Q-2

- [A] What do you mean by MIS? How is MIS related with computer based system? 4
What are the different systems with which MIS is related?
- [B] What are some of the new roles Information Systems are playing in organization? 4
What are some of the elements of managing and implementation of a new information system?
- [C] Explain the types of DSS and Components of DSS. 4

OR

- [A] List EIS roles and characteristics. 4
- [B] Discuss issues in Distributed Systems. 4
- [C] Who is more important to an organization: Technocrats or managers? Justify. 4

Q-3

- [A] Explain the capabilities of an Executive Information System. 4
- [B] What are the differences among strategic, tactical and operational planning? What types of information system are best suited for each type of planning? Why? 4
- [C] Explain the architecture of KDD (Knowledge Discovery from Database). 4

OR

- [A] Why do relational database management system appear to be a better than a hierarchical or network database management system? 4
- [B] Differentiate between Database and Data warehouse. How Data Mining enhances a business? 4
- [C] Why must an executive support system be flexible and easy to use? 4

SECTION-II

Q-4

- a. How MIS is related with Computer Based System? 3
- b. Explain: Usefulness of Transaction Processing System in strategic level planning. 4
- c. What is an Expert System? Explain the block diagram of an Expert System with all the components. 4

Q-5

- [A] Differentiate: Office Automation System and Knowledge Work System. 4
- [B] What is Data Mining? List out different techniques of Data Mining. 4
- [C] List and explain the goals of information systems. What is the importance of DSS for Executive Decision Making? 4

OR

- [A] Describe how your quality of life has improved or decline with the technological advances. 4
- [B] Describe client-server network. What are the advantages of it? 4
- [C] What is Distributed System and How it is useful in EIS. 4

Q-6

- [A] Explain: how a company can use Information Systems to improve its core competencies. 4
- [B] Explain: Information Architecture. 4

OR

- [B] What do you mean by SCM & CRM? What is (are) the need(s) for these concepts? How these concepts are used to improve the business and ultimately to customer satisfaction? 4
- [C] What do you mean by Business Logic? How is it captured? 4

OR

- [C] Differentiate:
 1. OLTP vs. OLAP.
 2. Batch Processing and Real time Processing4
