- (v) Explain *\$this* in php with example
- (vi) How to upload image file using PHP?

Q – 3.a How can we validate form elements using php? Give example. **[04]**

OR

Q – 3.a How can we validate form elements using AJAX? Give example. **[04]**

Q – 3.b Explain following functions with example. **[04]**
mysqli_affected_rows()
mysqli_fetch_array()

OR

Q – 3.b Explain following functions with example. **[04]**
mysqli_fetch_assoc()
mysqli_select_db()

SECTION – II

Q – 4.a Answer the question below. **[05]**

- (i) What is XSD?
- (ii) “XML allows multiple root elements”. True/ False?
- (iii) What is SOAP based web service?
- (iv) What are the uses of md5 function in php?
- (v) Create connection object in php for MySQL database connection.

Q – 4.b Answer following questions (Any five). **[10]**

- (i) Explain phishing with example.
- (ii) Write SQL statement for listing all databases and selecting one from the list for MySQL.
- (iii) How to create attribute in DTD? Give example.
- (iv) How to create attribute in XSD? Give example.
- (v) XSD is more preferred the DTD. Give any two reasons.
- (vi) What is jQuery?

Q – 5.a Answer the question below (Any four): **[12]**

- (i) Explain different selectors in jQuery.
- (ii) What is prepared statement? Explain with example.

- (iii) Explain SQL injection with example.
- (iv) What are disadvantages of JQuery?
- (v) Differentiate between text() and html() method of JQuery.
- (vi) Why following xml is not valid? Give at least three reasons.

```
<?xml version="1.0"?>
  <student semester=one>
    <name>Sujal</ name >
    <city>5.5</ city >
    <cgpa>Ahmedabad</ cgpa >
    <sgpa>2.3 &lt; AVERAGE </ sgpa >

  <student semester=one>
    <name>Manish</Name>
    <city>Ahmedabad</city>
    <cgpa>6.3</cgpa>
    <sgpa>7.2</sgpa>
  </student>
```

Q – 6.a Explain CSS box model with example.? **[04]**

OR

Q – 6.a How to modify CSS dynamically using JQuery? **[04]**

Q – 6.b Differentiate between SOAP based webs service and REST based web service. **[04]**

OR

Q – 6.b Explain rules for creating valid XML document. **[04]**
