

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

II Semester of BSc (Biological sciences) Examination May, 2018

BS209: Animal Sciences

Date: 05/05/2018 Day: Saturday Time: 10.00 a.m. To 10.30 a.m. Maximum Marks: 20

MCQ

Important Instructions:

- Tick the correct answer and it should be written in question paper itself.
- Use of non-programmable calculator is allowed.

Q - I	Choose the correct answer for the following questions.	20
1.	Structural and functional unit of kidney is (i) neuron (ii) nephron (iii) myosin (iv) axon	
2.	Myofibril is a component of (i) Epithelial Tissue (ii) Nervous Tissue (iii) Muscular Tissue (iv) None of these	
3.	Which one of the following sets of animals share a four chambered heart? (i) Amphibian, Reptiles, Birds (ii) Crocodiles, Birds, Mammals (iii) Crocodiles, Lizards, Turtles (iv) Lizards, Mammals, Birds	
4.	In Latent learning the animal makes a locality survey. ☐True ☐False	

5.	Hormones are also known as primary messengers. ☐True ☐False	
6.	One of the following is true regarding reason for isolation among population. (i) time (ii) Geographical factors (iii) spatial factors (iv) All of these	
7.	Tetanus is the stage when the muscle goes into continued contraction. ☐True ☐False	
8.	Birds and mammals share one of the following characteristics as a common feature. (i) Pigmented skin (ii) Alimentary canal with some modification (iii) Viviparity (iv) Warm blooded nature	
9.	The idea about allele frequencies of a gene in a population and its relationship with evolutionary forces was given by___ (i) F. Redi (ii) Hardy-Weinberg (iii) Gregor John Mendel (iv) None of the above	
10.	Point out the odd option regarding reproduction (i) Hermaphrodite (ii) Regeneration (iii) Budding (iv) Binary fission	
11.	Which one of the following sets of animals belongs to a single taxonomic group? (i) Cuttlefish, Jellyfish, Silverfish, Dogfish, Starfish (ii) Bat, Pigeon, Butterfly (iii) Monkey, Chimpanzee, Man (iv) Silkworm, Tapeworm, Earthworm	
12.	Fertilization is always internal in mammals. ☐True ☐False	
13.	Digestion is a process of breakdown of complex food into simpler substances and further absorption of the nutrients. The digestion process starts in ____ (i) Mouth (iii) Stomach (ii) Esophagus (iv) Pharynx	

14.	In _____ pregnancy the fertilized egg implants somewhere outside the uterus (i) normal (ii) abnormal (iii) ectopic (iv) none of these	
15.	_____ epithelium forms the lining of the Fallopian tube. (i) Ciliated columnar (ii) Cuboidal (iii) squamous (iv) none of these	
16.	A chemical that is produced and released in the environment by the organism and affects the behavior of organism of same species is known as pheromones. ☐ True ☐ False	
17.	Male species of seahorse carry fertilized eggs. ☐ True ☐ False	
18.	Pharynx serves as lid which closes the opening of larynx at the time of deglutition (swallowing). ☐ True ☐ False	
19.	Which one of the following is not a poisonous snake? (i) Cobra (ii) Viper (iii) Python (iv) Krait	
20.	Which one of the following is not a connective tissue? (i) Bone (ii) Cartilage (iii) Blood (iv) Muscles	

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

II Semester of BSc (Biological sciences) Examination May, 2018

BS209: Animal Sciences

Date: 05/05/2018 Day: Saturday Time: 10.30 a.m. To 1.00 p.m Maximum Marks: 50

Instructions:

1. Section I and II must be attempted in TWO ANSWER SHEET.
2. Make suitable assumptions and draw neat figures wherever required.
3. Use of non-programmable calculator is allowed.
4. Show necessary calculations.

SECTION - I		
Q - II Answer the following questions as directed		20
	Answer any five of the following:	
1.	How are homologous organs different from analogous organs? Differentiate them with appropriate examples.	
2.	‘Mammals are most adapted among the vertebrates’. Elaborate.	
3.	Discuss the composition of Intestinal juice, pancreatic juice and bile juice and their importance in the digestion and absorption processes.	
4.	Explain ‘parental care’ in different animals with examples.	
5.	Give differences between striated, smooth and cardiac muscle alongwith necessary diagrams.	
6.	Differentiate between spermatogenesis and oogenesis processes in detail.	
SECTION - II		
Q-III Answer the following questions as directed		30
	Answer any six of the following:	
1.	How was the theory of Spontaneous Generation disapproved by Francesco Redi’s biogenesis theory? Explain Redi’s theory in detail.	
2.	Discuss the formation of body cavity in case of coelomate, acoelomates and pseudocoelomates with examples and suitable diagrams.	
3.	Describe the stages of menstrual cycle. Add a note on ‘tubectomy’ and its significance.	

4.	What is a synapse? Explain synaptic transmission of nerve impulse. Compare the speed of nerve impulse conduction in myelinated and non- myelinated nerve fibre with reasons.	
5.	How is asexual reproduction different from sexual reproduction? Describe several types of asexual reproduction in invertebrates.	
6.	Define ‘animal behaviour’ and discuss its importance for the animals.	
7.	Comment upon the habitats and external features of animals belonging to class amphibia and reptilia.
