- All questions are compulsory.
- This is a closed book examination.
- There are two sections in the question paper. Section – I contains Q. No.: 1 which is of 15 marks and Section – II contains total five questions wherein Q. No.: 2 to 5 are of 10 marks each and Q. 6 is a Case study of 15 marks.
- Section – I should be answered in the given question paper and Section – II should be answered in a separate answer book.
- Maximum time allotted for Section – I is 30 minutes. Answer Book for Section – II will be given when the Question Paper for Section – I is returned. However, candidates who complete Section – I earlier than 30 minutes, can collect Answer Book for Section – II immediately after handing over Section – I question paper.
- Figures on the right indicate marks for each question.

SECTION – I

Q.1 Objective Type Questions:

15

A) Match the following: (i – vi)

06

Q. No.:		Probable Answer Keys		Write Your Answer Here
i.	Information	a)	Uses Intranet	i. -
ii.	File	b)	Raw Facts	ii. -
iii.	Data	c)	Telecommunication Technology	iii. -
iv.	ERP	d)	Processed Facts	iv.-
v.	CRM	e)	Uses Extranet	v. -
vi.	Packet Switching	f)	Collection of Records	vi. -
		g)	SCM	
		h)	DSS	
		i)	MIS	
		j)	ESS	

B) Multiple-Choice Questions (vii – ix) (Note: Encircle the correct answer)

03

- vii.** MIS is used for
- Routine Decision Making at Middle Management
 - Non-Routine Decision Making at Middle Management
 - Routine Decision Making at Top Management
 - All of above

- viii.** DSS is used for
- a) Routine Decision Making at Operational Management
 - b) Non-Routine Decision Making at Middle Management
 - c) Routine Decision Making at Top Management
 - d) All of above
- ix.** TPS is used for
- a) Routine Decision Making at Operational Management
 - b) Non-Routine Decision Making at Middle Management
 - c) Routine Decision Making at Top Management
 - d) All of above

C) Fill-in the Blanks (x – xii) You may choose from the following answers:

03

Information System	Market Analyst	Virus	Worms	ERP	CRM
--------------------	----------------	-------	-------	-----	-----

- x.** _____ includes Collect, Process Store & Distribute.
- xi.** _____ creates replicas in the computer without permission of the users.
- xii.** _____ is a central repository of organizational data.

| Q.5 | How data can be used for the decision making? How information system deals with different types of data in the organization? Explain it in brief. | 10 |
| Q.6 | Case Study / Case-let:

The Unique Identification Authority of India (UIDAI) on Thursday clarified that there has not been any breach in the Aadhaar database and the personal data of citizens, including biometric information, is safe and secure. The clarification comes in response to a news report titled ‘Rs 500, 10 minutes, and you have access to a billion Aadhaar details’ published in The Tribune on Thursday. The report claims that a WhatsApp group sold all Aadhaar data available with UIDAI for a sum of Rs500.

UIDAI maintained that the reported case appeared to be an instance of misuse of the grievance redressal search facility. As UIDAI maintains complete logs and traceability of the facility, legal action including lodging of FIR against the persons involved in the case is being undertaken. | 15 |

UIDAI clarified in a press statement that displayed demographic information cannot be misused; it would need to be paired with an individual's biometrics. There are more than 1.19 billion Aadhaar card holders in the country. "If it is not a data breach, then this means that some people who have legitimate access to the data are selling it illegitimately. This poses a greater problem," said Pranesh Prakash, policy director at the Centre for Internet and Society, a Bengaluru-based think tank.
