

CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY

Sixth Semester of B. Tech. (CE/IT) Examination

November 2012

CE 308 Advanced Programming using .NET Framework

Date: 09.11.2012, Friday

Time: 10 a.m. to 1:00 p.m.

Maximum Marks: 70

Instructions:

1. The question paper comprises of two sections.
2. Section I and II must be attempted in separate answer sheets.
3. Make suitable assumptions and draw neat figures wherever required.
4. Use of scientific calculator is allowed.

SECTION – I

Q - 1 Select appropriate option with reason or justification:

08

1) Visual Studio .NET provides which feature:

- | | |
|------------------|----------------------------|
| a) Debugging. | b) Application deployment. |
| c) Both a and b. | d) All of the above. |

2) Which of the following assemblies can be stored in Global Assembly Cache?

- | | |
|-----------------------|-------------------------|
| a) Private Assemblies | b) Public Assemblies |
| c) Shared Assemblies | d) Protected Assemblies |

3) Which of the following are NOT true about .NET Framework?

1. It provides a consistent object-oriented programming environment whether object code is stored and executed locally, executed locally but Internet-distributed, or executed remotely.
2. It provides a code-execution environment that minimizes software deployment and versioning conflicts.
3. It provides a code-execution environment that promotes safe execution of code, including code created by an unknown or semi-trusted third party.
4. It provides different programming models for Windows-based applications and Web-based applications.
5. It provides an event driven programming model for building Windows Device Drivers.

- | | |
|------------|------------|
| a) 1 and 2 | b) 4 and 5 |
| c) 2 and 4 | d) 1,2,4 |

4) A property can be declared inside a class, struct, Interface.

- a) True b) False

Q - 2 Answer the following questions.

(a) A function cannot return a value, whereas a subroutine returns a value. 01

- a) True b) False

(b) Define Following terms: 06

- | | |
|---------------------------|-------------------|
| a) Just in Time Compiler | b) Intellisense |
| c) No more DLL Hell | d) Cross-platform |
| e) Side-by-side execution | f) Conciseness |

OR

(b) Why we need Access Modifiers in C#? List out Which are the access modifiers we used in C#. Explain Internal and Protected Modifiers in details. 06

(c) State the Difference between CLR and CLS. Explain in details with diagrams. 06

OR

(c) Draw ASP.NET Framework Architecture with explanations of all components. 06

Q - 3 Answer the following questions.

(a) What is Event? What is delegate? Write down the steps for Generating a new event. 05

(b) Why we need Constructor and Destructor in C#? If I used destructor in C# application then Can I use IDisposable Interface in it? Justify your answer 06

OR

(b) Why we need Visual Inheritance? What is Global Assembly Cache? Write down the steps for creating your own assembly and make it global 06

(c) Is there necessary to use Collection Namespace in your application? Justify your answer. 03

OR

(c) If I want to use pointer base variable in my application what should I do? Explain your answer with example. 03

SECTION – II

Q - 4 Select appropriate option with reason or justification:

08

1. What is the most number of states a CheckBox can have?

- | | |
|------|------|
| a) 0 | b) 1 |
| c) 2 | d) 3 |

2. What is the standard prefix for the name of a RadioButton?

- | | |
|--------|--------|
| a) rad | b) rdo |
| c) rbt | d) rab |

3. Which statement about objects is true?

- | | |
|--|--|
| a) One class is used to create one object. | b) One object is used to create one class. |
| c) One class can create many objects. | d) There is no relationship between objects and classes. |

4. Which sequence of char data types is listed from lowest to highest?

- | | |
|---------------|---------------|
| a) a, A, z, Z | b) A, Z, a, z |
| c) a, z, A, Z | d) A, Z, a, z |

Q - 5 Answer the following questions.

(a) What is ADO.NET? Explain Characteristics of ADO.NET in details.

06

(b) Explain the Following terms.

06

- | | |
|--------------------|--------------------|
| a) Dataset | b) SqlCommand |
| c) ExecuteNonQuery | d) SqlDataAdapter |
| e) ExecuteReader | f) OleDbDataReader |

OR

(b) What is a Web service? What are UDDI and WSDL? Explain the use of Master Page in ASP.NET with its Syntax. **06**

(c) List the Name of Data bound Controls.

01

OR

(c) Mode of Strong ASP.NET Session is

01

- | | |
|---------------|---------------------|
| a) InProc | b) State Server |
| c) SQL Server | d) All of the above |

Q - 6 Answer the following questions.

(a) Why we need Themes, Skin and CSS to build an application? Write the life cycle of ASP.NET page with its stages and events. 06

(b) Write a Console Application for which given string is palindrome or not. 04

OR

(b) What is AutoPostBack? Is property or Event? Explain with Example. 04

(c) Write a code to display disconnected dataset in to grid view control using SQL server. 04

Insert, Update and Delete data from Grid View control and Change data back to SQL server. (Data Source Name: Movieplex, Database Name: Movie, DataTable Name: TblMovieInfo, Data Column Names: MovieID, TheaterID, TheaterName, MovieName, ShowTime, ShowDate, Available(Yes/No))

OR

(c) Write a Console Application for overloading a (+) operator as a binary. 04
