

CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY

University Examination

Date: 15/05/2019

Day: Wednesday

Time: 10:00 am to 10:30 am

Total Marks: 20

Student's ID No.									
Student's Name: _____									
Student's Sign : _____									
Supervisor's Name : _____									
Supervisor's Sign: _____									

Answer Sheet for Multiple Choice Questions (MCQs), True or false and Match the following
Examination : B.Optomety – May 2019
Semester: 5 th
Section : I
Course Code : BOP501
Course Name: CONTACT LENS-I

Important Instructions:

1. There are two sections in the paper.
2. **SECTION –I** contains 2 Questions:
 - a. MCQs for 20 marks answered in the question paper itself, should be submitted within 30 minutes.
 - b. Short answers for 20 marks (to be answered in separate answer book)
3. **SECTION – II** contains only 2 Question of Short notes and Essays (to be answered in answer book)
4. Marks on the right side suggest the total marks of that question.
5. Maximum time allotted for both section is 3 hours.
6. Candidates who complete **SECTION – I** (MCQs) earlier than 30 minutes can collect main question paper immediately after handing over the **SECTION-I (MCQs)** question paper with answers.
7. Non-programmable calculators are only allowed.
8. Draw the figures where necessary.

SECTION-I

Q.1.	Multiple Choice Questions: (MCQs) Encircle the correct answer	(1 X 10= 10)
1.	Which of the following tear film assessment is considered as non-invasive ?	
	a. Schirmer test	
	b. Phenol red thread test	
	c. Jones test I and II	
	d. Tearscope	
2.	What is the average amount of overnight corneal oedema in normal eyes without contact lens?	
	a. 2%	
	b. 6-8%	

	c. 3-4%	
	d. 10%	
3.	Patient has a spectacle refraction of -9.00Ds at a vertex distance of 14mm. If we wanted to fit this patient with contact lens, what BVP would be required for the contact lens?	
	a. -8.00D	
	b. -9.50D	
	c. -8.75D	
	d. -10.00D	
4.	Who is said to be first person to describe the concept of contact lens?	
	a. Rene Descartes	
	b. Leonardo da Vinci	
	c. Otto Wichterle	
	d. Carl Zeiss	
5.	A toric SCL with a BVP of -2.25/-2.50×45 has its greatest thickness in which meridian?	
	a. 45 degree	
	b. 90 degree	
	c. 135 degree	
	d. 180 degree	
6.	Which of the following types of Soft contact lenses would most likely result in pervaporation staining of cornea?	
	a. Thick, low water content lenses	
	b. Thick, high water content lenses	
	c. Thin, medium water content lenses	
	d. Thin, high water content lenses	
7.	Which soft CL manufacturing technique produces the most flexible lens?	
	a. Lathe cutting	
	b. Cast molding	
	c. Molding with a lathed back surface	
	d. Spin casting	
8.	A myope transferring from spectacle to contact lenses will use____	
	a. More accommodation and less convergence	
	b. More accommodation and more convergence	
	c. Less accommodation and more convergence	
	d. Less accommodation and less convergence	
9.	Which of the following filter is used to enhance the view of fluoresceine pattern?	
	a. Red-free filter	
	b. Wratten #12 filter	
	c. Diffuse	
	d. Neutral density filter	
10.	Which of the following RGP lens diameter would be the most suitable for a patient with a HVID of 12mm?	

	a. 12.00mm	
	b. 10.00mm	
	c. 13.50mm	
	d. 14.00mm	

Identify the sentence as True or False:		(5 × 1 = 5)
11.	Tightness of SCL is measured using Push-up test.	
12.	Hydrogen peroxide is considered as Heat disinfection system.	
13.	Optic nerve is responsible for corneal innervations.	
14.	Amorphous pattern indicates the thickest tear lipid layer.	
15.	An average eccentricity value of the human cornea is 0.47	

Match the following:		(5 × 1 = 5)	
16.	Tear film assessment	A.	Specular reflection
17.	Corneal endothelium assessment	B.	Captive bubble
18.	RGP lens static assessment	C.	Tearscope
19.	In Vitro measurement of Wettability	D.	JDF – 1000 TM Colourometry
20.	In Vitro measurement of Dk/t	E.	Fluoresceine pattern

(16 -), (17-), (18-), (19-), (20-)

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY
5th Semester of B.Optomtry Examination
May 2019

BOP501: Contact lens-I

Date: 10/05/2019 Day: Wednesday Time: 10:30am to 1:00pm Maximum Marks: 50

Instructions:

1. There are two sections in the paper.
2. **SECTION –I** contains 2 Questions:
 - a. MCQs for 20 marks answered in the question paper itself, should be submitted within 30 minutes.
 - b. Short answers for 20 marks (to be answered in separate answer book)
3. **SECTION – II** contains only 2 Question of Short notes and Essays (to be answered in answer book)
4. Marks on the right side suggest the total marks of that question.
5. Maximum time allotted for both section is 3 hours.
6. Candidates who complete **SECTION – I (MCQs)** earlier than 30 minutes can collect main question paper immediately after handing over the **SECTION-I (MCQs)** question paper with answers.
7. Non-programmable calculators are only allowed.
8. Draw the figures where necessary.

SECTION-I

Q.2.	Short answers (10 out of 11)	(10 × 2 = 20)
a.	Explain non-invasive tear film break up time evaluation with the help of keratometer.	
b.	Write down optical properties of an ideal contact lens material.	
c.	Explain – Perfluoroethers	
d.	Market availability of spherical soft contact lens.	
e.	Write down FDA classification for soft contact lens.	
f.	Enlist the complication of RGP contact lens.	
g.	What are the various parameters you will verify in your clinic before dispensing contact lens to the patient?	
h.	Explain removal technique of spherical contact lens.	
i.	What is Taco test?	
j.	Write down disadvantages of high water content contact lens material.	
k.	What are jelly bumps?	

SECTION II

Q.1.	Short Notes (4 out of 5)	(4 × 5 = 20)
a.	Write a note on RGP lens fitting evaluation for Optimal, flat and steep fit.	
b.	Write about pathogenesis, clinical features and management of SEAL & SMILE.	
c.	Write a note on mechanism of stabilizing techniques of toric contact lens.	
d.	Write down importance of corneal topography and slit lamp for contact lens fitting.	
e.	Indication of contact lens.	

Q.2.	Essay (1 out of 2)	(1 × 10 = 10)
a.	Write in detail about various manufacturing process of soft contact lens.	
b.	Care and maintenance of soft contact lens.
