

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY
Master of Science in Information Technology (M.Sc. IT)
Semester-III University Examination March 2018
MS318 Web XML Applications

Date: 27.03.18, Tuesday Time: 01.30 p.m to 04.30 p.m Maximum Marks: 70

- Instructions: 1. Figures to the right indicate full marks for that question.
 2. Use separate answer book for each section.
 3. Assume suitable data whenever necessary and mention them clearly.

SECTION I

Q.1 Answer the following **[11]**

1. Define: Web Service
2. Address+Binding+Contract=_____
3. What is the use of WCF?
4. Only one endpoint is required in any WCF service. Mention: True/False
5. Which part is compulsory is SOAP envelope?
6. In Service Oriented Architecture, communication is done through messages.
Mention: True /False
7. PHP can communicate with JAVA web service. It is an example of _____
8. Identify the port number in following address:
http://localhost:9007/Service2
9. Which class is used to define base address through code?
10. What is client?
11. ServiceHost class is used to host service in self-hosting. Mention:
True/False.

Q.2 Explain about following parameters of [ServiceContract]: **[06]**

(A) (i) ProtectionLevel (ii) CallbackContract

Q.2 Explain about following message patterns: **[06]**

(B) (i) Duplex (ii) Request-Reply

OR

Q.2 Explain the need of SOA with suitable example. **[06]**

(A)

Q.2 What is channel? Explain about channel stack in details. **[06]**

(B)

Q.3 Explain about serialization and de-serialization with suitable example. **[06]**

(A)

Q.3 Explain about features of WCF. **[06]**

(B)

OR

Q.3 Explain about following address formats: **[06]**

(A) (i) MSMQ Address (ii) IIS Address

(B) Explain about following layers of WCF architecture with suitable example: **[06]**

(i) Service Runtime (ii) Activation and hosting

SECTION II

- Q.4 Answer the following [11]**
1. Chaos is the highest level of isolation in transaction.
Mention: True/False
 2. What is transaction?
 3. What is volatile data?
 4. What is state transition?
 5. Generally_____initiates transaction.
 6. What is integrity?
 7. What is auditing?
 8. What is the use of FaultException class?
 9. What is malformed message?
 10. What is reliable messaging?
 11. In duplex communication, service can call function of client. Mention:
True/False.
- Q.5 [06]**
- (A)** Explain basic working of queue. Also, explain best practices of using a queue.
- Q.5 [06]**
- (B)** How to troubleshoot WCF installation?
- OR**
- Q.5 [06]**
- (A)** Explain about WS-I basic profile.
- Q.5 [06]**
- (B)** Explain about ACID properties of transaction.
- Q.6 [06]**
- (A)** Explain about process of installing WCF Service.
- (B)** Differentiate between hosting and self-hosting. Explain hosting WCF service under windows service.
- Q.6 [06]**
- (A)** Explain about following security concepts
(i)Authentication (ii) Confidentiality (iii) Authorization
- (B)** Explain about (i) Transport level security (ii) Message Level security and differentiate between them. [06]
