

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

Bachelor of Computer Applications (B.C.A.)

Semester-VI University Examination May 2018

CA 306 Software Project Management

Date: 09.05.18, Wednesday Time: 10.00 a.m. to 01.00 p.m.

Maximum Marks: 70

Instructions:

- 1. Attempt both sections in separate answer books.**
- 2. Figure to right indicates marks.**
- 3. Make suitable assumption when necessary.**

SECTION - I

Q1. (A) Answer Following. [05]

1. Define Project.
2. Many software projects have two stages. Firstly, they are _____ and later reformed to a _____.
3. Set up a small team headed by a _____ with day-to-day responsibility for the programme.
4. One of the advantage of _____ model is more customer satisfaction.
5. In _____ model phases do not overlap.

Q1. (B) Do as Directed. [06]

1. Why are software projects different from other projects? Explain each point.
2. List down and explain, different activities involved in step 2 “identify project” of project planning.
3. Explain: 1) In-house and 2) Outsourcing development.

Q2. Answer Following. [12]

1. What are different characteristics of project? List and explain each characteristic in brief.
2. What are different types of programmes? Explain each one in brief.

OR

Q2. Answer Following. [12]

1. What are different categories of software projects? Explain each categories in brief.
2. What are different steps of creating programme? Explain each step in detail.

Q3. Answer Following. [12]

1. What are different activities in project management? Explain each activities in brief.
2. Write short note on waterfall model with its advantages and disadvantages.

OR

- Q3. Answer Following. [12]**
1. Write short note on prototype model with its advantages and disadvantages.
 2. Write short note on spiral model with its advantages and disadvantages.

SECTION - II

- Q4. (A) Answer Following.**
1. _____ model projects effort and schedule for a software development projects. [01]
 2. Give full of following: 1) COCOMO 2) CPM 3) PERT [03]
 3. List down solution to avoid resource clashes. [01]

- Q4. (B) Do as Directed. [06]**
1. List down different parameters to be considered when allocating individuals to activity.
 2. Explain following terms: 1) Activity Schedule 2) Resource Schedule 3) Cost Schedule.
 3. What are the factors considered when estimating project? Explain each factor in one line.

- Q5. Answer Following. [12]**
1. Write short note on COCOMO model.
 2. List and explain different steps to create project schedule.

OR

- Q5. Answer Following. [12]**
1. Where are the estimation done during software project development? Explain each in detail.
 2. Explain different objectives of activity planning in detail.

- Q6. Answer Following. [12]**
1. What are difficulties in estimation? Explain each in detail.
 2. What are different categories of resources? Explain each category in brief.

OR

- Q6. Answer Following. [12]**
1. Explain following estimation techniques in detail: 1) Top down 2) Bottom Up.
 2. What is risk? List down different categories of risk. Explain any two categories of risk in detail.
