

December 2011

CE 207 Java Programming

Date: 06.12.2011, Tuesday

Time: 10:00 a.m. To 01:00 p.m.

Maximum Marks: 70

Instructions:

1. The question paper comprises of two sections.
2. Section I and II must be attempted in separate answer sheets.
3. Make suitable assumptions and draw neat figures wherever required.
4. Use of scientific calculator is allowed.

SECTION - I

- Q - 1 (a) What is constructor? How constructor can be overloaded? [04]
- (b) Write the differences between object and reference variable. What the relation is between object and reference variable? [03]
- Q - 2 (a) What is array? Write a different ways to create array in java. [03]
- (b) Explain how final keyword modifies the role of class, method and variable with example. [04]
- (c) Write a program to read five numbers as a command line argument and find out minimum number. [07]

OR

- Q - 2 (a) "Java Is a Strongly Typed programming Language and provides security". Justify the statement with example. [03]
- (b) What is Object class? Explain the methods of object class which are used with threads. [04]
- (c) Write a program to check whether given string is palindrome or not. [07]
- Q - 3 (a) What is inheritance? Why java doesn't support multiple inheritances? [03]
- (b) Explain the following terms: [04]
1. Method overloading
 2. Method overriding
- (c) What is package? Write steps to create package with example. [07]

OR

- Q - 3 (a) List the types of java operator. Explain any one of them briefly. [03]
- (b) Explain the following terms: [04]
1. Data Encapsulation
 2. Polymorphism
- (c) Write the differences between interface and abstract class. Is it possible to have reference variable of type interface or abstract class? Justify your answer. [07]

SECTION – II

- Q - 4 (a) What is thread synchronization? Explain various ways to create thread. [05]
(b) Give the difference between Character oriented I/O Stream and Byte oriented I/O Stream. [02]
- Q - 5 (a) What is an applet? How it differs from application? Explain <APPLET> tag. [07]
(b) Write the difference between Exception and Error. Explain how exceptions are handled in program. [07]

OR

- Q - 5 (a) Describe AWT. Explain how Frame differs from applet. List various layout manager used in GUI programming. [07]
(b) What is RuntimeException? Explain Unchecked and Checked exceptions. [07]
- Q - 6 (a) Explain String class. How StringBuffer differs from String class. [07]
(b) What is Event driven programming? Explain how events are handled in java with example. [07]

OR

- Q - 6 (a) Explain following classes briefly: [07]
1. File
2. FileInputStream
- (b) What is Adapter Class? Explain any two adapter classes of java. [07]
