OR

Q.2 Answer the following questions.

- A. What are Online Processing and Batch Processing in Transaction Processing System? Explain with example. [4]
- B. How can we control the transaction processing? Discuss it in detail. [4]
- C. Explain the stages in Decision Support System (DSS) in detail. [4]

Q.3 Do as directed.

- A. Discuss the detail case study of **Transaction Processing System** for Banking System. Describe the various types of transactions, classify the transaction in different processing categories, data collection methods, data storage structure, their validation, out put of the whole systems etc in detail. [8]
- B. Describe the broad classification of CBMS. [3]

OR

Q.3 Do as directed.

- A. Discuss the case study of **Decision Support System** for opening a new branch of City Bank in rural area. Present your study data in table (row and column) format with proper classification along with different possible outcomes. [8]
- B. What are the differences between a data-driven DSS and a model-driven DSS? Explain it with examples. [3]

Section-II

Q.4 Answer the following questions (any three).

[12]

- (a) What is Information system? Discuss different component of Information system?
- (b) Discuss different types of MIS Reports?
- (c) Discuss Business information value chain?
- (d) What are dimensions of MIS? Why does information system matter?

Q. 5 Answer the following questions.

- A. Describe the important dimensions of knowledge. Distinguish between data, knowledge, and wisdom and between explicit and tacit knowledge. [4]
- B. Evaluate the business benefits of using intelligent techniques for knowledge management [4]
- C. Explain the structured and semi structured knowledge in detail. [4]

OR

**Q.5 Answer the following questions.**

- A. What is knowledge management? How does it promote organizational learning? [4]
- B. Describe the stages in the knowledge management value chain that add value as data and information are transformed into useful knowledge. [4]
- C. Explain the knowledge network system in detail. Describe the key features of it. [4]

**Q.6 Answer the following questions.**

- A. Discuss four types of Management systems along with functional areas. [4]
- B. Discuss key issues in 'PepsiCo' Case study? [4]
- C. Describe different management Challenges for ESS. [3]

**OR**

**Q.6 Answer the following questions.**

- A. Discuss different characteristics of Information processing systems [4]
- B. Discuss the possible solutions for 'PepsiCo' case study. [4]
- C. What types of solutions are possible to meet different management challenges for ESS? [3]
