

CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY

Bachelor of Science- Nursing SEMESTER-II

University Examination, May-2011

Microbiology (NR 105)

Date: 18/05/2011, Wednesday

Time 10.00 to 01.00 pm

Maximum Marks-75 Marks

INSTRUCTIONS

- ❖ Write each section in separate answer booklet.
- ❖ Question number "1 & 4" is compulsory.

Section-I

Maximum Marks – 38

Q.1 A. Define following terms:

(1×12=12)

- | | | |
|-------------------|-----------------|-------------|
| a. Immunity | b. Vaccination | c. Antibody |
| d. Immunoglobulin | e. Mycology | f. Sepsis |
| g. Septicemia | h. Chemotherapy | i. Carrier |

B. Fill in the Blanks:

- I. Gram negative bacteria are stained _____ in colour by gram's staining technique.
- II. IgA immunoglobulin is a _____.
- III. *Shigella* genus is classified into _____ serogroups.

Q.2 a) Define Hypersensitivity.

b) Enlist types of Hypersensitivity.

c) Explain Type-I Hypersensitivity.

(2+2+6=10)

OR

Q.2. a) Define cold chain.

b) Define antigen-antibody reaction.

c) Explain in detail the immunization schedule.

(2+2+6=10)

Q.3. Write short notes (**Any four**)

- I. Streptococci
- II. HIV virus
- III. *Mycoplasma Rickettsiae*

IV. Physical sterilization methods

V. Parasites.

VI. Differential staining techniques.

(4×4=16)

Section- II

Maximum Marks – 37

Q.5 A. Fill in the blanks.

(1×6=6)

1. A single flagellum at one end of bacteria is known as _____.
2. _____ is a spirochete which can cause the venereal disease.
3. A lens placed at the upper end of the body tube of the microscope is known as _____
4. *Corynebacterium diphtheriae* are called as _____ bacilli.
5. An infection occurs in the hospital is called as _____.
6. Filariasis is caused by _____.

B. Match the items of A with items of B.

(5)

A	B
1. Burning contaminated materials to ash	a. Antiviral
2. Method of sterilization for Endoscope, heart-lung machine, anesthetic equipments polythene tubings etc	b. Autoclaving
3. Method of sterilization for Metallic wires, tips of forceps, needles.	c. Antifungal
4. Clotrimazole, miconazole are	d. Incineration
5. Ribavirin, Acyclovir are	e. Ethylene oxide
	f. Red heat in Bunsen burner

Q.6 Answer the following.

(2+3+4=9)

- a. Define Microbiology.
- b. Explain importance of microbiology in nursing.
- c. Explain the principles of microbiology.

OR

Q.7 Answer the following.

(2+3+4=9)

- (a) Classify the bacteria.
- (b) Enlist the techniques which used to study the bacteria.
- (c) Explain the factors affect the growth of bacteria.

Q.6 Answer the following.

(2+3+4=9)

- (a) Define infection.
- (b) Explain the portals of entry of infection.
- (c) Explain the direct methods of transmission of infection.

OR

Q.7 Answer the following.

(2+4+3=9)

- (a) Define infestation.
- (b) Explain helminths in detail.
- (c) Enlist the diseases occur by helminths.

Q.8 Write answers for the following.

(2+3+3=8)

- (a) Enlist the chemical agents of sterilization.
- (b) Explain moist heat.
- (c) Write the role of nurse in CSSD.

OR

Q.9 Write the answer for the following.

(2+3+3=8)

- (a) What do you mean by infection control?
- (b) Write the standard safety measures for infection control.
- (c) Write role of nurses in infection control.
