

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

Master of Science in Information Technology (Msc. (I.T.))

Semester-III University Examination November - 2018

MS 318 Web XML Applications

Date: 27.11.18, Tuesday Time: 10.00 a.m. to 01.00 p.m.

Maximum Marks: 70

Instructions:

1. Attempt both sections in separate answer books.
2. Figure to right indicates marks.
3. Make suitable assumption when necessary.

SECTION - I

Q1. (A) Answer Following.

1. What is service oriented architecture? Explain with example. [02]
2. _____ attribute is used along with OperationContract for error handling in WCF service. [01]
3. What difference is between close and abort operations? [01]
4. What are the two ways to create proxy class in WCF client? [01]

Q1. (B)

1.

Binding	Address
wsHttpbinding	net.tcp://localhost/test1
netMSMQBinding	net.pipe://localhost/test4
netTcpBinding	net.msmq://localhost/q1
netNamedPipeBinding	http://localhost/test2

 [04]
2. What is difference between absolute and relative address? [01]
3. What is use of MessageContract attribute in WCF? [01]

Q2. Answer Following.

1. Write a short note on makeup of WCF. [12]
2. What are different address formats available in WCF? Explain any 3 address formats in detail.

OR

Q2. Answer Following. [12]

1. What is an endpoint? What does an endpoint consists of?
2. What are different components of binding? Explain each component in brief.

Q3. Answer Following. [12]

1. Write a short note on ServiceContract. Explain service contract with example and code.
2. What are service behaviors? Explain any 2 service behavior attributes.

OR

Q3. Answer Following. [12]

1. Explain following ServiceContract attributes: 1) ConfigurationName 2) ProtectionLevel.
2. What are operation behaviors? Explain any 2 operation behaviors.

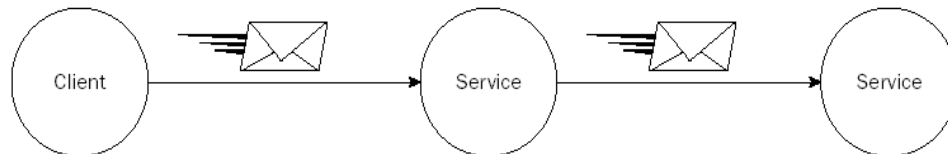

SECTION - II

Q4. (A) Answer Following.

1. ____ specifies where is the endpoint. [01]
2. Define Following: Behavior and Message [02]
3. What is the use of CallbackContract attribute? [01]
4. What is the use of Mex address? [01]

Q4. (B) Do as Directed.

1. [04]

2. Identify and explain concept from above image. [02]
Define: NamedPipe, Channel

Q5. Answer Following.

1. What is a transaction? Describe various ServiceBehavior and OperationBehavior attributes related to transactions in brief. [12]
2. Explain following security concepts: 1) Authentication 2) Authorization

OR

Q5. Answer Following. [12]

1. What is reliable messaging in WCF? Explain concept of queuing in WCF.
2. Explain following security concepts: 1) Integrity 2) Confidentiality

Q6. Answer Following.

1. Differentiate between message level and transport level security mechanisms. [12]
2. Explain about trouble shooting WCF installations.

OR

Q6. Answer Following. [12]

1. Differentiate between Web service and WCF service.
2. Write short note on different messaging patterns available in WCF.
