

**CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY**  
**Master of Computer Applications (MCA) /Master of Computer Applications (MCA) Lateral**  
**Semester-V / Semester-III**  
**University Examination March 2018**  
**CA 919 – Web Technologies (WT)**

**Date:** 26.03.18, Monday      **Time:** 10:00 a.m. to 01:00 p.m.      **Maximum Marks:** 70

**Instructions:**

1. Answer to the two sections must be written in the separate answer books.
2. Answer to different questions should start on new page.
3. Figure to the right indicate full marks.
4. Make suitable assumptions wherever necessary & mention them clearly

**SECTION – I****Q-1 Do as directed.**

- (a) Answer the following multi choice questions. **05**
1. In which configuration file the application's declarative architecture described  
a) web.xml      b) index.html      c) struts.properties      d) struts.xml
  2. \_\_\_\_\_ tag is NOT a part of Form Tags.  
a) s:submit      b) s:radio      c) s:property      d) s:doubleselect
  3. \_\_\_\_\_ method provides the access to key in an action class.  
a) getModel      b) getText      c) getParameter      d) none of them
  4. \_\_\_\_\_ attribute is used to check the condition in s:if tag.  
a) value      b) test      c) check      d) none of them
  5. Which syntax is correct for the property file key and value pairs?  
a) key="value"      b) key="value";      c) key=value;      d) key=value
- (b) State True/False. **03**
1. onreadystatechange event is triggered every time when the status property changes its value.
  2. Struts 2 uses the ValueStack as a storage area for all application domain data that will be needed during the processing of a request.
  3. It is compulsory to give namespace attribute in package element.
- (c) Explain the syntax of < s:doubleselect > with example. **03**

**Q-2 Answer the following questions.**

- (a) How AJAX works ? Explain with proper diagram. **04**
- (b) Explain each property of XMLHttpRequest object. **04**
- (c) Explain push tag and set tag with example. **04**

**OR****Q-2 Answer the following questions.**

- (a) Show the XML approach to declare the architecture of your application mapping. **04**
- (b) Explain validate method with example. **04**
- (c) What is the use of Struts2 Framework? List the features of Struts2. **04**

**Q-3 Answer the following questions. ( Any Two )**

- (a) Explain the MVC pattern of Struts 2 framework. Explain the working of Struts2 framework with suitable diagram. **06**
- (b) Explain the Object baked way to address the objects. Show it with example. **06**
- (c) What is the use of Action class? In how many ways one can write an action class? Explain with example. **06**

## SECTION – II

### Q-4 Do as directed

(a) Answer the following multi choice questions. 05

1. OGNL's expression Language has been set using \_\_\_\_\_ attribute.  
a) name and list    b) id and var    c) value and name    d) test and status
2. \_\_\_\_\_ is an attribute of s:include tag..  
a) value    b) name    c) id    d) status
3. Which of the following validators allow to verify that a string conforms to a given regular expression?  
a) required    b) int    c) fieldexpression    d) regex
4. For passing the parameters to the validator which tag is used?  
a) field    b) field-validator    c) param    d) message
5. Which Framework provides the way to use AJAX tags.  
a) POJO    b) OGNL    c) DOJO    d) Struts2  
Framework    Framework    Framework    Framework

(b) State True/False. 03

1. To provide a List value to s:append tag, <s:param> tag is used.
2. While creating your custom interceptor the real business occurs in the invoke method.
3. OGNL stands for Object Graph Navigation Language.

(c) Explain the use of format and nice attribute of date tag in Struts2. 03

### Q-5 Answer the following questions.

- (a) Explain the use of status attribute in iterator tag with example. 04
- (b) What is validation framework? Explain any two validators with example. 04
- (c) Explain any two Struts2 Control tags with example. 04

OR

### Q-5 Answer the following questions.

- (a) Write the purpose and usage of below elements 04  
1. interceptor    2. interceptor-ref    3. interceptors    4. interceptor-stack
- (b) List the categories of Struts 2 tags. Explain any one Ajax tag with example. 04
- (c) Explain timer, logger, params and static-params interceptor. 04

### Q-6 Answer the following questions. ( Any Two )

- (a) What is web service? Differentiate between Soap based and Rest based web service. 06
- (b) Write the steps to create and execute a REST based webservice. 06
- (c) What is tiles framework? What are the advantages in using the tiles framework? Which files are used to support the tiles framework? 06
