

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

Sixth Semester of B. Tech. (CE/IT) Examination

May 2013

CE308 Advanced Programming using .Net Framework

Date: 04.05.2013, Saturday

Time: 10 a.m. To 1:00 p.m.

Maximum Marks: 70

Instructions:

1. The question paper comprises of two sections.
2. Section I and II must be attempted in separate answer sheets.
3. Make suitable assumptions and draw neat figures wherever required.

SECTION – I

Q – 1 Attempt following questions:

[07]

1. What is significance of CTS in .Net Framework?
2. What is Assembly in .Net Framework?
3. What is IDE? How it is differ from Framework?
4. List various features of Visual Studio 2010 for Application Development.
5. List various categories of Windows Form Application controls in Toolbox of Visual Studio 2010.
6. What is the use of Internal Modifier in C#?
7. What is MDI? Give example.

Q - 2 (a) Attempt Any Four Questions:

[08]

1. Draw the architecture of .NET Framework 4.5.
2. Explain the use of Finilize () method.
3. What is Reflection API?
4. List out the steps to make an Assembly shared.
5. State any two differences between VB and C# with example.
6. Write a code to open a notepad file in Word using Diagnostic namespace.

(b) Explain concept of Events and Delegates. Write a simple program that shows use of Events and Delegates. [03]

OR

(b) Explain concept of Visual Inheritance. How to apply Inheritance techniques to Windows Forms using C#.Net? [03]

(c) What is a difference between *Array* and *Arraylist*? [03]

OR

(c) Explain various functions available for string operations using *String* Class of .Net Framework. Take suitable example to explain syntax of function. [03]

Q - 3 (a) Attempt any seven questions with example:

[14]

1. Draw the Disconnected architecture of ADO.NET.
2. What is safe code and unsafe code? Explain it with example.
3. What is Namespace? Explain the use of collection namespace in .NET.

4. Write a code to open a URL in explorer using Diagnostic namespace.
5. What is the use of get() & set() method in Indexers?
6. What is ProcessStartInfo() method in Diagnostic namespace?
7. What is GDI+? Explain its application in .Net Development.
8. What is significance of JIT compiler in .Net Framework?
9. Explain terms: Global Assembly Cache, Garbage Collector.

SECTION – II

Q - 4 (a) Attempt following questions:

[07]

1. What is significance of web.config file in ASP .Net?
2. Explain three methods of SqlCommand Object of ADO.Net.
3. Explain major differences between ASP and ASP.NET.
4. How Page Load is differing from Post back?
5. Mention the difference between Gridview and Detailview.
6. How to store cookies in ASP .Net?
7. What is View State?

Q - 5 (a) 1. Explain Terms: Silverlight and WPF in .Net Framework.

[04]

2. What is AJAX? How to use AJAX Control in ASP .Net web application?

[03]

(b) List and Explain All Validation and All Login controls with suitable examples.

[07]

OR

(b) 1. What is Directive in ASP .Net? Explain Page Directive and Master Directive with its attributes.

[04]

2. Explain Page Life Cycle with all phases in ASP .Net.

[03]

Q - 6 (a) 1. Explain purpose of following ADO .Net Objects: 1) DataAdapter 2) DataSet.

[02]

2. Write steps and code to populate ADO .Net DataSet object for Library

[04]

Management system's Book_Master table, also write code to update the same.

(b) Write a steps and code of using *DataReader* object for fetching records from Student's details database in Microsoft SQL Server database. Display this record in simple HTML table on web page.

[04]

OR

(b) State the steps to include web service in your web application. Explain by example of any small service.

[04]

(c) Write a Console application using C# to find that string and number (both) is palindrome or not. Take an input through command line arguments.

[04]

OR

(c) Write a console application using C# that prints the reverse order of whatever we take as an input. (String & Number-both).

[04]
