

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

1stSemester of B. Pharm. Examination

University Theory Examination March 2018

PH112 HUMAN ANATOMY PHYSIOLOGY I

Date: 30.03.2018, Friday

Time: 10:00 a.m. to 1:00 p.m.

Maximum Marks: 80

Instructions:

1. There are three sections in this question paper.
2. SECTION – I comprises of Question 1. Total marks for Section 1 are 20. There are 20 sub-questions (MCQ type). Answers to SECTION – I are to be given in Answer Sheet for MCQ type questions provided to you. Maximum time allotted for SECTION – I is 30 minutes. Answers to SECTION – I must be written during the first 30 minutes of the examination.
3. Answers to SECTION – II and SECTION – III are to be provided in separate Main Answer Books provided to you.
4. Figures to right indicate marks.
5. Draw neat labeled sketches wherever necessary.

SECTION - I

- | | | |
|-----|---|----|
| Q 1 | Attempt all questions. Each question is of one mark. | 20 |
| 1. | The surface area of the stomach is enhanced by the presence of folds called _____.
A) Rugae
B) Villi
C) microvilli
D) Plicae | |
| 2. | Which of the following organ is not the part of Digestive system?
A) Ureters
B) Rectum
C) Small Intestine
D) Esophagus | |
| 3. | Which structure is last in the sequence of urine flow?
A) Ureter
B) kidney
C) bladder
D) urethra | |
| 4. | Where the least amount of bacteria would be found?
A) Rectum
B) Small Intestine
C) Large Intestine
D) Stomach | |
| 5. | Which system functions in the excretion of soluble nitrogenous wastes?
A) gastrointestinal
B) pulmonary
C) urinary
D) integumentary | |
| 6. | The type of anemia that is fairly common and caused by insufficient vitamin B12 is _____.
A) aplastic anemia
B) pernicious anemia
C) hemolytic anemia
D) iron deficiency anemia | |
| 7. | A condition would show decrease in a blood count as _____. | |

- A) leukopenia
 - B) leukocytosis
 - C) too few helper T cells
 - D) thrombocytopenia
8. Which blood cell can be described as being a biconcave disc?
 - A) Platelet
 - B) neutrophil
 - C) eosinophil
 - D) erythrocyte
 9. How many openings are there in the right atrium?
 - A) 1 B) 2 C) 3 D) 4
 10. A heartbeat of less than 60 beats per minute is called _____.
 - A) Tachycardia B) Arrhythmia
 - C) Fibrillation D) Bradycardia
 11. The first in the cardiac conduction sequence is the _____.
 - A) SA node
 - B) AV node
 - C) AV bundle
 - D) Purkinje fibers
 12. Freshly oxygenated blood enters the heart through the _____, and is pumped out the _____.
 - A) Right atrium; aorta
 - B) left atrium; aorta
 - C) right ventricle; pulmonary arteries
 - D) right ventricle; aorta
 13. The organs of the urinary system are:
 - A) The paired kidneys, the paired ureters, the urinary bladder, and the urethra.
 - B) The paired kidneys, the paired ovaries, the urinary bladder, and the urethra.
 - C) The paired kidneys, the paired testes, the urinary bladder, and the urethra.
 - D) The paired fallopian tubes, the paired ureters, the urinary bladder, and the urethra.
 14. Each kidney contains approximately:
 - A) 1 thousand nephron
 - B) 1 million nephron
 - C) 1 billion nephron
 - D) 1 hundred nephron
 15. Alveolar macrophages are present in which part of body
 - A) Spleen
 - B) lungs
 - C) liver
 - D) At site of infection
 16. Which of the following are mechanisms that control GFR? (1) renal autoregulation (2) Neural Regulation (3) Hormonal Regulation (4) Chemical Regulation of ions (5) presence or absence of transporter
 - A) 1,2,3
 - B) 2,3,4
 - C) 3,4,5
 - D) 1,3,5
 17. The exchange of gases between the blood and the cells of the body is called _____.
 - A) external respiration

- B) internal respiration
- C) pulmonary ventilation
- D) cellular respiration
- 18. What is the last structure in this respiratory sequence?
 - A) lungs
 - B) trachea
 - C) larynx
 - D) pharynx
- 19. The only structures that allow gas diffusion across them are the _____.
 - A) bronchioles
 - B) alveoli
 - C) alveolar ducts
 - D) bronchi
- 20. Which of the following is Blood disorder?
 - A) Tuberculosis
 - B) Peptic ulcer
 - C) Hepatitis
 - D) Leukemia

SECTION – II

- Q 2 Attempt any TWO of the following
- A. Define Hemostasis. Write a note on blood clotting. 05
 - B. Write a note on conduction system of the heart. 05
 - C. Write a note on regulation of Blood Pressure. 05
- Q 3 Attempt any TWO of the following
- A. Discuss mechanism of respiration. 05
 - B. Discuss different types of anemia. 05
 - C. Explain the types of WBCs. Discuss Functions of WBCs. 05

SECTION – III

- Q 4 Attempt any FOUR of the following
- A. Write a note on life cycle of RBCs 05
 - B. Discuss physiology of urine formation 05
 - C. Write a note Blood groups. 05
 - D. Explain following terms: 05
 - 1. Diarrhea
 - 2. Congestive Heart failure
 - 3. Leukopenia
 - 4. Color index
 - 5. Hemophilia
 - E. Draw labelled diagram of internal structure of Heart. Explain systemic and pulmonary circulation in brief. 05
 - F. Draw a neat and labeled diagram of nephron. 05
- Q 5 Attempt any FOUR of the following
- A. Discuss various phases of gastric acid secretion. 05
 - B. Describe the different events involved in cardiac cycle. 05
 - C. Write a note on cardiac output. 05
 - D. Explain functions of small intestine and large intestine. 05
 - E. Discuss homeostasis with reference to positive and negative feedback mechanism. 05
 - F. Discuss disorders of respiratory diseases. 05
