

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

1st Semester of B. Pharm. Examination University Theory Examination April 2016 PH116 Pharmaceutical Biology-I

Date: 11.04.2016 , Monday

Time: 10 a.m. to 1 p.m.

Maximum Marks: 80

Instructions:

1. There are three sections in this question paper.
2. SECTION – I comprises of Question 1. Total marks for Section 1 are 20. There are 20 sub-questions (MCQ type). Answers to SECTION – I are to be given in Answer Sheet for MCQ type questions provided to you. Maximum time allotted for SECTION – I is 30 minutes. Answers to SECTION – I must be written during the first 30 minutes of the examination.
3. Answers to SECTION – II and SECTION – III are to be provided in separate Main Answer Books provided to you.
4. Figures to right indicate marks.
5. Draw neat sketches wherever necessary.

SECTION - I

- Q 1** Attempt all questions. Each question is of one mark. **20**
1. Cuboidal is a type of Epithelial tissue so Cardiac: _____
[A] Nervous
[B] Connective
[C] Epithelial
[D] Muscular
 2. Ciliated epithelium is found in _____.:
[A] tongue
[B] oesophagus
[C] trachea
[D] uterus
 3. The end of a long bone is connected to another bone by _____.:
[A] Ligament
[B] Tendon
[C] Cartilage
[D] Muscle
 4. Smooth muscles occur in _____.:
[A] Uterus
[B] Artery
[C] Vein
[D] All the above
 5. The inner lining of blood vessel is made up of which tissue?:
[A] Connective tissue
[B] Epithelial tissue
[C] Nervous tissue
[D] Muscle tissue
 6. Which tissue is lack of blood supply :
[A] Connective tissue
[B] Muscular tissue
[C] Nervous tissue
[D] Epithelial tissue
 7. The Bacteriophage contains an enzyme known as:
[A] lysozyme
[B] dehydrogenase
[C] urease
[D] protease
 8. Bacterial chromosome is:
[A] Single stranded and circular
[B] Double stranded and circular
[C] Single stranded and liner

- [D] Double stranded and liner
9. A cell has mitochondria, ribosomes, smooth and rough ER, and other parts. Based on this information, it could not be
[A] a grasshopper cell.
[B] a yeast (fungus) cell.
[C] a bacterium
[D] a cell from a pine tree.
10. Which kingdom would an organism with the following characteristics most likely belong: true nucleus, non-photosynthetic, non-motile, absorb nutrients, and reproduce by forming spores?:
[A] Fungi
[B] Protista
[C] Eubacteria
[D] Plantae
11. Which are the four types of animal tissues?:
[A] Epithelial, Squamous, Muscular, Connective
[B] Epithelial, connective, Muscular, Cardiac
[C] Connective, Muscular, Epithelial, Nervous
[D] Cuboidal, Ciliated, Glandular, Columnar
12. A group of cells alike in form, function and origin are called _____. :
[A] Tissue
[B] Organ
[C] Organelle
[D] None of these
13. Which type of tissue forms glands?:
[A] Epithelial
[B] Connective
[C] Muscular
[D] Nervous
14. Ligaments and tendons are formed of _____. :
[A] Epithelial tissue
[B] Muscular tissue
[C] Cartilage
[D] Connective tissue
15. Striated muscle is also called _____. :
[A] Cardiac muscle
[B] Smooth muscle
[C] Skeletal muscle
[D] Involuntary muscle
16. Which tissue synthesises, metabolised and store fat :
[A].Adipose
[B]Connective
[C]Visceral muscle
[D]Cardiac
17. Name the tissue where osteoblast found:
[A] cardiac
[B] Bone.
[C] Lymph
[D] Blood
18. Virion is :
[A] Nucleic acid of virus
[B] Protein of virus
[C] Antiviral agent
[D] Completely assembled virus outside host
19. Bacterial cell are prokaryotic; in comparison to a typical eukaryotic cell they would:
[A] be smaller
[B] have a smaller nucleus.
[C] lack a plasma membrane.
[D] have fewer internal membranous compartments
20. Microorganisms belonging to the same _____ would be expected to have the most characteristics in common with each other:
[A] genus
[B] Kingdom
[C] family
[D] species

SECTION – II

- Q 2** Attempt any **FOUR** of the following
- | | | |
|----------|---|-----------|
| A | Explain physiology of muscles contraction. | 05 |
| B | Explain the physiology of Vision | 05 |
| C | Classify the tissue. Explain connective tissue with suitable example | 05 |
| D | Describe the body temperature regulation mechanisms. | 05 |
| E | Write types on Neurones & note on nervous system | 05 |
| F | Write Gross & molecular level anatomy and physiology of skeletal muscle | 05 |

SECTION – III

- Q 3** Attempt any **FOUR** of the following
- | | | |
|----------|--|-----------|
| A | Draw the neat and labeled diagram of cell and explain about its organelles. | 05 |
| B | Write a note on nutritional requirements of bacteria. | 05 |
| C | Classify various transport mechanism across cell membrane and explain Facilitated diffusion in detail. | 05 |
| D | Explain principle of Osmosis. | 05 |
| E | Draw the neat and labeled diagram of eye and write disorders of vision. | 05 |
| F | Discuss the generation of action potential at the nerve terminal and the release of Acetylcholine. | 05 |
- Q 4** Attempt any **FOUR** of the following
- | | | |
|----------|--|-----------|
| A | Write a note on epithelial tissue in detail. | 05 |
| B | Explain the physiological properties of skeletal muscle. | 05 |
| C | Explain the Endocytosis & Exocytosis | 05 |
| D | Write a note on Cell Cycle. | 05 |
| E | Classify staining techniques of micro organism. Differentiate gram –ve and +ve bacteria. | 05 |
| F | Write in detail about Cell membrane with diagram. | 05 |
