

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

Sixth Semester of B. Tech. Examination (CE/IT)

May 2012

CE 308 Advanced Programming using .NET Framework

Date: 11.05.2012, Friday

Time: 01:30 p.m. To 04:30 p.m.

Maximum Marks: 70

Instructions:

1. The question paper comprises of two sections.
2. Section I and II must be attempted in separate answer sheets.
3. Make suitable assumptions and draw neat figures wherever required.
4. Use of scientific calculator is allowed.

SECTION – I

Q - 1 Answer the following questions.

(a) Select appropriate answer:

03

1) In web application the class "webform1" inherits from

- | | |
|-----------------------|--------------------------|
| a) System.web.page | b) System.web.UI.webform |
| c) System.web.UI.page | d) None |

2) How many Radio Buttons in a Group Box can be selected at the same time?

- | | |
|------|------|
| a) 0 | b) 1 |
| c) 3 | d) 4 |

3) Which of the following statements are TRUE about the .NET CLR?

1. It provides a language-neutral development & execution environment.
 2. It ensures that an application would not be able to access memory that it is not authorized to access.
 3. It provides services to run "managed" applications.
 4. The resources are garbage collected.
 5. It provides services to run "unmanaged" applications.
- | | |
|-----------------|-----------------|
| a) Only 1 and 2 | b) Only 4 and 5 |
| c) Only 3 and 4 | d) 1,2,3,4 |

(b) What do you mean by Assembly? Define Assembly manifest, Global Assembly cache. Write down the steps to make assembly global.

04

Q - 2 Answer the following questions.

(a) State True or false: Justify your answer

02

Properties are not overloaded but indexers are.

- (b) Define Following terms: 06
- | | |
|--------------------|------------------------|
| a) Jitter | b) Intellisense |
| c) End-To-DLL hell | d) Line of Terminating |
| e) Attribute | f) Assembly manifest |
- (c) Draw the Architecture of .net Framework and Explain each of its parts in detail. 06

OR

Q - 2 Answer the following questions.

- (a) Explain unsafe code with example. 02
- (b) What is Namespace? Explain Collection and Diagnostic Namespace with example. 06
- (c) What is Exception Handling in .net? How can we handle it? Explain try, catch and Finally block with example. 06

Q - 3 Answer the following questions.

- (a) What is Event? Explain Event sender, Event Receiver and Handling Event with example. 05
- (b) Explain Dispose and Finalize method with example. 04
- (c) Explain Function overloading with example. 02
- (d) What is visual inheritance? 02
- (e) Which of the following is the root of the .NET type hierarchy? 01
- | | |
|------------------|----------------|
| a) System.Object | b) System.Type |
| c) System.Base | d) System.Root |

OR

Q - 3 Answer the following questions.

- (a) What is Delegate? State difference between Delegate and Multicast delegate. Explain Multicast Delegate with example. 05
- (b) Explain the use of Reflection API and GDI+ in .net with example. 04
- (c) Explain Constructor and Destructor with example. 02
- (d) Explain File handling concept. 02
- (e) Which of the following security features can .NET applications avail? 01
1. PIN Security
 2. Code Access Security
 3. Role Based Security
 4. Authentication Security
 5. Biorhythm Security

a) 1,4,5

b) 2,5

c) 3,4

d) 2,3

SECTION – II

Q - 4 Answer the following questions.

- (a) Explain the usage of following items of ADO.NET. 05
i) ExecuteScalar
ii) ExecuteReader
iii) ExecuteNonQuery
iv) Data Set
v) DataAdaptor
- (b) List the Name of Data bound Controls. 02

Q - 5 Answer the following questions.

- (a) Explain web service, UDDI, WSDL and show how to write web service and consume it in web application 05
- (b) Explain Themes & Skin in ASP.NET. Also write Steps. 04
- (c) Explain the use of Master page with example. 04
- (d) What is managed code and unmanaged code? 01

OR

Q - 5 Answer the following questions.

- (a) How to create User controls? Explain with Example. 05
- (b) Differentiate Session and View State. Explain Global Application Class in details. 04
- (c) Write the life cycle of ASP.NET page with its stages and events in brief. 04
- (d) What is POSTBACK? 01

Q - 6 Answer the following questions.

- (a) Write a Console Application to enter string by user and count no of characters of strings. 04
- (b) Write a Console Application to sort the elements which will be entered by user using bubble sort algorithm. 04
- (c) Write a code to display disconnected dataset in to grid view control using SQL Server. Update Data from Grid View control and Change data back to SQL Server. (DataSourceName: DSN, DataBaseName: DB1, DataTable Name: TblPlayerInfo, Data Column Names: PlayerID, PlayerName, PlayerTeamName, PlayerCountry, PlayerRole.) 06

OR

Q - 6 Answer the following questions.

- (a) Write a Console Application to enter two strings by user. Apply Split, Join, Trim, Substring function to it. **04**
- (b) Write a Console Application to enter a string by user and make reverse of it without inbuilt function. **04**
- (c) Explain Disconnected Approach in ADO.NET. Draw and Explain various Component of ADO.NET Architecture. **06**
