- 10) I am a doctor. And _____ do you do? (who, what)

10

C Write a Report on the 'Spoural- cultural fest' organized by your University.

10

Q 4 Attempt any **TWO** of the following

A Draft a resume for the post of pharmacist in Laila pharmaceuticals.

10

B Develop a phargraph on i) Global warming ii) Foob habits

10

C Read the given Paragraph carefully and **answer the Questions** that follow:

10

It is bad to have food stuck between your teeth for long periods of time. This is because food attracts germs, germs produce acid, and acid hurts your teeth and gums. Flossing helps to remove the food that gets stuck between your teeth. This explains why flossing helps to keep your mouth healthy, but some doctors say that flossing can be also good for your heart. It may seem strange that something you do for your teeth can have any effect on your heart. Doctors have come up with a few ideas about how flossing works to keep your heart healthy. One idea is that the germs that hurt your teeth can leave the mouth and travel into your blood. Germs that get into the blood can then attack your heart. Another idea is based on the fact that when there are too many germs in your mouth, the body tries to fight against these germs. For some reason, the way the body fights these mouth germs may end up weakening the heart over time. Not every doctor agrees about these ideas. Some doctors think that the link between good flossing habits and good heart health is only a coincidence. A coincidence is the occurrence of two or more events at one time apparently by mere chance. The incidence of these events is completely random, as they do not admit of any reliable cause and effect relationship

between them. For example, every time I wash my car, it rains. This does not mean that when I wash my car, I somehow change the weather. This is only a coincidence. Likewise, some doctors think that people who have bad flossing habits just happen to also have heart problems, and people who have good flossing habits just happen to have healthy hearts. The theory that flossing your teeth helps to keep your heart healthy might not be true. But every doctor agrees that flossing is a great way to keep your teeth healthy. So even if flossing does not help your heart, it is sure to help your teeth. This is enough of a reason for everyone to floss their teeth every day.

Questions

- 1) Give the suitable title to the passage.
 - 2) What effectively helps to keep your mouth healthy?
 - 3) What the ideas that doctors have come up with flossing?
 - 4) Author writes, "Not every doctor agrees about these ideas." What is the author's purpose?
 - 5) What are your views on this passage?
-
