

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

VI Semester of B. Sc (Biochemistry) Examination, May, 2018

Course code & Name BC 601 & Diagnostic Biochemistry

Date: 07/05/2018 Day: Monday Time: 1.30 PM to 1.50 PM Maximum Marks: 10

MCQ

Important Instructions:

- Tick the correct answer and it should be written in question paper itself.
- Use of non-programmable calculator is allowed.

Q - I	Choose the correct answer for the following questions.	10
1.	The α -cells of pancreas islets produce	01
	(i) Insulin	
	(ii) Somatostatin	
	(iii) Glucagon	
	(iv) Pancreatic polypeptide	
2.	All mammalian steroid hormones are formed from	01
	(i) Pyrrole	
	(ii) Cholesterol	
	(iii) Pyrimidine	
	(iv) Purine	
3.	Which of these is not a normal constituent of urine: sugar, urea or creatinine?	01
	(i) Creatine	
	(ii) Sugar	
	(iii) Urea	
	(iv) Blood	
4.	In the normal resting state of human most of the blood glucose burnt as fuel is consumed by	01
	(i) Brain	
	(ii) Liver	
	(iii) Adipose tissue	
	(iv) Muscles	

5.	Which of the following is least likely to be present in the glomerular filtrate (the filtrate produced by the nephron before it enters the loop of Henle) of a healthy adult nephron?		01
	(i) Glucose	(ii) Electrolytes	
	(iii) Amino acids	(iv) Large molecular weight protein	
6.	The predominant isozyme of LDH in cardiac muscle is:		01
	(i) LD-1	(ii) LD-2	
	(iii) LD-3	(iv) LD-4	
7.	Together, HCl (Hydrochloric Acid), rennin and pepsin form the		01
	(i) intestinal juice	(ii) gastric juice	
	(iii) pancreatic juice	(iv) bile juice	
8.	What could be used as a marker of muscle damage/disease?		01
	(i) Creatine Kinase	(ii) Troponin	
	(iii) Myoglobin	(iv) Lactate dehydrogenase	
9.	Bile, secreted by liver has		01
	(i) has a pH of 7	(ii) depends upon type of food to be digested	
	(iii) an acidic base	(iv) an alkaline base.	
10.	Which is not a manifestation of pancreatitis and pancreatic insufficiency?		01
	(i) Hypertriglyceridemia	(ii) Normal blood amylase levels	
	(iii) Hypocalcemia	(iv) Hypoglycemia	

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

VI Semester of B. Sc. (Biochemistry) Examination, May, 2018

Course code & Name BC 601 & Diagnostic Biochemistry

Date: 07/05/2018 Day: Monday Time: 1.51 PM to 3.30 PM Maximum Marks: 25

Instructions:

1. Section I and II must be attempted in SINGLE ANSWER SHEET.
2. Make suitable assumptions and draw neat figures wherever required.
3. Use of non-programmable calculator is allowed.
4. Show necessary calculations.

SECTION - I		
Q – II	Answer the following questions as directed (attempt any 5)	10
1.	What are the steps in obtaining a laboratory test?	02
2.	What are Prothrombin time (PT), Partial thromboplastin time (PTT)?	02
3.	How uric acid is produced in the body and what are the normal range in human serum? What is Gout?	02
4.	What are the different types of kidney function tests? Describe briefly any one.	02
5.	What are the factors affecting the result of plasma analysis assay? Justify briefly.	02
6.	Write short notes on Phlebotomy.	02
7.	What is Van Der Bergh test? Write down the principle of this test.	02
SECTION – II		
Q-III	Answer the following questions as directed (attempt any 5)	15
1.	What are the different types of laboratory tests? Discuss briefly.	03
2.	Write some commoner causes of errors arising from use of the laboratory.	03
3.	Write equations of reactions catalyzed by: ALT AST LD	03

4.	What are Bromosulphthalein (BSP) and G- Glutamyl transpeptidase (GGT) tests? Discuss briefly.	03
5.	What do you mean by detoxification? Which organ is responsible for detoxification? How you can detect detoxification?	03
6.	What can be detected in a urine test? How do doctors know if you have a yeast infection?	03
7.	Write down the direct and indirect Pancreatic tests with examples.	03
