 - a. Love for Life
 - b. Scientific Thinking

17. Priyank likes 25 but not 24; he likes 400 but not 300; he likes 144 but not 145.

a. 88

c. 120

d. 125

- 18.** If FRIEND is coded as HUMJTK, how can CANDLE be written in that code?

b. EDRIRL

d. ESJFM

19. Which is the next number in the series: 2, 4, 7, 11, 16, 22, ?

b. 29

d. 28

- 20.** Choose the odd one out.

b. Algebra

d. Thermodynamics

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

I Semester of M.Sc. Examination March 2018

Course code & Name: HS701 E Advance Critical Thinking and Logic

Date: 30/03/2018 Day: Friday Time: 10:00 a.m. To 1:00 p.m. Maximum Marks: 50

Instructions:

1. Section I and II must be attempted in TWO ANSWER SHEET.
2. Make suitable assumptions and draw neat figures wherever required.
3. Use of non-programmable calculator is allowed.
4. Show necessary calculations.

SECTION –I

Q – II Answer the following questions as directed.

OR

[B] The arms race has resulted in developing more powerful weapons by many nations. Do you support this view of developing more powerful weapons? Should India also develop more powerful and deadly weapons? Write your opinion about this and support it with appropriate arguments and examples [07]

Q- V What is Socratic questioning method? Frame various questions based upon Socratic Questioning Method for the following paragraph. [10]

India is sadly the home to the largest number of child laborers in the world. The census found an increase in the number of child laborers from 11.28 million in 1991 to 12.59 million in 2001. Poverty and lack of social security are the main causes of child labour. The increasing gap between the rich and the poor, privatization of basic services and the neo-liberal economic policies are causes major sections of the population out of employment and without basic needs. This adversely affects children more than any other group. Entry of multi-national corporations into industry without proper mechanisms to hold them accountable has lead to the use of child labour. Lack of quality universal education has also contributed to children dropping out of school and entering the labour force. A major concern is that the actual number of child labourers goes un-detected. Laws that are meant to protect children from hazardous labour are ineffective and not implemented correctly.

A growing phenomenon is using children as domestic workers in urban areas. The conditions in which children work is completely unregulated and they are often made to work without food, and very low wages, resembling situations of slavery. There are cases of physical, sexual and emotional abuse of child domestic workers. The argument for domestic work is often that families have placed their children in these homes for care and employment. There has been a recent notification by the Ministry of Labour making child domestic work as well as employment of children in dhabas, tea stalls and restaurants "hazardous"

occupations.

Bonded child labour is a hidden phenomenon as a majority of them are found in the informal sector. Bonded labour means the employment of a person against a loan or debt or social obligation by the family of the child or the family as a whole. It is a form of slavery. Children who are bonded with their family or inherit a debt from their parents are often found in agricultural sector or assisting their families in brick kilns, and stone quarries. Individual pledging of children is a growing occurrence that usually leads to trafficking of children to urban areas for employment and have children working in small production houses versus factories. Bonded labourers in India are mostly migrant workers, which opens them up to more exploitation. Also they mostly come from low caste groups such as dalits or marginalised tribal groups. Bonded child labourers are at very high risk for physical and sexual abuse and neglect sometimes leading to death. They often are psychologically and mentally disturbed and have not learnt many social skills or survival skills.
