

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY**Fifth Semester of B. Tech (IT) Examination****November 2019****IT342 Advanced Web Technologies****Date: 05.11.2019, Tuesday****Time: 10.00 a.m. To 01.00 p.m.****Maximum Marks: 70****Instructions:**

1. The question paper comprises two sections.
2. Section I and II must be attempted on separate answer sheets.
3. Make suitable assumptions and draw neat figures wherever required.

SECTION – I**Q – 1 Answer the question below.****[05]**

- (i) Which in-built function will add a value to the end of an array?
a) array_unshift() b) into_array() c) inend_array() d) array_push()
- (ii) Which of the functions is used to sort an array in descending order?
- (iii) What is the output of the following PHP code?

```
<?PHP
$fruits = array ("apple", "mango", "peach", "pear", "orange");
$subset = array_slice ($fruits, 2);
print_r ($subset);
?>
```
- (iv) If your object must inherit behaviour from a number of sources you must use a/an
a) Interface b) Object c) Abstract class d) Static class
- (v) How to access object properties in PHP?

Q – 2.a Answer the question below (Any five).**[10]**

- (i) Differentiate between GET and POST methods.
- (ii) Write a PHP code to convert a string in Uppercase and print it in reverse order (using String Functions only).
- (iii) How to create a class in PHP with constructor and destructor? Explain with example.
- (iv) What is the way to get parameters from a URL query string? Explain with example.
- (v) Write a regular expression to validate the Mobile Number i.e. Starting with 0 and have exactly 11 digits (including 0) in PHP.
- (vi) What is the difference between include() and require() methods?

Q – 2.b Answer the question below (Any Two).**[10]**

- (i) What is SQL injection? Explain methods to prevent it with example in PHP.
- (ii) Write a code to upload an image file to the server using PHP.
- (iii) Write a program to demonstrate how error can be handled by custom error handler and

display error_no and error_msg.

Q – 3.a How .php file processing is differing than .html file? Explain the role of the webserver in PHP file processing. **[03]**

Q – 3.b Write code for the following tasks in PHP. (Use OOPs Concept) **[07]**

1. Create a Login.php page with username and password as an input and a button.
2. While clicking on the Login button, If login successful, it will create session for username using create_Session() and redirect it to index.php page.
3. On index.php page display welcome message with session value. Also, provide a Logout button here.
4. While clicking on Logout, it should invalidate session or destroy the session using destroy_Session() and redirect back to Login.php page.

OR

Q – 3.b Write a code for following tasks in PHP using OOPs concept. **[07]**

1. Create a class person which has attributes like name, gender and age.
2. Create a class “Employee” having functions like addRecords() which take two arguments as “designation” and “salary” and getRecords() which returns all employee details.
3. Inherit class person in Employee class and display employee’s name, age, designation and salary.

SECTION – II

Q – 4 Answer the question below. **[07]**

- (i) What is the default port for MySQL Server?
- (ii) To see the table structure, which of the following commands is issued?

A. DESCRIBE tbl_name	B. VIEW tbl_name
C. SELECT TABLE tbl_name	D. SELECT tbl_name
- (iii) “XML allows multiple root elements”. True/ False?
- (iv) Web services can be discovered using _____.

A. UDII	B. UDDI	C. UDDII	D. UDDDI
---------	---------	----------	----------
- (v) AJAX is combination of _____ and _____.
- (vi) On executing DELETE command, if you get an error “foreign key constraint” – what does it imply?

A. Foreign key not defined	B. Table is empty
C. Connectivity issue	D. Data is present in the other table
- (vii) “We can validate our XML file against XSD”. True/False?

Q – 5 Answer the question below (Any four) [16]

- (i) Explain Following MySQL function with example. **(Any Two)**
- | | |
|-----------------------|-------------------------|
| 1. mysqli_connect() | 2. mysqli_query() |
| 3. mysqli_data_seek() | 4. mysqli_fetch_array() |
- (ii) What is an RSS Feed? Compare RSS aggregator v/s RSS reader.
- (iii) Define AJAX. List and explain all AJAX XMLHttpRequest Property.
- (iv) What is Web Service? Compare SOAP-based and RESTful Web service.
- (v) What is RDF? Explain <rdf:RDF> and <rdf:Description> RDF Elements.

Q – 6.a Create an HTML form which asks to enter server IP, MySQL username and password. [06]

Write a PHP script which validates credential which is to be entered into HTML form and if entered credentials are correct then perform following tasks.

- Bind all database into dropdown and allow user to select any database
- On upon selected database by the user, bind all table created under that database.
- User can see all records from the selected table from dropdown.

OR

Q – 6.a Write code for the following tasks in PHP. [06]

1. Create database “IT_Dept” using PHP script.
2. Create table “Student_Detail” in “IT_Dept” with columns like Stu_id, Stu_name, Stu_DOB, Stu_percentage.
3. Insert three records in “Student_Detail”.
4. Display all student record in ascending order of name.

Q – 6.b What is XSLT? Explain <xsl:template>, <xsl:for-each> and <xsl:value-of> with example. [06]

OR

Q – 6.b Write a code for XML file for purchasing a book from online store and also create DTD for XML file. It should have attributes like Book_name, Book_author, Book_Price, Book_Genre, Book_Qty. [06]

**** ALL THE BEST ****
