

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

Bachelor of Computer Applications (BCA)

Semester-V University Examination March 2018

CA 303 Application Development Using .NET Framework

Date: 28/03/2018, Wednesday Time:10.00a.m. to 01.00 p.m. Maximum Marks: 70

Instructions:

- 1. Attempt both sections in separate answer books.**
- 2. The figure to the right indicates marks.**
- 3. Make a suitable assumption when necessary.**

SECTION-I

Q1 Do as directed.

1. What is framework? List out any two software framework. [02]
2. Define Terms: Abstraction , Encapsulation. [02]
3. Differentiate overriding and overloading. [02]
4. C# is component oriented language. [True / False] [01]
5. All console applications begin its execution by calling the Run() method. [01]
[True / False]
6. MSIL stands for_____. [01]
7. MS.NET Framework runtime require to be install on both development [01]
and production machine. [True / False]
8. CTS stands for _____. [01]

Q2 Answer the following.

- [A] Write a short note on .NET architecture. [06]
- [B] Explain process of compilation and execution of C# code with suitable diagram. [06]

OR

Q2 Answer the following.

- [A] How to handle exception in C#? Explain it in detail. [06]
- [B] What is use of properties in C#? Explain Read-Only, Write-Only and Auto implemented property with example. [06]

Q3 Answer the following.(Attempt any three)

[12]

- [A] List and explain any four data types available in C#.
- [B] Explain inheritance with an example.
- [C] Differentiate ToString() and Convert.ToString().
- [D] List and explain benefits of .NET framework in detail.
- [E] What is used of checked and unchecked block in C#? Explain with an example.

SECTION – II

- Q4 Do as directed.**
1. DataSet is read only and forward only. [True / False] [01]
 2. WPF used for developing windows based application. [True / False] [01]
 3. WPF builds on a vector based rendering engine. [True / False] [01]
 4. In WPF ,_____is used for user interface designing. [01]
 5. _____method of DataAdapter is used to populate DataTable. [01]
 6. _____method of SqlCommand class is used to execute insert query. [01]
 7. ADO stands for _____. [01]
 8. List out default event of Check Box and Button. [02]
 9. Differentiate Hardware rendering and Software rendering. [02]

- Q5 Answer the following.**
- [A] List and explain RadioButton control with its properties and events. [06]
- [B] Explain WPF architecture in detail. [06]

OR

- Q5 Answer the following.**
- [A] List and explain advantages of WPF over Win Form. [06]
- [B] Explain ADO.NET architecture in detail. [06]

- Q6 Answer the following.(Attempt any three)** [12]
- [A] Explain SqlConnection class with its property and method.
- [B] Differentiate DataReader and DataSet.
- [C] Write down the evolution of WPF.
- [D] List and explain any four properties and two events of DataGrid control with example.
- [E] Explain Grid panel and Stack panel in WPF.
-
