

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

Master of Computer Applications (MCA)

Semester – I University Examination 2009-10

CS701 Functional English & Communication Skills

Date: 30.12.2009, Wednesday

Time: 1.00 pm to 4.00 pm

Maximum Marks: 70

Instructions:

1. There are two sections in the paper. Attempt both the sections in separate answer books.
2. Attempt all questions.
3. Figures on the right indicate marks.

Section 1

- Q-1 Show how language, status and culture become barriers in communication. 07
- Q-2 (A) What is Kinesics? What role Proxemics plays in communication? 08
- Q-2 (B) Explain the role of Body Language in communication. 06

OR

- Q-2 (A) What is Listening? Differentiate listening from hearing and overhearing. 08
- Q-2 (B) Develop a Paragraph on "IT Revolution in 21st Century" 06
- Q-3 (A) Differentiate between Active and Passive Listening with suitable examples. 08
- Q-3 (B) Do as directed. 06

1. Ramesh comes to office by car, but I prefer to come _____ foot. (Put suitable preposition)
2. If you exercise regularly, you will not put on weight. (Rewrite the sentence using 'unless')
3. Everything _____ with time. (Use the correct form of 'change')
4. What can we do now? (Change the voice)
5. She is weak _____ enthusiastic. (Use correct conjunction)
6. We worked hard. We achieved the goal. (Make one sentence using appropriate conjunction)

OR

- Q-3 (A) "Confidence is the touchstone of success." Discuss the important aspects of Interview Skills in the light of given statement. 08
- Q-3 (B) Do as directed. 06

1. The judge was a man of _____ integrity. (eminent, imminent)
2. Unscheduled broadcast of important news. (Give one word substitute)
3. All in all (Use the idiom in a sentence of your own)
4. 'beside' and 'besides' (Use these two words in two different sentences)
5. I would _____ extreme caution. (advice, advise)
6. Keep your hair on (Use the idiom in a sentence of your own)

Section 2

- Q-4 Read the following passage carefully and answer the questions.

Much of the information we have today about chimpanzees comes from the groundbreaking, long-term research of the great conservationist, Jane Goodall. Jane Goodall was born in London, England, on April 3, 1934. On her second birthday, her father gave her a toy chimpanzee named Jubilee. Jubilee was named after a baby chimp in the London Zoo, and seemed to foretell the course Jane's life would take. To this day, Jubilee sits in a chair in Jane's London home. From an early age, Jane was fascinated by animals and animal stories.

As a young woman, Jane finished school in London, attended secretarial school, and then worked for a documentary filmmaker for a while. When a school friend invited her to visit Kenya, she worked as a waitress until she had earned the fare to travel there by boat. Once in Kenya, she met Dr. Louis Leakey, a famous paleontologist and anthropologist. He was impressed with her thorough knowledge of Africa and its wildlife, and hired her to assist him and his wife on a fossil-hunting expedition to Olduvai Gorge. Dr. Leakey soon realized that Jane was the perfect person to complete a study he had been planning for some time. She expressed her interest in the idea of studying animals by living in the wild with them, rather than studying dead animals through paleontology.

Dr. Leakey and Jane began planning a study of a group of chimpanzees who were living on the shores of Lake Tanganyika in Kenya. At the time, they thought it was too dangerous for a woman to live in the wilds of Africa alone. Finally, the authorities gave Jane the clearance she needed in order to go to Africa and begin her study.

In July of 1960, Jane and her mother arrived at Gombe National Park in what was then called Tanganyika and is now called Tanzania. Jane faced many challenges as she began her work. Little by little, she was able to enter their world. At first, she was able to watch the chimpanzees only from a great distance, using binoculars. It was an amazing accomplishment for Jane, and a breakthrough in the study of animals in the wild. Jane named all of the chimpanzees that she studied, stating in her journals that she felt they each had a unique personality.

One of the first significant observations that Jane made during the study was that chimpanzees make and use tools, much like humans do, to help them get food. It was previously thought that humans alone used tools. Also thanks to Jane's research, we now know that chimps eat meat as well as plants and fruits. The study started by Jane Goodall in 1960 is now the longest field study of any animal species in their natural habitat. Research continues to this day in Gombe and is conducted by a team of trained Tanzanians.

Jane's life has included much more than just her study of the chimps in Tanzania. She pursued a graduate degree while still conducting her study, receiving her Ph.D. from Cambridge University in 1965. In 1984, she received the J. Paul Getty Wildlife Conservation Prize for "helping millions of people understand the importance of wildlife conservation to life on this planet."

Dr. Jane Goodall is now the world's most renowned authority on chimpanzees, having studied their behavior for nearly 40 years. She has published many scientific articles, has written two books, and has won numerous awards for her groundbreaking work. The Jane Goodall Institute for Wildlife Research, Education, and Conservation was founded in 1977 in California but moved to the Washington, D.C., area in 1998. Dr. Goodall now travels extensively, giving lectures, visiting zoos and chimp sanctuaries, and talking to young people involved in environmental education. She is truly a great conservationist and an amazing human being.

Questions:

- | | |
|--|----|
| 1. What is the author's purpose in writing this article? | 01 |
| 2. Write a brief summary of this article using only the main events. | 02 |
| 3. How has Jane Goodall's work helped us to better understand chimpanzees? | 02 |
| 4. What might happen to chimpanzees in the future due to Jane's work? | 02 |
| Q-5 (A) Your friend is going to appear in a Group Discussion. He wants you to give him some suggestions for better performance. What suggestions will you give to your friend? | 08 |
| Q-5 (B) Prepare a resume suitable for the post of a Software Engineer. | 06 |
| OR | |
| Q-5 (A) List the types of Interview. Specify the difference between Telephonic Interview and Face-to-face Interview. | 08 |
| Q-5 (B) You are deputed abroad by the company you are working for. Your colleagues here in India are curious to know about the place you live in, the people you work with and the kind of work culture they have. Give a brief description of all these to your colleagues. | 06 |
| Q-6 (A) Write a detailed note on the effective use of visual aids in a presentation. | 08 |
| Q-6 (B) One of the donors visited your college. You were assigned the task of taking him on the campus visit. Write 20 conversations you had with him. | 06 |
| OR | |
| Q-6 (A) You were not able to attend the internal examination due to illness. Write a letter to Principal of your institute requesting him to allow you to appear in the remedial examination. | 08 |
| Q-6 (B) You have applied for the post of a Programmer. During the interview you are asked to justify your candidacy. How will you convince the selection committee that you are the best candidate for the post? | 06 |
