

Instructions: 1. Figures to the right indicate full marks for that question.
2. Use separate answer book for each section.
3. Assume suitable data whenever necessary and mention them clearly.

SECTION 1

Q.1 Answer the questions (Each question carries one mark) **[11]**

1. What is client side scripting?
2. What is PHP Parser?
3. Define : var_dump()
4. Write Syntax: Ternary Operator
5. Write alternative syntax of while loop.
6. PHP files are saved using _____extension.
7. _____function is used to declare constant in PHP.
8. What is open source software?
9. What is the output of following code segment:
 \$ans=50;
 echo \$ans++;
10. What is website?
11. Write the name of any one server side scripting language.

Q.2

- (A)** Explain about pros and cons of Open Source Software for developers. **[06]**
- (B)** Explain about arithmetic operators in PHP with suitable example. **[06]**

OR

Q.2

- (A)** Differentiate between client side scripting and server side scripting **[06]**
- (B)** What is variable? Write the rules to define variable in PHP. **[06]**

Q.3

- (A)** Explain about patterns of bazaar model in details. **[06]**
- (B)** Explain about following control structures: **[06]**
 (i) if (ii) switch...case

OR

Q.3

- (A)** What is array? Explain about indexed array with suitable example. **[06]**
- (B)** Explain about following array functions: **[06]**
 (i) sort (ii) asort (iii) rsort

SECTION 2

Q.4 Answer the questions (Each question carries one mark) [11]

1. What is the output of following code segment:
echo abs(-15);
2. What is the use of Header function?
3. What is the use of \$_POST super global variable?
4. _____ is a stateless protocol.
5. What is the use of query string?
6. What is the use of sqrt() function?
7. What is associative array?
8. Write the output of following code segment:
echo round(890.89,0);
9. _____ function is used to destroy all data registered to a session.
10. _____ super global variable stores details about uploaded files.
11. What is the use of include statement in PHP?

Q.5

(A) Explain about following array functions: [06]

- (a) array_slice() (b) array_merge()

(B) Explain about following string handling function: [06]

- (i) str_word_count() (ii) strcasecmp()

OR

Q.5

(A) Explain about following string functions with suitable example: [06]

- (i) explode() (ii) implode()

(B) Explain about following functions: [06]

- (i) date() (ii) date_diff ()

Q.6

(A) Explain about following file handling functions: [06]

- (i) ftell () (ii) unlink() (iii) filesize()

(B) Explain about session with suitable example. [06]

OR

Q.6

(A) Explain about following file handling functions: [06]

- (i) fseek() (ii) rewind()

(B) Explain about cookie with suitable example. [06]
