

SECTION – II

- Q - 4 Explain the basic frame structure and network architecture of SONET. [07]
- Q – 5 **Answer the question below** [14]
- a Explain WDM . [06]
 - b Compare single mode and multi mode fiber. [04]

OR

- b A Double-heterojunction InGaAsP LED emitting at a peak wavelength of 1310nm has radiative and non radiative recombination time of 30 and 100ns, respectively. The drive current is 40mA. Find recombination lifetime , internal quantum efficiency and internal power level. [04]
 - c Explain Vapour –phase axial deposition technique. [04]
- Q – 6 **Write Short note (Any Two)** [14]
- a Performance of EDFA system.
 - b Consumer and civil Applications with respect to optical fiber.
 - c Industrial Application with respect to optical fiber.
