known as		
	a. Aortogram	b. Angiography	
	c. Pylogram	d. Histograms	
8.	In Pneumoathrograms contrast is		
	a. Omnipaque	b. Barium	
	c. Air	d. Angiograffin	
9.	To perform the upper limb angiography contrast volume is		
	a. 20-40ml	b. 40-60ml	
	c. 60-70ml	d. 70-80ml	
10.	Guide wires are constructed on stainless steel & coated with		
	a. Polythene	b. Teflon	
	c. Polymers	d. Polyurethane	

Q - I (B)	Match the following column "A" with Column "B".		5
Column A	Answer	Column B	
1. Judkins head hunter I		a. Angiograffin	
2. Anesthesia		b. Omnipaque	
3. water soluble Ionic contrast media		c. Upper limb Angiography	
4. water soluble Nonionic contrast media		d. Catheter	
5. French		e. Xylocaine	

Q - I (C)	Select whether following statement is true or false.	5
		True/False
1.	Once the angiographic procedure gets over patient can be discharged immediately.	
2.	Arthrography is performed for joints.	
3.	There is no need to perform Xylocaine sensitivity test before angiography procedures.	
4.	Ionic contrast media are contraindicated for intrathecal injection	
5.	Hip joint arthrography is usually performed to evaluate congenital dislocation in children.	

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

IV Semester of Bachelor in Medical Imaging Technology May 2018

BMRIT403 Newer Modalities Imaging Techniques including patient

Date: 25/05/2018 Day: Friday Time: 10.30 am to 01.00 pm Maximum Marks: 50

Instructions:

- 1. Section I and II must be attempted in SINGLE ANSWER SHEET.**
2. Make suitable assumptions and draw neat figures wherever required.
3. Use of non-programmable calculator is allowed.
4. Show necessary calculations.

SECTION –I		
Q - II Answer the following questions as directed. (Any ten)		20
1.	Enlist radiographic views for cerebral angiography.	
2.	Name the types of catheter.	
3.	Name radiographic views for lower limb angiography.	
4.	Enlist the view for knee arthrography.	
5.	Define thrombosis.	
6.	Name the arteries of lower limb.	
7.	Write two functions of guide wires.	
8.	Write two indication and contraindications of venography.	
9.	Name the vascular approaches for upper and lower limb angiography.	
10.	Write vital signs.	
11.	Name the equipment used in angiography.	
SECTION - II		
Q-III Answer the following questions as directed (Any four)		20
1.	Draw a labeled diagram of circle of Willis.	
2.	Draw a labeled diagram of upper limb arterial blood supply.	
3.	Mention indications and contraindications of Lymphography.	
4.	Explain pre and post patient care during angiographic procedures.	
5.	Draw a labelled diagram of Lower limb venogram.	
Q-IV Answer the following questions as directed		10
1.	What is myelography. Explain in detail lumbar, Dorsal and lumbar myelography.
