

Instructions:

1. Attempt both sections in separate answer books.
2. The figure to the right indicates marks.
3. Make a suitable assumption when necessary.

SECTION-I

Q.1. [A] Do as directed.

[09]

- _____ method is used to sort associative arrays in descending order.
a. sort() b. arsort()
c. rsort() d. dsort()
- _____ is a variable, which can hold more than one value at a time.
a. array b. Datatype
c. Interface c. Class
- _____ are arrays that stores data in key-value pair.
a. Two Dimentional Array b. Indexed Array
c. Assosiative Array d. Key Array
- _____ is PHP's central core.
a. Xampp Framework b. Zend Framework
c. PDO c. OOP
- _____ super global variable that contains all variables sent via a HTTP file upload.
a. \$_GET b. \$_SESSION
c. \$_COOKIE d. \$_FILES
- _____ function displays structured information about one or more variable that includes its type and value.
a. type() b. var_dump()
c. get_data() d. echo
- _____ attribute of header() function is used to refresh web page after a time.
a. refresh b. redirect
c. location d. send
- _____ is used to include file on the basis of given path.
a. add() b. include()
b. include_File() d. insertdata()
- _____ function is used to display error message and exit script if exception occurs.
a. error() b. die()
c. exit() d. close()

[B] Differentiate : Open Source S/w vs Close Source S/w

[02]

Q.2. Answer the following questions.

[12]

[A] Explain any four criteria for an Open Source Software to be an "OSI Certified" product.

[B] Explain header () function of PHP. With any two attributes in detail.

[C] List out types of datatype and explain any one in detail.

OR

Q.2. Answer the following questions.

[12]

[A] Explain user defined function with example.

- [B] List out types of array and explain any one with example.
 [C] Explain any four super global variables.

Q.3. Answer the following questions. (Any Three) [12]

- [A] Explain Constant in PHP with example.
 [B] Write a note on HTTP POST method.
 [C] Explain any four array related functions.
 [D] List out all and explain any one conditional statement in PHP.
 [E] Explain any four string related functions used in PHP with syntax.

SECTION-II

Q.4.[A] Do as directed. [08]

1. Full form of mysqli:
 - a. MySQL Inverted
 - b. MySQL Improved
 - c. MySQL Internal
 - d. MySQL Innovated
2. ____ function is used to get line no of error .
 - a. error_no()
 - b. getLine()
 - c. getLineNo()
 - d. getErrorNo()
3. GET can't be used to send images to the server. **[True/ False]**
4. ____ function is used for pattern matching in php.
 - a. pattern_match()
 - b. preg_match()
 - c. expression_match()
 - d. match_preg_expr()
5. ==> is used to access the methods of the object in PHP. **[True/ False]**
6. ____ function is used to get the current working directory.
 - a. getDir()
 - b. getcwd()
 - c. dir()
 - d. getCurrentDir()
7. ____ function is used to display query execution error.
 - a. mysqli_error()
 - b. mysqli_errorMessage()
 - c. error()
 - d. mysqli_query_error()
8. Any representation of data in which the implementation details are hidden is known as ____
 - a. Data Abstraction
 - b. Data Binding
 - c. Inheritance
 - d. Polymorphism

[B] Explain QuerySting with example. [03]

Q.5. Answer the following questions. [12]

- [A] Explain require () with suitable example.
 [B] Explain any four file handling function with syntax.
 [C] Write a note on Cookie used in PHP with example.

OR

Q.5. Answer the following questions. [12]

- [A] Explain \$_FILES[] with any three attributes and example.
 [B] Explain session in detail with example.
 [C] Explain any four meta character used in regular expression.

Q.6. Answer the following questions. (Any Three) [12]

- [A] Explain following server variables :
 i. \$_SERVER['HTTP_HOST'] ii. \$_SERVER['HTTPS']
 iii. \$_SERVER['SERVER_NAME'] iv. \$_SERVER['PHP_SELF']
 [C] Describe Exception Handling in PHP.
 [D] Explain any four functions used to handle MySQL database in PHP.
 [E] What is magic method? Describe any three magic methods.
