

CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY

Bachelor of Science- Nursing SEMESTER-III (backlog)

University Examination, May-2011

Pharmacology, Pathology & Genetics (NR 202)

Date: 28/05/2011, Saturday

Time. 10.00 To 01.00 pm

Maximum Marks-75 Marks

INSTRUCTIONS

- ❖ Write each section in separate answer booklet.
- ❖ Question number "1 & 5" is compulsory.

Section-I (Pharmacology)

Maximum Marks – 38

Q.1 Multiple Choice Question:

(1x 12 = 12)

1) Abbreviation used for a drug dose "at bed time "

- (a) SOS
- (b) Stat
- (c) HS
- (d) Abt

2) What the body does to the drug is

- (a) Pharmaceutics
- (b) Pharmacodynamics
- (c) Pharmacy
- (d) Pharmacokinetics

3) the most common adverse effect of α adrenergic blocker drug as a anti hypertensive is

- (a) Postural hypotension
- (b) Arrhythmias
- (c) Miosis
- (d) Fever

4) The advantage/ advantages of giving a drug intravenously are:

- (a) Useful in emergencies
- (b) Large volume can be given
- (c) Irritants can be given
- (d) All of the above

5) Lotions have the following properties:

- (a) Irritants effects
- (b) Counter irritant actions
- (c) Soothing & protective effects
- (d) None of the above

6) the most useful drug in amoebic dysentery is:

- (a) Albendazole
- (b) Metronidazole

(c) Miconazole

(d) Clotrimazole

7) Rickets is due to deficiency of:

(a) Vitamin D

(b) Retinoic acid

(c) Alpha tocopherol

(d) Riboflavin

8) Acyclovir is used in:

(a) Bacterial endocarditis

(b) Herpes simplex infection

(c) Influenza

(d) Staphylococcal infection

9) Formaldehyde:

(a) Has a pungent odour

(b) Is a gas at room temperature

(c) Is a carcinogen

(d) All of the above are true

10) The following drug is used in the treatment of organophosphorous poisoning:

(a) Pilocarpine

(b) Physostigmine

(c) Atropine

(d) Adrenaline

11) The following vaccine is given intradermally;

(a) Cholera

(b) BCG

(c) Typhoid

(d) Hepatitis A

12) The main adverse effect of salbutamol are:

(a) Bradycardia & Heart block

(b) Palpitation & muscle tremors

(c) Nausea & vomiting

(d) Diarrhea & hypotension.

Q.2 Write the indications, contra-indications, side effects and nurse's responsibilities for following drugs
(Attempt any three) (3×3=9)

1) Dexamethazone

2) Amoxycillin

3) Chloroquine

4) Ranitidine

5) Benzodizepines

Write short notes on (**Attempt any three**)

(3×3=9)

- 1) Atropine substitute
- 2) Oral contraceptive pills
- 3) Metabolism
- 4) Anti Scabietic Drug
- 5) Syringes and Needles

Describe briefly therapeutic uses, adverse effects, and Nursing implication (**Attempt any two**)

- 1) Classify antihypertensive, Describe β blocker.
- 2) Classify NSAIDs, Describe Selective COX-2 inhibitors
- 3) Drugs used in Leprosy

(2×4=8)

Section- II (pathology and Genetics)

Maximum Marks – 37

Multiple Choice Questions:

(1×5=5)

1. Causes of Cell injury are:

- | | | |
|-------------------------|-------------------------|---------------------|
| a) Hypoxia | b) Chemicals and drugs | |
| c) Microbiologic agents | d) Immunological injury | e) All of the above |

2. Nephritic syndrome is characterized by:

- | | | |
|------------------------|----------------------|---------------------|
| a) Massive proteinuria | b) Generalised edema | |
| c) Hypoalbuminemia | d) Hyperlipidemia | e) All of the above |

3. Mitosis is the key cellular process in which

- a) Duplication of chromosome occur
- b) Duplication of cell occur
- c) Both a and b
- d) None from a and b

4. Which of the following is not true about cancer?

- a) Cancer exhibits uncontrolled cell growth
- b) Cancer causing oncogenes are always obtained from virus
- c) Tumour suppressor genes are inactivated in cancer
- d) All above are correct

5. Gene therapy is technique which replaces the mutant gene

- a) True
- b) False

Q. 6 Write short Notes (**Any four**)

(4×2=16)

- I. Tuberculosis Osteomyelitis
- II. Explain about the routes of metastasis
- III. Define atrophy? Explain about pathologic atrophy.
- IV. Difference between Duodenal ulcer and gastric ulcer.
- V. What is nephritic syndrome and write about its pathogenesis?

Q.7 Explain briefly (draw diagram wherever necessary) (**Any one**)

(1×7=7)

- I. Define atherosclerosis? Explain about its pathogenesis and morphology
- II. Explain in details about all stages of wound healing.

Q.8 Write short notes on:

(9)

- a) Application of genetic counseling in nursing
- b) Prenatal testing and diagnosis
- c) Role of folic acid in lowering the risk of neural tube defect

OR

Q.7 Write short notes on:

(9)

- a) Blood group alleles and haematological disorder
- b) Ethical and legal issues of eugenic movement
- c) What is gene therapy? Explain the benefits of gene therapy
